# **INTRODUCTORY SECTION**

"Fellow citizens, why do you turn and scrape every stone to gather wealth, and take so little care of your children, to whom one day you must relinquish it all?"

-Socrates

West Virginia Children's Health Insurance Program 1900 Kanawha Boulevard East Building 3, Room 554 Charleston, WV 25305 304-558-2732 voice / 304-558-2741 fax Helpline 877-982-2447 www.wvchip.org

December 1, 2006

Honorable Joe Manchin III, Governor State of West Virginia

Honorable Members of the West Virginia Legislature

Board of Directors West Virginia Children's Health Insurance Program

Robert W. Ferguson, Jr., Cabinet Secretary West Virginia Department of Administration

Sharon L. Carte, Executive Director West Virginia Children's Health Insurance Program

#### Ladies and Gentlemen:

It is a privilege to submit to you the Annual Report of the West Virginia Children's Health Insurance Program (WVCHIP) for the fiscal year ended June 30, 2006. This report was prepared by the Office of the Financial Officer of WVCHIP. Responsibility for both the accuracy of the data presented and the completeness and fairness of the presentation, including all disclosures, rests with the management of WVCHIP. We believe the data, as presented, is accurate in all material respects and is presented in a manner designed to present fairly the financial position and results of operations of WVCHIP. All disclosures necessary to enable the reader to gain an understanding of WVCHIP's financial activities have been included. It should be noted that these financial reports are unaudited and for management purposes only.

This Annual Report is presented in three sections: introductory, financial and statistical. The introductory section contains this transmittal letter, a list of the principal officers of WVCHIP, and WVCHIP's organizational chart. The financial section includes the basic financial statements and footnotes as well as certain supplementary information as required by State Code. Also included

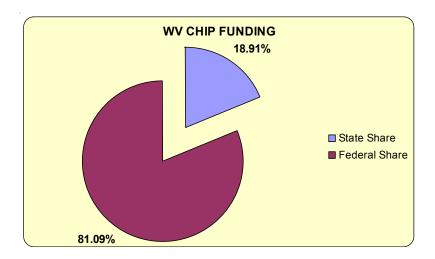

in the financial section is management's discussion and analysis (MD&A) which provides the reader a narrative introduction, overview and further analysis of the financial information presented. The statistical section includes selected financial and statistical data.

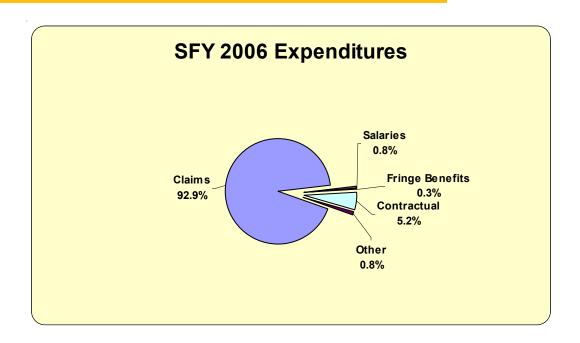

The West Virginia Legislature passed House Bill 4299 on April 19, 1998, to create WVCHIP. Since its inception, it has undergone several changes that include the transfer of the Program from the WV Department of Health and Human Resources to the WV Department of Administration with the passage of Senate Bill 565 in 2000. WVCHIP is governed by a board of up to eleven members. Day-to-day operations of WVCHIP are managed by the Director who is responsible for the implementation of policies and procedures established by the Board of Directors.

#### FINANCIAL PERFORMANCE AND OUTLOOK

The financial statements of WVCHIP have been prepared on a modified accrual basis of accounting in conformity with generally accepted accounting principles (GAAP) as prescribed or permitted by the Governmental Accounting Standards Board (GASB).

WVCHIP's funding is a shared federal/state partnership. The match rates at June 30, 2006, were 81.09% and 18.91%, respectively. WV State Code provides for an actuarial opinion to assure that WVCHIP's estimated program and administrative costs, including incurred but unreported claims, will not exceed 90 percent of the total funding available to the Program. The Actuarial Report dated June 30, 2006, confirmed this requirement will be met through SFY 2011, assuming that state appropriations remain at the current level of \$10,966,703, in SFY 2007, and considering increased enrollment and costs projected under the program expansion to 220%FPL. Based on estimated funding, enrollment and costs under the expanded program, the June 30, 2006, Actuarial Report projected federal funding shortfalls of \$14.2 million, \$26.9 million, \$32.1 million, and \$38.1 million in state fiscal years (SFY) 2009, 2010, 2011 and 2012 respectively. No federal funding shortfalls were projected for SFY 2007 and 2008. These projected federal funding deficits were reduced in the subsequent September 30, 2006 Actuarial Report, due to the announcement of the FY 2007 federal allotment of \$27,516,914. The subsequent report also projects that WVCHIP will meet the requirement that total expenditures not exceed 90% of available funding through 2013.

#### CASH MANAGEMENT

Cash and cash equivalents consist of funds on deposit in the State Treasurer's Office (WVSTO) and are managed by the West Virginia Board of Treasury Investments. In addition, WVCHIP had funds on deposit with a local financial institution for payment of medical claims processed by WVCHIP's third-party administrator. Cash in this account remained an asset of WVCHIP until such time as claims were paid.

On March 16, 2005, WVCHIP discontinued use of its outside bank account at the behest of the State Treasurer's Office. The account was closed at the end of October 2005, and residual money in the account was transferred back to WVCHIP's fund in the State Treasury. The bank account was part of an efficient payment process for providers of medical claims and also provided the Program with additional interest income. Some efficiencies were lost due to the closure of the outside bank account, most notably the mailing of provider payment checks and remittance advices together. After closure of the outside bank account, medical providers received their checks separate from the remittance advices causing higher volumes of phone calls to the Program's third-party administrator to request second copies of lost remittance advices. In addition, WVCHIP incurred additional costs associated with the separate mailing of provider checks, as well as lost interest income associated with the overnight investment of funds for provider payments that had not yet cleared the bank. This change also affected the payment processes of the Public Employees Insurance Agency (PEIA). PEIA is currently in discussions with the WVSTO to develop a process to mail the provider checks with the remittance advices once again. We are hopeful through their efforts this change will be made in an effort to provide a more efficient process for medical providers than the one currently in place.

#### **INITIATIVES**

WVCHIP embarked on a number of special projects this year. These included a collaborative study with the Department of Education to help standardize kindergarten screenings and a partnership with Department of Health and Human Resources to emphasize the importance of developmental checkups.

