

WEST VIRGINIA OFFICE OF MEDICAL CANNABIS

Biennial Report 2021

Office of Medical Cannabis Biennial Report 2021

In accordance with the West Virginia Medical Cannabis Act (“Act”), West Virginia Code §16A-10-5, the West Virginia Department of Health and Human Resources, Bureau for Public Health, Office of Medical Cannabis (OMC) is required to prepare a report every two years, and include the following information:

- An assessment of the use of medical cannabis as a result of the Act;
- An assessment of the benefits and risks to patients using medical cannabis under the Act, including adverse events; and
- Recommendations for amendments to the Act for reasons of patient safety or to aid the general welfare of the citizens of this state.

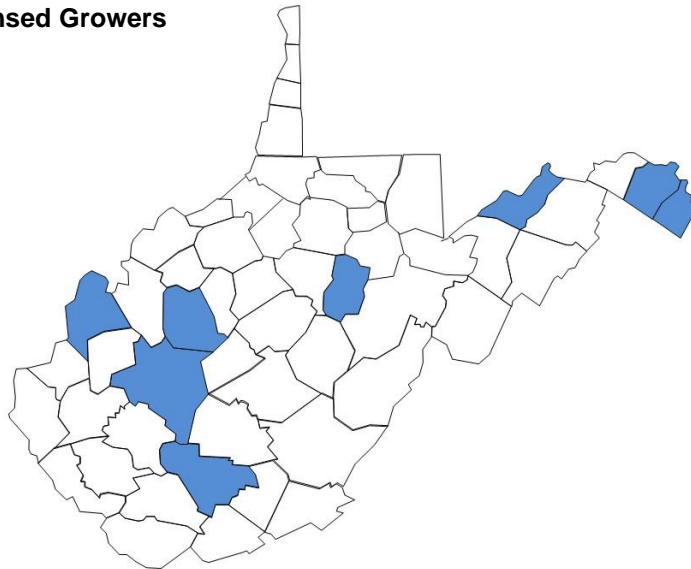

Assessment of the use of medical cannabis as a result of the Act.

The medical cannabis program has been limited by the Act to 10 grower permits, 10 processor permits, and up to 100 dispensary permits. Following the rigorous application procedure, OMC employed scoring teams to consider applications and provide recommendations to an awards team, which determined the issuance of permits.

On October 2, 2020, OMC issued medical cannabis grower permits. Out of 44 grower applications received, 10 permits were awarded to the following successful applicants:

Grower permittees will cultivate medical cannabis plants before they are processed into allowable forms of cannabis for patient use. In accordance with the Act and applicable rules, the allowable forms of cannabis for patient use are: pill; oil; topical forms including gels, creams and ointments; a form medically appropriate for administration by vaporization or nebulization; dry leaf or plant form; tincture; liquid; and dermal patch.

On November 13, 2020, OMC issued medical cannabis processor permits to 10 successful applicants. Processor permittees will process medical cannabis plant material into allowable forms and distribute to permitted dispensaries for purchase by certified patients. Out of 41 processor applications received, 10 permits were awarded to the following successful applicants:

Research relating to the benefit and/or risks associated with medical cannabis will be undertaken and reported by OMC once medical cannabis is in use by patients. OMC will develop a research program in collaboration with academic institutions to study the benefits and risks associated with the use of medical cannabis.

Recommendations for amendments to the Act for reasons of patient safety or to aid the general welfare of the citizens of this state.

Recommendations regarding changes to the Act related to patient safety or the general welfare of the citizens of this state will be assessed when data becomes available.
