4 the health, safety and general welfare of its people; that improper land-use practices have caused  
5 and have contributed to, and are now causing and contributing to, a progressively more serious  
6 erosion of the farm and grazing lands of this state by water; that the breaking of natural grass,  
7 plant, and forest cover has interfered with the natural factors of soil stabilization, causing  
8 loosening of soil and exhaustion of humus and developing a soil condition that favors erosion;  
9 that the topsoil is being washed out of fields and pastures; that there has been an accelerated  
10 washing of sloping fields; that these processes of erosion by water and flooding is increased with  
11 removal of absorptive topsoil, causing exposure of less absorptive and less protective but more  
12 erosive subsoil; that failure by any landowner to conserve the soil and control erosion upon his  
13 lands causes a washing of soil and water from his or her lands onto other lands and makes the  
14 conservation of soil and control of erosion of such other lands difficult or impossible and increases  
15 the potential damages from flooding.

16 (b) That the consequences of such soil erosion in the form of soil washing are the silting  
17 and sedimentation of stream channels, reservoirs, dams, ditches, and harbors; the piling up of  
18 soil on lower slopes and its deposit over alluvial plains; the reduction in productivity or outright  
19 ruin of rich bottom lands by over-wash of -poor subsoil material, sand and gravel swept out of the  
20 hills; deterioration of soil and its fertility, deterioration of crops grown thereon and declining acre  
21 yields despite development of scientific processes for increasing such yields; loss of soil and  
22 water which causes destruction of food and cover for wildlife; the washing of soil into streams

23 which silts over spawning beds and destroys water plants, diminishing the food supply of fish; a  
24 diminishing of the underground water reserve which causes water shortages, intensifies periods  
25 of drought and causes crop failures; an increase in the speed and volume of rainfall runoff,  
26 causing more severe and more numerous floods which bring suffering, disease, and death;  
27 impoverishment of families attempting to farm eroding and eroded lands; damage to roads,  
28 highways, railways, farm buildings, and other property from floods; and losses in navigation,  
29 hydroelectric power, municipal water supply, irrigation developments, farming, grazing and  
30 reduction of suitable land available for homes and businesses.

31 (c) That to conserve soil resources and control and prevent soil erosion and prevent  
32 floodwater and sediment damage and further the conservation, development, utilization, water  
33 quality, and disposal of water, it is necessary that land-use practices contributing to soil wastage  
34 and soil erosion be discouraged and discontinued and appropriate soil-conserving land-use  
35 practices and works of improvement for flood prevention or the conservation, development,  
36 utilization, water quality, and disposal of water be adopted and carried out; that among the  
37 procedures necessary for widespread adoption are engineering operations such as the  
38 construction of terraces, terrace outlets, dams, desilting basins, floodwater retarding structures,  
39 channel improvements, floodways, dikes, ponds, ditches, and the like; the utilization of strip  
40 cropping, lister furrowing, contour cultivating and contour furrowing; land drainage; land irrigation;  
41 seeding and planting of waste, sloping, abandoned or eroded lands with water-conserving and  
42 erosion-preventing plants, trees and grasses; forestation and reforestation; rotation of crops; soil  
43 stabilization with trees, grasses, legumes, and other thick-growing, soil-holding crops; retardation  
44 of runoff by increasing absorption of rainfall; and retirement from cultivation of steep, highly  
45 erosive areas and areas now badly gullied or otherwise eroded.

46 (d) It is hereby declared to be the policy of the Legislature to provide for the conservation  
47 of the soil and soil resources of this state, for the control and prevention of soil erosion, for the  
48 prevention of floodwater and sediment damage and for furthering the conservation, development,

49 utilization, water quality, and disposal of water, and thereby to preserve natural resources, control  
50 floods, prevent impairment of dams and reservoirs, assist in maintaining the navigability of rivers  
51 and harbors, preserve wildlife, protect the tax base, protect public lands, and protect and promote  
52 the health, safety, and general welfare of the people of this state.

53 (e) This article contemplates that the incidental cost of organizing conservation districts  
54 will be borne by the state, while the expense of operating the districts so organized will be provided  
55 by donations, gifts, contributions, grants, and appropriations, in money, services, materials, or  
56 otherwise, from the United States or any of its agencies, from the State of West Virginia or from  
57 other sources, with the understanding that the owners or occupiers will contribute funds, labor,  
58 materials, and equipment to aid in carrying out erosion control measures on their lands.