In an effort to reduce program costs and decrease drug costs trends, the Agency adopted a Preferred Drug List (PDL), as well as chose to cover some over-the-counter medications. Also, WVCHIP continued purchasing vaccines through the State's Immunization Program. The Program was also able to establish the use of Unique Identification Numbers for all members. All initiatives are discussed in more detail in the Major Initiatives section of the Management's Discussion and Analysis found on Page 19 of this report.

#### **OTHER**

Title XXI of the Social Security Act, enacted in 1997 by the Balanced Budget Act, authorized Federal grants to states for the provision of child health assistance to uninsured, low-income children. The Centers for Medicare and Medicaid Services (CMS) monitors the operation of WVCHIP. Financial statements are presented for the state fiscal year ended June 30, 2006. The federal fiscal year ends September 30 and further documentation is submitted to CMS based on that period. Certain statistical information such as HEDIS-type reports, by nature, is presented on a calendar year basis as required.

#### **ACKNOWLEDGMENTS**

Special thanks are extended to Governor Joe Manchin III and to members of the Legislature for their continued support. Gratitude is expressed to the members of WVCHIP's Board of Directors for their leadership and direction. Our most sincere appreciation is extended to Cabinet Secretary Robert W. Ferguson, Jr., for his hard work in support of the Agency this year. Finally, this report would not have been possible without the dedication and effort of WVCHIP's Executive Director, Sharon L. Carte. Respectfully, we submit this Annual Report for the West Virginia Children's Health Insurance Program for the year ended June 30, 2006.

Sincerely,

Stacey L. Shamblin, MHA

Stacy 2 Shew

Financial Officer

"My children and I are blessed to have this program. Before we got on CHIP, any medical necessity caused additional hardships on our family. Now we don't have to worry about unexpected illnesses and we can afford healthcare. Thank you!"

Comment from a WVCHIP family from the Customer Satisfaction Survey 2005

#### MANAGEMENT'S DISCUSSION AND ANALYSIS

# WEST VIRGINIA CHILDREN'S HEALTH INSURANCE PROGRAM For the Year Ended June 30, 2006

Management of the West Virginia Children's Health Insurance Program (WVCHIP) provides this Management Discussion and Analysis for readers of WVCHIP's financial statements. This narrative overview of the financial statements of WVCHIP is for the year ended June 30, 2006. We encourage readers to consider this information in conjunction with the additional information that is furnished in the footnotes which can be found following the financial statements. It should be noted that these financial statements are unaudited and for management purposes only.

#### **HISTORY AND BACKGROUND**

WVCHIP's primary purpose is to provide health insurance coverage to uninsured children in families whose incomes disqualify them from coverage available through the Medicaid Program, but is less than or equal to twice that of the current Federal Poverty Level (FPL). When Congress amended the Social Security Act in 1997 to create Title XXI "State Children's Health Insurance Program", federal funding was authorized to the states for such programs over a ten year period. The West Virginia Legislature established the legal framework for this State's program in legislation enacted in April 1998. Since then, WVCHIP has undergone several changes of its State Plan to reach its current form. These changes included:

- Phase I: In July 1998, the Program began as a Medicaid expansion by covering children from ages 1 to 5 in households with incomes from 131% FPL to 150% FPL.
- Phase II: On April 1, 2000, coverage for children from ages 6 through 18 in households from 100% to 150% FPL was added. WVCHIP also adopted PEIA's Preferred Benefit Plan to serve as the benchmark equivalent coverage program.
- In June 2000, WVCHIP notified the federal government that it was withdrawing the Medicaid expansion program and combining it with Phase II to create a separate state program.
- Phase III: In October 2000, WVCHIP expanded coverage for all children between 151% and 200% FPL.
- In June 2002, WVCHIP modified its co-payment requirements for pharmacy benefits to eliminate co-pays for generic drugs and expand co-pay requirements for brand name drugs. It also adopted an annual benefit limit of \$200,000 and a lifetime benefit limit of \$1,000,000.
- In January 2006, WVCHIP modified its pharmacy benefits by implementing a Preferred Drug List (PDL) which encouraged utilization of generic drugs and increased the amount of drug rebates received from drug manufacturers.

#### **OVERVIEW OF THE FINANCIAL STATEMENTS**

WVCHIP's financial statements have been prepared on a modified accrual basis of accounting in conformity with generally accepted accounting principles (GAAP) as prescribed or permitted by the Governmental Accounting Standards Board. As a governmental fund, WVCHIP is required to present two basic statements in this section as follows:

Balance Sheet: This statement reflects WVCHIP's assets, liabilities and fund balance. Assets equal liabilities plus fund balances. The major line item asset consists primarily of funds due from the federal government to cover WVCHIP's major liability, incurred claims.

Statement of Revenues, Expenditures and Changes in Fund Balances: This statement reflects WVCHIP's operating revenues and expenditures. The major source of revenue is federal grant awards while the major expenditure areas include medical, dental, and prescription drug claims costs.

#### FINANCIAL HIGHLIGHTS

The following financial statements summarize the financial position and the results of operations for the years ended June 30, 2006 and 2005. (See Pages 12 and 13.)

- Total assets have decreased approximately \$1,203,307, or 21% in comparison to the previous year end amount. This decrease is primarily a result of decreased ending cash balances and reflects the Program's decreased carry-over funding from prior years. The program has used carry-over funding from prior year's to cover the state's share of program expenditures. This reduction in carry-over funding required the program to ask for additional state appropriations starting in SFY 2007 and future years. Additional funding was approved by the state legislature during the 2006 legislative session.
- Total liabilities have decreased by approximately \$1,256,343 during the year. The majority of the decrease is attributable to a decrease in deferred revenues.
- Total fund balance increased approximately \$53,036 in comparison to the previous year end amount.
- Total operating revenues decreased approximately \$101,673. This is attributable mainly to a decrease in Federal Revenues. Federal Revenues are recognized when a related expense is paid.
- Medical, dental and prescription drug expenditures comprise approximately 93% of WVCHIP's total costs. These expenditures increased slightly by approximately \$211,308 over the prior year representing an increase of 1%.
- Administrative costs accounted for 7% of overall expenditures. These expenditures decreased approximately \$344,324 representing a decrease of 11%. The decrease is due mainly to completion of the PERM project in September 2005.

### West Virginia Children's Health Insurance Program Notes to Financial Statements For the Year Ended June 30, 2006

#### Note 1

#### **Summary of Significant Accounting Policies**

#### **Basis of Presentation**

The accompanying general purpose financial statements of the West Virginia Children's Health Insurance Program (WVCHIP) conform to generally accepted accounting principles (GAAP) for governments. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for governmental accounting and financial reporting.

