**Eng. Com. Sub. for Senate Bill No. 7, Requiring CPR and care for conscious choking instruction in public schools.**

On motion of Senator Carmichael, the message on the bill was taken up for immediate consideration.

The following House of Delegates amendments to the bill were reported by the Clerk:

On page two, by striking out everything after the enacting section and inserting in lieu thereof the following:

**ARTICLE 2. STATE BOARD OF EDUCATION.**

**§18-2-9. Required courses of instruction.**

(a) In all public, private, parochial and denominational schools located within this state, there shall be given prior to the completion of the eighth grade at least one year of instruction in the history of the State of West Virginia. The schools shall require regular courses of instruction by the completion of the twelfth grade in the history of the United States, in civics, in the Constitution of the United States and in the government of the State of West Virginia for the purpose of teaching, fostering and perpetuating the ideals, principles and spirit of political and economic democracy in America and increasing the knowledge of the organization and machinery of the government of the United States and of the State of West Virginia. The state board shall, with the advice of the state superintendent, prescribe the courses of study covering these subjects for the public schools. It shall be the duty of the officials or boards having

authority over the respective private, parochial and denominational schools to prescribe courses of study for the schools under their control and supervision similar to those required for the public schools. To further such study, every high school student eligible by age for voter registration shall be afforded the opportunity to register to vote pursuant to section twenty-two, article two, chapter three of this code.

(b) The state board shall cause to be taught in all of the public schools of this state the subject of health education, including instruction in any of the grades six through twelve as considered appropriate by the county board, on: (1) The prevention, transmission and spread of acquired immune deficiency syndrome and other sexually transmitted diseases; (2) substance abuse, including the nature of alcoholic drinks and narcotics, tobacco products and other potentially harmful drugs, with special instruction as to their effect upon the human system and upon society in general; (3) the importance of healthy eating and physical activity to maintaining healthy weight; and (4) education concerning CPR cardiopulmonary resuscitation and first aid, including instruction in the care for conscious choking, and recognition of symptoms of drug or alcohol overdose. The course curriculum requirements and materials for the instruction shall be adopted by the state board by rule in consultation with the Department of Health and Human Resources. The state board shall prescribe a standardized health education assessment to be administered within health education classes to measure student health knowledge and program effectiveness.

(c) An opportunity shall be afforded to the parent or guardian of a child subject to instruction in the prevention, transmission and spread of acquired immune deficiency syndrome and other sexually transmitted diseases to examine the course curriculum requirements and materials to be used in the instruction. The parent or guardian may exempt the child from participation in the instruction by giving notice to that effect in writing to the school principal.

~~(c) Any person violating the provisions of this section shall be guilty of a misdemeanor and, upon conviction thereof, shall be fined not exceeding \$10 for each violation, and each week during which there is a violation shall constitute a separate offense. If the person so convicted occupies a position in connection with the public schools, that person shall automatically be removed from that position and shall be ineligible for reappointment to that or a similar position for the period of one year.~~

(d) After July 1, 2015, the required instruction in cardiopulmonary resuscitation in subsection (b) of this section shall include at least thirty minutes of instruction for each student prior to graduation on the proper administration of cardiopulmonary resuscitation (CPR) and the psychomotor skills necessary to perform cardiopulmonary resuscitation. The term “psychomotor skills” means the use of hands-on practicing to support cognitive learning. Cognitive-only training does not qualify as “psychomotor skills”. The CPR instruction must be based on an instructional program established by the American Heart Association or the American Red Cross or another program which is nationally recognized and uses the most current national evidence-based Emergency Cardiovascular Care guidelines and incorporates psychomotor skills development into the instruction. A licensed teacher is not required to be a certified trainer of cardiopulmonary resuscitation to facilitate, provide or oversee such instruction. The instruction may be given by community members, such as emergency medical technicians, paramedics, police officers, firefighters, licensed nurses and representatives of the American Heart Association or the American Red Cross. These community members are encouraged to provide necessary training and instructional resources such as cardiopulmonary resuscitation kits and other material at no cost to the schools. The requirements of this subsection are minimum requirements. A local school district may offer CPR instruction for longer periods of time and may enhance the curriculum and training components, including, but not limited to, incorporating into the instruction the use of an automated external defibrillator (AED): *Provided*, That any instruction that results in a certification being earned must be taught by an authorized CPR/AED instructor.;

(e) The commission shall adopt a rule requiring that all electric utilities provide a rebate or discount at fair value, to be determined by the commission, to customer-generators for any electricity generation that is delivered to the utility under a net metering arrangement. The commission shall assure that any net metering tariff does not create a cross-subsidization between customers within one class of service.

(b) (f) The commission shall also consider adopting, by rule, a requirement that all sellers of electricity to retail customers in the state, including rural electric cooperatives, municipally owned electric facilities or utilities serving less than thirty thousand residential electric customers in this state, offer net metering rebates or discounts to customer-generators.

(c) (g) The commission shall institute a general investigation for the purpose of adopting rules pertaining to net metering and the interconnection of eligible electric generating facilities intended to operate in parallel with an electric utility's system. As part of its investigation, the commission shall take into consideration rules of other states within the applicable region of the regional transmission organization, as that term is defined in 18 C.F.R. §35.34, that manages a utility's transmission system in any part of this state. Furthermore, the commission shall consider increasing the allowed kilowatt capacity for commercial customer-generators to an amount not to exceed five hundred kilowatts and for industrial customer-generators to an amount not to exceed two megawatts. The commission shall further consider interconnection standards for combined heat and power.

~~(d) The commission shall promulgate these rules within twelve months of the effective date of this article.~~

(h) An electric utility shall offer net metering to a customer-generator that generates electricity on the customer-generator side of the meter using alternative or renewable energy sources, on a first-come, first-served basis, based on the date of application for interconnection as provided in the rules promulgated by the commission and pursuant to a standard tariff. An electric utility may offer net metering to customer-generators, on a first-come, first-served basis, so long as the total generation capacity installed by all customer-generators is no greater than three percent (3%) of the electric utility aggregate customer peak demand in the state during the previous year, of which no less than one-half percent (0.5%) is reserved for residential customer-generators.

(i) The commission shall adopt a rule requiring compliance with the Institute of the Electrical and Electronics Engineers (IEEE), and as the same shall be amended, standards at all times, including having a disconnect readily accessible to the utility between the facilities of the customer-generator and the electric utility.
