

ANNUAL CHILD CARE REPORT

Federal Fiscal Year 2022 (10/1/2021 - 09/30/2022)

Introduction

Quality child care can be achieved with consistent, basic health and safety practices in place. West Virginia strives to maintain basic health and safety standards in programs that care for children ages six weeks through 12 years, or through age 18 if the child has a special need.

The West Virginia Code requires that child care programs be either licensed or certified, depending on size. During federal fiscal year (FFY) 2022, there were 1,391 childcare providers throughout the state with a potential to serve 42,722 children ages six weeks through 12 years, ranging from small family childcare homes to large childcare centers.

This document serves as the annual report to the Governor and the Legislative Oversight Commission on Health and Human Resources Accountability regarding licensed child care centers to meet the requirements of W. Va. Code §49-2-123. The report covers FFY 2022 and reflects information regarding all childcare provider types opened or closed during this time period as can best be determined by the West Virginia Department of Health and Human Resources' Families and Children Tracking System (FACTS) Daycare Provider Annual Report (DAY-5230) generated report, hand-tallied monthly reports, and the FACTS system in general.

Provider Types

A **Family Child Care Home** is home-based care provided for a portion of the day in a private family home for compensation. The home must be inhabited by the family/individual that is providing care, and the provider's hours of operation may not exceed 18 hours in a 24-hour period. W. Va. Code §49-2-113(d) requires that care provided in a family childcare home for 4-6 children must be regulated. W. Va. Code §49-2-113(g) exempts from state regulatory requirements **Informal Family Child Care** providers and **Relative Family Child Care** providers, unless the family childcare provider chooses to receive subsidy payments through the child care certificate system. An Informal Family Child Care provider cares for less than four children and a Relative Family Child Care provider care for related children only.

A **Family Child Care Facility** provides care for 7-12 children. The Family Child Care Facility may care for a maximum of 12 children, including children residing in the home under the age of six, with no more than four children under the age of 24 months. Facility care may be in the operator's home or in a facility not inhabited by the provider.

A **Child Care Center** serves 13 or more children, four or more hours per day, and is open for more than 30 days per year per child. Exceptions to this requirement include programs offering sessions not exceeding four hours per day per child such as kindergarten through grade 12 education programs, West Virginia Pre-K classrooms operated by a county board of education in a public-school setting, and any other kindergartens, preschools or school-age programs with

sessions not exceeding four hours per day per child. In addition, an individual or facility that offers occasional care of children for brief periods such as the attendance of a religious service or engagement in recreational activities is exempt from licensure. Some Head Start programs require licensure because they meet the definition of a childcare center.

Out-of-School Time programs offer activities to school-age children before and/or after school, on school holidays, when school is closed because of an emergency, and on school calendar days set aside for teacher activities.

COVID-19 Pandemic

The COVID-19 pandemic has greatly affected child care. The West Virginia requirement to register operating childcare programs as a Critical Care site will end as of January 1, 2023, along with the requisite to follow the recommendations set forth by the Centers for Disease Control and Prevention for childcare providers.

Child care operations remained steady from October 1, 2021, through September 30, 2022 with 99% of programs in operation September 30, 2022. On October 1, 2021, there were 1,349 open childcare providers compared to 1,391 on September 30, 2022, an increase of 3.11%.

Virtual learning did not have a significant impact on child care in West Virginia. Capacity expansion adjustments assisted providers with accommodating virtual learning schedules for school age children without a decrease in available slots for school-age children. School-age providers were able to accommodate virtual learning on-site.