#### **Financial Reporting Entity**

The West Virginia Children's Health Insurance Program (WVCHIP) expands access to health services for eligible children. Major revenue sources are federal awards and state appropriations. WVCHIP uses third party administrators to process claims, pay providers, and review utilization of health services. A board of up to eleven members develops plans for health insurance specific to the needs of children and to develop annual financial plans which promote fiscal stability.

#### **Basis of Accounting**

WVCHIP follows the modified accrual basis of accounting. Revenues are recognized when they become both measurable and available. Significant revenues subject to accrual are federal awards. Expenditures are recognized when a related liability is incurred.

#### **Assets and Liabilities**

#### Cash and Cash Equivalents

Cash equivalents principally consist of amounts on deposit in the State Treasurer's Office (STO) that are pooled funds managed by the West Virginia Board of Treasury Investments (BTI). In addition, WVCHIP makes interest-earning deposits in certain investment pools maintained by BTI that are available to WVCHIP with overnight notice. Interest income from these investments is prorated to WVCHIP at rates specified by BTI based on the balance of WVCHIP's deposits maintained in relation to the total deposits of all state agencies participating in the pool. The carrying value of the deposits reflected in the financial statements approximates fair value. WVCHIP also had an outside bank account which was utilized to make provider payments. Cash deposits in the outside bank account were considered to be cash and cash equivalents and were generally carried at fair value. Use of the outside bank account to process provider payments was discontinued in March 2005 and the account closed in October 2005. All cash is now on deposit in the State Treasury.

#### Deferred Revenue

Receipts to reimburse for program expenditures to be incurred in the future periods are classified as deferred revenue.

#### Insurance Claims Payable

The liability for unpaid claims is based on an estimate of claims incurred but not yet reported as of the balance sheet date. Offsetting amounts receivable for the federal and state share of these expenditures have been recorded.

#### Note 2

#### Cash and Investments

At June 30, 2006, information concerning the amount of deposits with financial institutions, including deposits, of the State Treasurer's Office is as follows:

|  | Carrying<br>Amount     | Bank<br>Balance | Collateralized<br>Amount |
|--|------------------------|-----------------|--------------------------|
| Deposits with Treasurer<br>Deposits with third | \$ 876,406             |                 |                          |

#### Note 5

#### Contingencies

WVCHIP receives significant financial assistance from the U.S. Government in the form of grants and other federal financial assistance. Entitlement to those resources is generally contingent upon compliance with the terms and conditions of the grant agreements and applicable federal regulations, including the expenditure of the resources for allowable purposes. Federal financial assistance awards are subject to financial and compliance audits under either the federal Single Audit Act or by grantor agencies of the federal government or their designees. Any obligations that may arise from cost disallowance or sanctions as a result of those audits are not expected to be material to the financial statements of WVCHIP.

<sup>\*</sup> Positive percentages indicate favorable variances

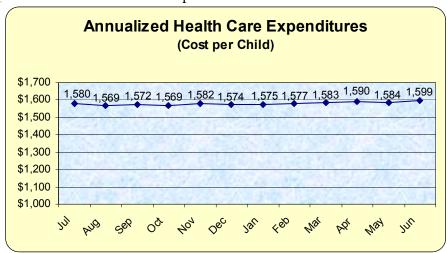

Unaudited - Cash Basis For Management Purposes Only - Unaudited

<sup>\*\*\*</sup> Budgeted Year Based on CCRC Actuary 6/30/2005 Report. Please note: Medical and Drug Co-pay figures are incomplete.

An increase in medical, dental, and prescription drug claims costs of 1% is lower than the current rate of medical inflation experienced by health plans nationally, which averaged 6% during the first half of 2006. After adjusting the increase for higher enrollment during the year of 2%, the net decrease of 1% appears to be better than national experience. The slight upward enrollment trend was steady throughout the year, from 24,573 enrollees on July 1 to 24,835 enrollees on June 30, for an increase of 262 participants. Phase III participants, that is, enrollees in households with incomes between 151% and 200% FPL are the smaller of the two groups. Enrollment of Phase III participants remained stable over the course of SFY 2006 versus a 1.9% increase in enrollment for Phase I kids. WVCHIP also continues to experience "pent-up" demands for services. These pent-up costs are illustrated in Table 13 on page 49 in the Statistical Section. All told, the combination enrollment, utilization, and price stabilizations resulted in a slightly lower annual cost per child at June 30, 2006 of \$1,599 than at June 30, 2005 of \$1,604.

WVCHIP had projected to spend \$45.3 million in State Fiscal Year 2006 per the June 30, 2005 Actuarial report. The Program was able to end the year \$3.1 million under budget, or 7%. The favorable variance is due to the Program's adoption of the PDL in January 2006 curbing drug cost trends and a stabilization of the level of enrollment. WVCHIP is able to capitalize on operating efficiencies by partnering with WV DHHR for eligibility processing and PEIA for claims processing and program administration. We believe these partnerships will continue to allow the Program to operate in the most cost efficient manner possible.

#### **MAJOR INITIATIVES**

#### Pharmacy Formulary Savings

On January 1, 2006 WVCHIP adopted a new Preferred Drug List and closed its formulary. It was the first SCHIP program in the country to do so. It was estimated that WVCHIP would save \$1.1 million annually as a result of this change, along with some other minor pharmacy benefit changes, such as the decision to cover certain over-the-counter medications when prescribed by a physician. The savings would be realized through higher generic drug utilization, as well as higher rebates from drug manufacturers.

An analysis completed on the first half of calendar year 2006, revealed that WVCHIP did realize a savings on drug costs. Generic utilization increased from 48% during the first six months of 2005 to 63% for the first six months of 2006, saving an estimated \$347,138. The projected annualized savings based on the first six months of 2006 is \$652,654. Rebates from drug manufacturers increased by 93% for the period January 2006 through September 2006 over the same time period in 2005. The program was able to keep drug costs down to practically the same level as 2005 because of this change, even though there was a slight increase in program enrollment and average drug prices.

#### Immunization Improvements

During the last months of State Fiscal Year 2004, WVCHIP began partnering with the State's Immunization Program to purchase vaccines for WVCHIP children at federally contracted rates provided through the Vaccines for Children program. The program has now completed its first full year under this partnership. WVCHIP entered into this partnership in an effort to encourage providers to report immunizations to the State's Immunization Registry, as well as to achieve a modest savings. The program saved an estimated \$71,000 during the course of the year, with virtually no impact on the rate of immunizations for WVCHIP children. (Refer to Table 25 on Page 57.)