6 conservation, development, utilization, water quality, and disposal of water and the preventive  
7 and control measures needed to publish the results of such surveys, investigations, or research  
8 and to disseminate information concerning such preventive and control measures and works of  
9 improvement: *Provided*, That in order to avoid duplication of research activities, no district shall

77 to make and, from time to time, amend and repeal rules and regulations not inconsistent with this  
78 article to carry into effect its purposes and powers;

79 (11) As a condition to this extending of any benefits under this article to, or the  
80 performance of work upon, any lands, the supervisors may require contributions in money,  
81 services, materials or otherwise to any operations conferring such benefits and may require land  
82 occupiers to enter into and perform such agreements or covenants as to the permanent use of  
83 such lands as will tend to prevent or control erosion and prevent floodwater and sediment damage  
84 thereon;

85 (12) No provisions with respect to the acquisition, operation, or disposition of property by  
86 other public bodies shall be applicable to a district organized hereunder in its acquisition,  
87 operation and disposition of property unless the Legislature shall specifically so state;

98 construct, improve, operate or maintain thereon or therewith works of improvement.

**ARTICLE 25. LIMITING LIABILITY OF LANDOWNERS.**

**§19-25-1. Purpose.**

1 The purpose of this article is to encourage owners of land to make available to the public

3 agricultural, or wildlife propagation purposes by limiting their liability for injury to persons entering  
4 thereon and for injury to the property of persons entering thereon and limiting their liability to

3 purposes, or to give any warning of a dangerous or hazardous condition, use, structure, or activity  
4 on such premises to persons entering for such purposes.

5 (b) Subject to the provisions of §19-25-4 of this code, an owner of land who either directly  
6 or indirectly invites or permits without charge as that term is defined in §19-25-5 of this code, any  
7 person to use such property for recreational or wildlife propagation purposes does not thereby:

8 (1) Extend any assurance that the premises are safe for any purpose;

9 (2) Confer upon such persons the legal status of an invitee or licensee to whom a duty of  
10 care is owed; or

11 (3) Assume responsibility for or incur liability for any injury to person or property caused  
12 by an act or omission of such persons.

14 or permits without charge, as that term is defined in §19-25-5 of this code, any person to enter  
15 onto the owner's land for the purpose of utilizing the owner's land for any agricultural purpose  
16 does not thereby:

17 (1) Extend any assurance that the premises are safe for any purpose;

18 (2) Confer upon such persons the legal status of an invitee or licensee to whom a duty of  
19 care is owed; or

20 (3) Assume responsibility for or incur liability for any injury to person or property caused

32 surface in the conduct of underground coal mining as governed by that article and any rules  
33 promulgated because of the article, which ponds, structures, or impoundments are designated  
34 and certified in writing by the Director of the Division of Environmental Protection and the owner

## **ARTICLE 31. GUS R. DOUGLASS AGRICULTURAL CENTER AT GUTHRIE.**

### **§19-31-1. Establishing the name.**

1 The Guthrie center, currently owned by the Department of Agriculture, shall hereinafter be  
2 known as the Gus R. Douglass Agricultural Center at Guthrie.

**ARTICLE 35. FARMERS MARKETS.**

**§19-35-1. Legislative findings and purpose.**

1 (a) The Legislature hereby makes the following findings:

2 (1) Farmers markets are critical incubators for small farm and food businesses because  
3 they offer an inexpensive, accessible, entry-level market for reaching consumers directly, though  
4 research has shown that the average vendor makes only a nominal dollar amount in sales on any  
5 given market day;

6 (2) The number of farmers markets and the variety of products sold at farmers markets  
7 has increased significantly in the past 10 years, adding millions of dollars to the state's economy;

8 (3) Encouraging locally grown and raised food is important to the health and welfare of the  
9 citizens of West Virginia;

10 (4) Permit fees and requirements for farmers market vendors can vary widely from county  
11 to county and from one regulatory official to the other. Current food permit categories are not  
12 designed for farmers markets and their vendors, but rather for restaurants, grocery stores, or  
13 concessioners; and

14 (5) Food permits required for farmers market vendors are currently not recognized across  
15 county lines.

16 (b) It is the purpose of this article:

17 (1) To reduce barriers on participants producing, preparing, and selling certain foods at  
18 farmers markets and elsewhere within West Virginia;

19 (2) To place regulation of farmers markets, vendors, and local food producers primarily  
20 within the Department of Agriculture; and

21 (3) To encourage the growth of the local food industry in West Virginia.

10 Department of Agriculture.