#### Privacy and Billing Improvements

In February 2006, WVCHIP started planning to replace social security numbers as the basis of identification for billing and other purposes with a Unique Identification Number. WVCHIP was able to adopt use of the RAPIDS (Recipient Automated Payment and Information Data System) PIN (Personal Identification Number) assigned to each person that has program eligibility determined through RAPIDS. The purpose of the change was to provide greater protection to WVCHIP members' privacy and also to provide greater efficiencies for provider billing and claims processing. Use of Unique Identification numbers was implemented in October 2006 and all active WVCHIP members were issued new ID cards with the new numbers.

# Kindergarten Screening Report

In a major collaborative effort with the Department of Education's Office of Healthy Schools and the Department of Health and Human Resources' Office of Infant, Child and Adolescent Health, a school survey of health screenings prior to kindergarten entry was completed. After release of a report with survey results, the Office of Healthy Schools began the process of standardizing the types of instruments and various screens used for kindergarten entry as required under law. (Refer to "Child Health Screenings for Kindergarten" on Page 35.)

### Early Childhood Checkups Awareness

To emphasize the importance of developmental checkups in early childhood, WVCHIP joined with the Department of Health and Human Resources' Office of Infant, Child and Adolescent Health to increase awareness of vision, dental, and early periodic developmental screenings such as those recommended and covered under "HealthCheck", a program that covers the full periodic comprehensive well child visits recommended by pediatricians and for which there is a standardized set of guidelines, by creating health promotion messages. These promotional messages were placed in quarterly copies of *Child Care Provider Quarterly* Magazine which is distributed to all certified child care agencies and registered in home child care providers. (Refer to Oral Health Checkup message on Page 38.)

#### **CONTACTING WVCHIP's MANAGEMENT**

This report is designed to provide our enrollees, citizens, governing officials and legislators with a general overview of WVCHIP's finances and accountability. If you have questions about this report or need additional information, contact WVCHIP's Financial Officer at 304-558-2732. General information can also be obtained through our website at http://www.wvchip.org.

# REQUIRED SUPPLEMENTARY INFORMATION

"Having my son in the CHIP program has made a big difference as far as being able to make sure that he gets the proper treatment and care from his doctors. Thank you for having such a program that helps us parents who try to make a living the best way we know how, but can't afford health insurance for our children."

> Comment from a WVCHIP family from the Customer Satisfaction Survey 2005

# West Virginia Children's Health Insurance Program Report of Independent Actuary June 30, 2006 Quarterly Report

#### **OVERVIEW**

CCRC Actuaries, LLC ("CCRC Actuaries") was engaged by The West Virginia Children's Health Insurance Program ("CHIP Program") to assist the West Virginia CHIP Board in the analysis of actual and projected plan experience in the current State Fiscal Year 2006 ("FY 2006") through Fiscal Year 2012 ("FY 2012"). West Virginia legislation requires that an actuary provide a written opinion that all estimated program and administrative costs of the agency under the plan, including incurred but unreported claims, will not exceed 90 percent of the funding available to the program for the fiscal year for which the plan is proposed.

CHIP Program management requested CCRC Actuaries to produce the Baseline Scenario included the prescription drugs formulary changes effective beginning January 2006 and West Virginia Governor's recommended FY 2007 State funding of \$10,966,703.

In addition to the Baseline Scenario, CHIP Program management asked CCRC Actuaries to analyze an Expansion Scenario assuming the revised CHIP expansion schedule through State Fiscal Year 2012. In addition, we have assumed full Federal funding of the expansion. All other assumptions are consistent with the Baseline Scenario.

Under the proposed expansion schedule, the CHIP expansion will occur in one phase: The assumed monthly enrollment eligibility starts in January 2007 for 200% - 220% FPL groupings. Under the expansion scenario, family premiums are assumed to cover 20% of the policy cost for the 200% - 220% FPL group.

For the purposes of the Expansion Scenario, we have assumed that the initial premium will be unchanged for the first eighteen months starting in January 2007. The assumed benefit structure for CHIP expansion enrollees includes the following major components:

Medical Copayments: \$15 Office Visits

\$25 Inpatient & Outpatient Visits \$35 Emergency Room Visits

Prescription Drugs Copayments: \$0 Generic

\$10 Brand

- Dental Benefits are limited to \$150 Preventative services only
- No Vision services are covered

Under the Baseline Scenario and the Expansion Scenario, the projected cost of the CHIP Program in FY 2006 met the 90% funding requirement and we have assumed the same State funding in FY 2007 for the projected future years as shown in Appendix A and B.

Based on the Baseline Scenario and the 90% expenditure limitation on State funding of the program, we are currently projecting a shortfall in the ending reserve of State funding to reach the 90% funding requirement in FY 2012. We have assumed the same State funding of \$10,966,703 in FY 2007 for the projected future years and have not increased the State funding requirements for FY 2008 and beyond to meet the 90% expenditure limitation in subsequent years. Note that we are currently projecting the Federal funding shortfall of approximately \$14,155,000 in FY 2009, \$26,902,000 in FY 2010, \$32,150,000 in FY 2011 and \$38,068,000 in FY 2012 based on the Baseline Scenario. We had previously projected that Federal funding would be inadequate in FY 2008 in the March 31, 2006 Quarterly Report.

Based on the Expansion Scenario and the 90% expenditure limitation on State funding of the program, we are currently projecting a shortfall in the ending reserve of State funding to reach the 90% funding requirement in FY 2011 and FY 2012. We have assumed the same State funding in FY 2007 for the projected future years, as shown in Appendix B.

This projection reflects the current information on the availability of Federal funding. We have not assumed the FY 2003 Redistribution in this projection. West Virginia was one of 28 states that received the FY 2002 Redistribution funding. West Virginia CHIP utilized the remaining \$4,867,172 of the total \$12,081,320 of FY 2001 Redistribution and the total \$3,895,443 of FY 2002 Redistribution in Federal funding in the current fiscal year.

The Federal share of program expenditure is currently 81.09% for Federal Fiscal Year 2006. The Federal share of program expenditure is assumed to reduce to 80.97% for Federal Fiscal Year 2007 and future years.

Enrollment for the program as of June 2006 is at one of the highest levels since its inception. Overall enrollment for the CHIP Program in FY 2006 has increased noticeably from FY 2005 levels. The current program enrollment as of June 2006 consists of 24,835 children total: 15,907 children as part of Phase I and Phase II that consists of children whose families are below 150% of the federal poverty level and 8,928 children as part of Phase III that consists of children whose families are between 150% and 200% of the federal poverty level. Phase III children are required to make copayments as part of the benefit structure of the program. Since the March 31, 2006 Quarterly Report, overall enrollment has increased by 14 children from March 2006 to June 2006, while Phase I and Phase II had decreased enrollment of 9 children, Phase III had increased enrollment of 23 children.

### 2006 Annual Report

The monitoring and analysis of claim trends is critical to the accurate forecast of future costs of the program. While the program's enrollment continues to escalate, there has been some moderation of cost trends. The analysis of claims has become more critical with the Phase III expansion beginning in October 2000. Current claim trend experience has been financially favorable. We have maintained the Medical claim trend to 8%, the Dental claim trend to 7%, and the Prescription Drugs claim trend to 19% assumed in the March 31, 2006 Quarterly Report, based on trend experience consistent with the assumption.

Administrative expenses are assumed to be \$2,984,425 in FY 2006. West Virginia CHIP management team assumes a 5% administrative expense trend will be appropriate for FY 2007 and subsequent years.

Drug Rebates are assumed to be \$240,231 in FY 2006 and \$383,644 in FY 2007. West Virginia CHIP management team assumes a 4% increase in drug rebates will be appropriate for FY 2008 and subsequent years.

Under the State fiscal year basis, we are now projecting that incurred claim costs under the Baseline Scenario assumptions for FY 2006 will be \$39,899,170 compared to the previous projection of \$40,447,665 for FY 2006 contained in the March 31, 2006 Quarterly Report. The updated projection for FY 2007 claims is \$43,441,415. These decreased program costs are the result of the recent lower paid claims experience in April and May 2006.

### PLAN ENROLLMENT

We have updated our projection based on the significant increase in enrollment through June 2006. In fact, Phase II enrollment is at one of the highest level since October 2001 and the enrollment in Phase III is also at one of the highest level since its inception in 2000. The program had enrollment at the end of FY 2005 of 24,515 children, with 15,571 under Phase II and 8,944 under Phase III. Current enrollment as of June 2006 is 24,835 children, with 15,907 under Phase II and 8,928 under Phase III.

The following chart summarizes the enrollment information using end of month enrollment information by Phase II and Phase III and in total:

| <u>Date</u> | Phase II | Phase III | <u>Total</u> | <u>Date</u> | Phase II | Phase III | <u>Total</u> |
|-------------|----------|-----------|--------------|-------------|----------|-----------|--------------|
| Jul-00      | 10,349   | 0         | 11,839       | Jul-03      | 14,305   | 7,682     | 21,987       |
| Aug-00      | 10,097   | 0         | 11,567       | Aug-03      | 14,524   | 7,718     | 22,242       |
| Sep-00      | 10,542   | 0         | 12,023       | Sep-03      | 14,784   | 7,996     | 22,780       |

| Apr-03      | 14,007   | 7,429     | 21,436       | Apr-06      | 15,813   | 8,830     | 24,643       |
| May-03      | 14,112   | 7,455     | 21,567       | May-06      | 15,934   | 8,933     | 24,867       |
| Jun-03      | 14,243   | 7,554     | 21,797       | Jun-06      | 15,907   | 8,928     | 24,835       |

The Baseline Program enrollment assumptions are summarized in the following table. Note that the assumed enrollment in FY 2006 under the Baseline Scenario has decreased by 10 additional children from the previous report.

| <u>Scenario</u>  | <u>FY2006</u> | <u>FY2007</u> |  |
|------------------|---------------|---------------|--|
| Current Baseline | 24,697        | 24,835        |  |
| Previous Report  | 24,707        | 24,821        |  |

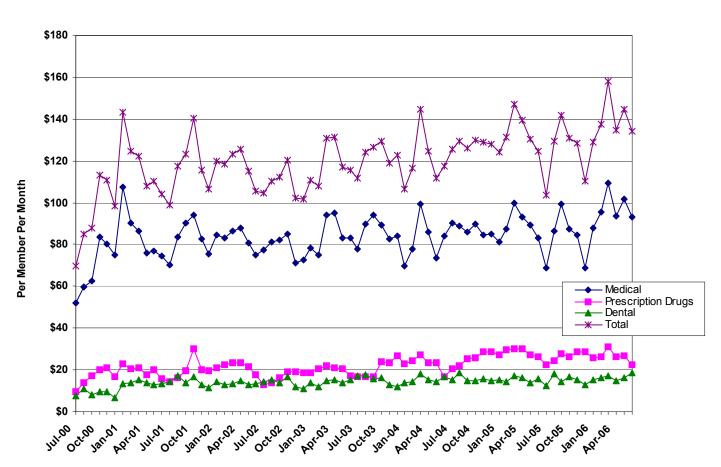

### **CLAIM COST AND TREND ANALYSIS**

We have continued to utilize the trend assumptions from the March 31, 2006 Quarterly Report. These trends are 8% for Medical claims, 7% for Dental claims, and 19% for Prescription Drugs Claims.

The most recent experience remains favorable compared to our trend assumptions. As we review trends over different time periods, the 12 months analysis reflects lower overall trend than the 6 months and 9 months analysis. The table below summarizes WV CHIP experience over the last 6 months, 9 months and 12 months as of June 30, 2006. Overall trend experience has been favorable, with a composite trend of 1.1% over the last 12 months. Note that Prescription Drugs trends are before consideration of drugs rebates.

| Trend Period       | 6 Months     | 9 Months     | 12 Months    |
|--------------------|--------------|--------------|--------------|
| Medical            | 8.9%         | 3.6%         | 1.8%         |
| Dental             | 5.8%         | 4.2%         | 1.2%         |
| Prescription Drugs | <u>-6.9%</u> | <u>-4.3%</u> | <u>-1.2%</u> |
| Composite          | 5.1%         | 2.0%         | 1.1%         |

The following chart summarizes incurred claims on a per member per month ("PMPM") basis for the major categories of Medical, Dental and Prescription Drugs based on information received through June 2006. The attachment at the end of this report shows the trends for Phase II and Phase III and an average for the same three categories.

#### West Virginia CHIP - Monthly Cost

Detailed claim trends for Medical, Dental and Prescription Drugs are summarized in the Attachment found at the end of the report. The trends for each of the three categories are relatively flat over the six years period.

# FINANCIAL PROJECTION – STATE FISCAL YEARS 2006-2012

Under the Baseline Scenario with the prescription drugs formulary changes effective beginning January 2006 and West Virginia Governor's recommended FY 2007 State funding of \$10,966,703, the updated incurred claims for FY 2006 is projected to be \$40,139,401 based on expected enrollment of 24,697 children and projected incurred claim per member per month cost data assumption of \$135.44, as summarized in the following table. In the March 31, 2006 Quarterly Report, the incurred claims for FY 2006 were projected to be \$40,899,992 based on expected enrollment of 24,707 children and projected incurred claim per member per month cost data assumption of \$137.95.

| <u>Category</u>    | FY 2006<br>Baseline<br>Incurred<br><u>Claims</u> | FY 2006<br>Baseline<br>Per Member<br><u>Per Month</u> | 3/31/06 Report<br>FY 2006 Baseline<br>Per Member<br><u>Per Month</u> | 12/31/05 Report<br>FY 2006 Baseline<br>Per Member<br>Per Month |
|--------------------|--|---|--|--|
| Medical            | \$27,311,409                                     | \$ 92.16  | \$ 94.40   | \$ 90.62   |
| Prescription Drugs | 8,046,097  | 27.15   | 27.16  | 27.86  |
| Dental             | 4,781,895  | <u>16.14</u>  | <u>16.40</u>   | 16.27  |
| Total              | \$40,139,401                                     | \$135.44  | \$137.95   | \$134.75   |

The Baseline Scenario financial forecast for the Federal and State fiscal years 2006 through 2012 can be found in Appendix A. Based on the Baseline Scenario, we are projecting a shortfall in the ending reserve of State funding to reach the 90% funding requirement in FY 2012; and projecting that the Program will need additional Federal funding beginning in FY 2009.

The Expansion Scenario financial forecast for the Federal and State fiscal years 2006 through 2012 can be found in Appendix B. Based on the Expansion Scenario, we are projecting a shortfall in the ending reserve of State funding to reach the 90% funding requirement in FY 2011 and FY 2012; and projecting that the Program will need additional Federal funding beginning in FY 2009.

Appendix A and B contains a seven-year projection period as requested by CHIP management. The first section of the report is the beginning balances of both Federal and State funding sources. The middle section of the report projects and reports on incurred claim, paid claim and administrative expenses, as well as expected Interest earnings and accrued prescription drugs rebates. This section also projects Federal and State shares of paid expenses, as well as incurred but not received ("IBNR") claim liabilities. The last section of the report projects the ending balances of both Federal and State funding sources.

Based on the assumptions developed under Baseline Scenario, we are forecasting a shortfall in State funding and reaching the 90% funding requirement in FY 2012, and projecting a shortfall in Federal funding of approximately \$14,155,000 in FY 2009, \$26,902,000 in FY 2010, \$32,150,000 in FY 2011 and \$38,068,000 in FY 2012, compared to the previous projection of Federal funding deficits of approximately \$1,758,000 in FY 2008, \$23,063,000 in FY 2009 and \$27,805,000 in FY 2010 from the March 31, 2006 Quarterly Report.

It should be noted that the Federal Government has not provided projections of expected Federal funding in the final years of the projection and these estimates are subject to change. This projection includes the Federal FY 2001 and FY 2002 Redistribution. Our forecast includes the remaining \$4,867,172 of the total \$12,081,320 of FY 2001 Redistribution and the total \$3,895,443 of FY 2002 Redistribution is spent in the current fiscal year.

Appendix C summarizes the original and restated IBNR claim liabilities for the CHIP Program in Fiscal Year 2004 to 2006. IBNR projections have been recently higher to reflect current claim experience as illustrated.

#### STATEMENT OF ACTUARIAL OPINION

I, Dave Bond, Managing Partner of CCRC Actuaries, LLC hereby certify that I am a Fellow of the Society of Actuaries and a Member of the American Academy of Actuaries. I meet the actuarial qualification standards to render Statements of Actuarial Opinion for Children Health Insurance Program and other self-insured entities. I have been retained by CHIP to render a Statement of Actuarial Opinion regarding the methods and underlying assumptions developed and used in this analysis.

This Statement of Actuarial Opinion was prepared in a manner consistent with the Code of Professional Conduct and Qualification Standards of the American Academy of Actuaries, and the Standards of Practice of the Actuarial Standards Board. Concerning the projection of health care expenses, I am of the opinion that the data and assumptions used are appropriate.

In my opinion, all estimated program and administrative costs of the agency under the plan, including incurred but unreported claims, will not exceed 90 percent of the funding available to the program for the future fiscal years 2007 through 2011 based on current enrollment under the Baseline Scenario.

It should be noted that this opinion is based on State funding levels as illustrated in Appendix A and FY 2007 through FY 2012 have not been appropriated by the West Virginia Legislature.

December 1, 2006

Ms. Sharon Carte Director West Virginia Children's Health Insurance Program State Capitol Complex, Building 3, Room 554 Charleston, WV 25305

> Subject: West Virginia Children's Health Insurance Program -Review of Experience

#### Dear Sharon:

CCRC Actuaries, LLC was engaged by the management of West Virginia Children's Health Insurance Program ("CHIP Program") to assist the West Virginia CHIP Board in the analysis of actual and projected plan experience and review the claim experience through October 2006. We conclude that the plan will continue to meet the statutory requirement of 10% reserve in FY 2007 based on the updated information.

It is noteworthy that we are not projecting a shortfall in State funding based on funding levels provided by CHIP management. After the September 30, 2006 Quarterly Report was issued in October 2006, several changes have occurred in the program:

- Enrollment for the CHIP Program as of October 2006 was at one of the highest level since its inception. Overall enrollment for the CHIP Program as of October 2006 was 25,383;
- October 2006 claim experience showed the projected incurred FY 2007 expenditure to be \$44,585,702, a slight decrease of \$835,845 from \$ 45,421,547 in the September 30, 2006 Quarterly Report.

The categories of FY 2007 medical, dental and prescription drug expenses in the current claim experience through October 2006 showed slight improvement over the September 30, 2006 Quarterly Report. Medical PMPM for Fiscal Year 2007 was projected to be \$93.31, down from \$94.72 in the September 30, 2006 Quarterly Report. Plan Dental costs for Fiscal Year 2007 were projected to be \$16.23 on a PMPM basis, slightly down from \$16.86 in the September 30, 2006 Quarterly Report. Prescription Drugs PMPM for Fiscal Year 2007 was projected to be \$28.32, again, slightly down from the projected \$28.46 PMPM cost in the September 30, 2006 Quarterly Report.

The management of the CHIP Program provided the medical, dental and prescription drugs claim lag data, along with the program enrollment. I had reviewed the recent projections based on the gradually increasing enrollment and utilized our trend assumptions with the claim lag data. Actuarial methods, considerations and analyses relied on in forming my opinion conforms to the appropriate standard of practice as promulgated by the Actuarial Standards Board.

Please review this information and if you have any questions or comments about this letter, please feel free to call me at (410) 833-4220.

Sincerely,

Dave Bond, F.S.A., M.A.A.A.

Managing Partner

Dave Bond

#### PROGRAM OUTREACH AND HEALTH AWARENESS

#### A Continuing Community Partnership

WVCHIP has worked with all types of partners and entities as identified in its State Plan, however, as enrollment has stabilized the focus has evolved toward health awareness and prevention campaigns, such as childhood health screening, immunizations and the importance of a medical home.

#### A Targeted Approach

Based on survey data from "Health Insurance in West Virginia," WVCHIP continues to prioritize outreach efforts to fifteen (15) counties (shown on Page 37) of the State with either higher numbers or percentages of uninsured children. The impact of these efforts can be seen in the Statistical Section in Tables 9 and 10 (shown on Pages 46 and 47).

#### Public Awareness

WVCHIP continues to make application and program information available through its Call Center which averages about 2,000 calls a month, through its website at <a href="www.wvchip.org">www.wvchip.org</a>, and through community exhibits, as well as being a sponsoring partner for conferences such as the "Growing Healthy Children" Forum held in November 2005 and again in November 2006.

#### Child Health Screenings for Kindergarten

In a major collaborative effort with the Department of Education's Office of Healthy Schools and DHHR's Office of Infant, Child, and Adolescent Health, WVCHIP sponsored a statewide survey in 2005. The results are reported in a document titled "Health Screening of West Virginia Children for Kindergarten Entry in School Year 2004 – 2005" (also available at <a href="www.wvchip.org">www.wvchip.org</a> and at <a href="http://wvde.state.wv.us/osshp/main/">http://wvde.state.wv.us/osshp/main/</a>). Results were shared with West Virginia's Chapter of American Academy of Pediatricians and were also highlighted as part of the "Healthy Kids, Healthy Schools Report 2006" released in October 2006. In 2006, after reporting these results, the Office of Healthy Schools began a process of standardizing the types of instruments and various screens used for kindergarten entry as required under law.

### Reducing Emergency Department Usage Project in Cabell County

In 2006, WVCHIP began collaborating with the United Way of the River Cities to implement a project in Cabell County for low-income Spanish speaking families. "What to do When Your Child is Sick" project is designed to help parents learn to be more confident in avoiding unnecessary emergency room visits. This effort is based on the UCLA pilot project in which parents reported a 50% decrease in emergency room visits after having this training. The United Way of the River Cities will implement training using a key textbook titled "What to Do When Your Child Is Sick" by in-home parent support groups versus center based parent training sessions. WVCHIP will provide the textbooks used in the project.

#### A Faith-Based Emphasis

The faith community plays a vital role in supporting families and nurturing the development of children, by integrating faith, access to care and health of the whole person. Health ministries, parish nurse programs, congregations and other faith-based organizations are getting actively involved in tending directly to the health concerns of their members and the large community. Faith organizations sponsor programs such as childcare centers, food pantries and summer camps must attend to the insistent problems children face.

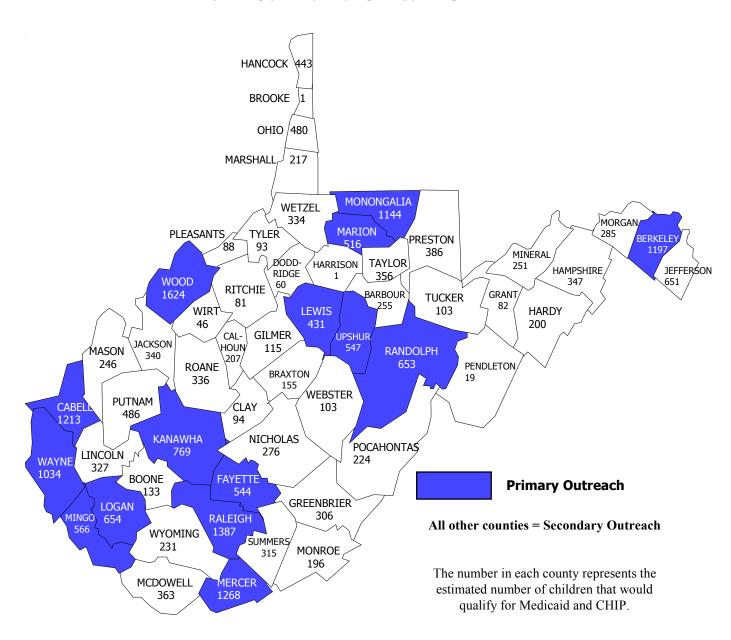

For this reason, WVCHIP collaborates with the faith community in an effort to educate and support families in obtaining health care coverage and promoting healthy lifestyles. In fiscal year 2006, WVCHIP revised its church bulletin flyer and made it available to all congregations in West Virginia.

#### Collaborative Initiatives

In 2004, WVCHIP began working with several State agencies and community health programs as a way to refocus WVCHIP's outreach efforts as a leader in health prevention and promoting a healthy lifestyle. Collaborations are important to allow multiple agencies and entities inside and outside state government to integrate efforts related to a statewide mission for to the health of West Virginia's children. WVCHIP prioritizes its prevention efforts to support our State's Healthy People 2010 objectives for children. Initiatives for 2006 included:

- · WVCHIP continued partnership efforts to promote healthy lifestyles with the West Virginia Immunization Network, Action for Healthy Kids Coalition, West Virginia Asthma Coalition and the Medical Advisory Council.
- · WVCHIP joined with DHHR's Office of Infant, Child and Adolescent Health to promote full periodic and comprehensive well child visits recommended by pediatricians in a "HealthCheck" Campaign. Health messages focusing on vision, dental, development and hearing screenings appeared in *Child Care Provider Quarterly* Magazine.
- · The West Virginia Immunization Network and the State's Immunization Program and WVCHIP began working last year on strategies to implement an immunization campaign targeting adolescents.
- WVCHIP provided flyers and <u>ABC's of Baby Care</u> to include in Day One Packets for distribution to all new mothers at participating West Virginia hospitals.
- WVCHIP materials were included in the State's Immunization Program packets to new mothers through the Right from the Start Coordinators.

#### TARGETED OUTREACH FOR UNINSURED CHILDREN

(Chart developed by the WVCHIP for outreach purposes based on data from "Health Insurance in West Virginia: The Children's Report" - a 2001 survey by The Institute for Health Policy Research at the West Virginia University Robert C. Byrd Science Center)

# Most important school supply? - A Healthy Smile

Make sure your child's dental health is "school-ready"

- ✓ **Have their first dental check-up by their first birthday** as recommended by the American Dental Association
- ✓ **Yearly HealthCheck exams:** a complete well-child check-up with vision, hearing, dental screens and other developmental checks right for her age and stage by her pediatrician or family doctor
- ☑ Brushing and flossing teeth daily helps keep your child's smile healthy

Helping your child be school-ready!

www.wvchip.org www.wvdhhr.org/mcfh/ICAH/healthcheck

# STATISTICAL SECTION

"I am a grandparent with two adopted granddaughters.

If it wasn't for CHIP, I don't have an answer
as to how I could get insurance for the two of them.

It is a wonderful program and I am greatly appreciative
for the fact it's there for my two grandchildren.

Thank you, CHIP!"

Comment from a WVCHIP family from the Customer Satisfaction Survey 2005 All statistics are for the fiscal year ended June 30, 2006, unless noted otherwise.

# THE HEALTH PLAN EMPLOYER DATA AND INFORMATION SET (HEDIS®) - TYPE DATA AS UTILIZED BY WVCHIP

HEDIS® is a set of standardized performance measures designed to ensure that purchasers and consumers have the information they need to reliably compare the performance of managed health care plans. However, many states are using HEDIS® to assess services delivered to both Medicaid and State Children's Health Insurance Program (SCHIP) beneficiaries to monitor program performance. Typically, the performance measures in HEDIS® are related to many significant public health issues for adults such as cancer, heart disease, smoking, asthma and diabetes. Child health measures may include preventive and well child visits, immunization status, access to primary care practitioners, dental visits and can include selected chronic conditions.

WVCHIP is utilizing HEDIS®-type measures that identify only those individuals with 12 months of enrollment whose treatment information can be included in calculations of measures assessing the level of services extracted from claims payment in a fee-for-service environment. For HEDIS® measures involving services or treatments delivered in set time frames (e.g., preventive services, screenings, well-care visits), managed care plan members must be enrolled for a minimum of 12 months, with no more than one break of 45 days, to be included in the calculation of the HEDIS® rate. For other measures, the required period of continuous enrollment varies. HEDIS® is sponsored, supported and maintained by the National Committee for Quality Assurance.

The following tables present HEDIS® results for WVCHIP enrollees during calendar year 2005 (See Tables 14 - 20).

#### **Note on Immunizations:**

WVCHIP is unable to report a HEDIS® measure for all children receiving the recommended combinations of immunizations prior to age three. This is a combined result of the relatively few children covered by WVCHIP between birth to two years (since children in households with incomes up to 150% FPL are covered by Medicaid and since HEDIS® data only counts those children enrolled for 12 months of a calendar year). For this reason the HEDIS® measure is not particularly meaningful for participants in WVCHIP and has been deleted. For other data of available immunizations for children covered by WVCHIP (including the HEDIS® age group), please see Table 25.

#### SELECTED UTILIZATION DATA AS HEALTH STATUS INDICATORS

WVCHIP currently operates exclusively in a fee-for-service payment structure. The data in Tables 21 - 25 reflect preventive services as extracted from claims payments. The selected preventive services are:

- → Vision
- → Dental
- → Well Child Visits
- → Access to Primary Care
- → Immunizations

Unlike the HEDIS®-type data in the preceding Tables 14 - 20, the health status indicator data reflects services for all WVCHIP enrollees whether they are enrolled for one month or twelve months in the annual measurement period. Also, it captures more specific data for the entire population, which may not be captured in a HEDIS® measure. (e.g. the HEDIS® child immunization measure is specific to a required combined set of several immunizations over a two year period for two year-olds resulting in a "0" measure, whereas the selected immunization data reflect more detail.)

The advantage of having separate HEDIS®-type measures is to allow comparison among managed health care plans and with other states' CHIP or Medicaid programs.

# TABLE 26: TOP TEN PHYSICIAN SERVICES By Amounts Paid

### **CPT CODE DESCRIPTION**

- 1 Office/Outpatient Visits Limited: for an established patient taking about 15 minutes or less of face-to-face time with patient and/or family for problems with low to moderate severity; requires 2 of 3 key components: an expanded problem focused history and examination and medical decision making of low complexity (CPT 99213)
- 2 Individual Psychotherapy: requiring a face-to-face visit with a therapist for insight oriented, behavior modifying and/or supportive therapy for 45 to 50 minutes (CPT 90806)
- 3 Office/Outpatient Visits Intermediate: for an established patient taking about 25 minutes of face-to-face time with the patient and/or family for problem(s) of moderate to high severity; 2 of 3 required visit components are a detailed history and examination and medical decision making of moderate complexity (CPT 99214)
- 4 ER Department Visit Intermediate: requiring 1) an expanded problem-focused history; 2) an expanded problem focused examination; and 3) medical decision making of moderate complexity usually for a problem of moderate severity (CPT 99283)
- 5 Office/Outpatient Visits Brief: for an established patient taking about ten minutes or less of face-to-face time with patient and/or family for self limiting or minor problems; 2 of 3 required visit components are a problem focused history and examination and straightforward medical decision making (CPT 99212)
- 6 ER Department Visit Extended: requiring 1) a detailed history; 2) a detailed examination; and 3) medical decision making of moderate coplexity usually when urgent evaluation is needed for a problem of high severity (CPT 99284)
- 7 Periodic Comprehensive Wellness Exam Age 5-11: An age and gender specific preventive medical exam that includes appropriate history, exam, any needed counseling/anticipatory guidance/risk factor reduction interventions as well as ordering of appropriate immunizations and laboratory tests for an established patient. These exams are coded to the correct age/stage period and are guided by criteria established by the American Academy of Pediatrics (CPT 99393)
- 8 Psychiatric Diagnostic Interview: an examination which includes a history, mental status, and a disposition; may include communication with family or other sources, ordering and interpreting other medical or diagostic studies (CPT 90801)
- 9 Periodic Comprehensive Wellness Exam Age 1-4: An age and gender specific preventive medical exam that includes appropriate history, exam, any needed counseling/anticipatory guidance/risk factor reduction interventions as well as ordering of appropriate immunizations and laboratory tests for an established patient. These exams are coded to the correct age/stage period and are guided by criteria established by the American Academy of Pediatrics (CPT 99392)
- 10 Ophthalmological Service: for an established patient at an intermediate level in a face-to-face encounter by the physician for a general evaluation of the complete visual system including history, general medical observation, external and ophthalmological examinations, gross visual fields and basic sensorimotor examination. It need not be performed all in one session (CPT 92014)
