December 22, 2021

West Virginia Department of Economic Development Office of Broadband Report to the Joint Committee on Government and Finance

Prepared by the West Virginia Office of Broadband December 22, 2021

1. West Virginia Broadband Infrastructure (WVBIP) Plan: Investing West Virginia's Funding under the American Rescue Plan Act (ARPA) Update

The West Virginia Department of Economic Development (WVDED), in coordination with the West Virginia Broadband Enhancement Council and the Office of Broadband, has officially launched three grant programs to utilize funding under the American Rescue Plan Act (ARPA). The programs are part of the West Virginia Broadband Infrastructure Plan (WVBIP).

Governor Justice announced the State's bold broadband initiative on Friday, October 15, 2021. Learn more about the Governor's announcement here: https://governor.wv.gov/News/press-releases/2021/Pages/Gov.-Justice-announces-Billion-Dollar-Broadband-Strategy.aspx.

The Department has conducted WVBIP program specific webinars and has posted all program webinars, maps and programs resources to https://broadband.wv.gov/.

The WVBIP includes four separate programs, each designed to meet West Virginia's broadband development needs. Briefly, the proposed programs include:

- a. Line Extension, Advancement and Development (LEAD): Expansions of existing fiber and cable networks,
- b. GigReady: A state incentive for local governments and organizations to pool some of their ARPA allocations or other local funding,
- c. Major Broadband Project Strategies (MPBS): New networks or major expansions of existing networks, and
- d. *Wireless Internet Networks (WIN): Expansions or upgrades of existing fixed wireless networks

The application portal is now open for LEAD, GigReady and MBPS programs. The Office of Broadband is working with internet service providers and local organizations to develop applications for each program. LEAD applications will be accepted with three monthly submission deadlines on November 30, 2021, December 30, 2021, and January 31, 2022.

The application portal for Major Broadband Project Strategies (MBPS) opened on December 2, 2021. This application launch coincided with release of the MBPS Target Area Map.

*Wireless projects do not appear eligible for funding under current ARPA guidelines. The wireless program is being developed, following the allocation of \$10 million in State general revenue funding.

2. WVBIP LEAD Program Round 1 Application Summary*

Applications Received: 6
Total Projects: 15
Counties Included: 18
Total Addresses passed: 36,157

Targeted Addresses served (unserved locations to be covered):16,504

• New Fiber Miles: 1,699

• Addresses Passed per Mile of New Fiber: 16.6

TOTAL SUBMITTED PROJECT COSTS*

\$96,909.245

TOTAL PROPOSED MATCHING FUNDS* (private \$\$ pledged)

• \$40,637,942

TOTAL GRANT AMOUNT REQUESTED*

\$56,271,307

COUNTIES REPRESENTED*

• Pleasants, Ritchie, Upshur, Kanawha, Harrison, Ohio, Brooke, Monongalia, Marion, Taylor, Marshall, Morgan, Putnam, Hancock, Preston, Hardy, Doddridge, and Cabell

LEAD Scoring Factors

- Technical; Operational 50 points
- Technical; Financial 50 points
- Broadband Development Impact up to 50 points

3. Action Items

1. West Virginia Policy Concerning Bridge Attachments: Bridge Attachments are governed by the WVDOH Utility Manual, available at the following link:

https://transportation.wv.gov/highways/engineering/files/ACCOMMODATION_OF_UTILITIE S.pdf

(Confirmed that link is active December 22, 2021.)

^{*}Based upon preliminary analysis and subject to revision upon final analysis.

JOINT COMMITTEE ON GOVERNMENT AND FINANCE

(Speaker Hanshaw)

December 6, 2021

5:00 p.m. - 6:00 p.m.

Senate	House
Blair, Chair	Hanshaw, Chair
Baldwin (absent)	Boggs
Plymale	Capito (absent)
Takubo (absent)	Householder (absent)
Tarr	Howell
Trump	Skaff
Weld	Summers

Speaker Hanshaw: "...today is approval of the minutes from our November 16th meeting. Those minutes are in all the members packets if you'll take a moment and review those draft minutes. Are there questions from any members about the draft minutes as presented in the meeting packets? If not, Chair recognizes President Blair."

President Blair: "Mr. Speaker...(inaudible)...approve the minutes of November 16th, 2021 for the meeting of the Joint Committee on Government and Finance as contained in the member packets be approved."

Speaker Hanshaw: "Question is on President Blair's motion that the draft minutes distributed in the member's packets for the November 16th, 2021 meeting of the committee be approved as distributed. Is there discussion on that motion? If not, those in

favor of the motion will please say aye. Those opposed to the motion will please say no. The ayes have it, that motion is adopted, those draft minutes are approved. Committee reports and requests to the committee? Chair is in receipt of no reports or requests. Let's begin with taking up our regular reports today. Secretary Carmichael!"

Secretary Carmichael: "Thank you Mr. Speaker, Mr. President, ladies and gentlemen of the committee. It's my pleasure to be before you again as we try to do every month to present the status of broadband deployment in West Virginia. First, let me say Merry Christmas as we approach the Christmas season and...!'ll be brief I know I probably normally take too much time but in terms of our challenges, you know, we have a lot of challenges in West Virginia in terms of our mountainous...in terms of deploying broadband, just want to set the stage for you...mountainous terrain, rural areas, low density. So, our costs are necessarily higher to deploy broadband in these areas. I wanted to...and this slide I'll make this all available to you...this is from the FCC mapping data where I just wanted to highlight for you the fact that in terms of our contiguous states and surrounding states, some very close to us, we rank nationally 48th in terms of broadband deployment. So, it is an area in which you...I would think would want to invest significant funds to improve. Obviously, internet's important right? You can have water or internet, which would you rather have? All right...both.

So, I wanted to give you a status of the funds that we're pulling down and talk just a little bit about that. First, federal applications \$95 million dollars in current applications, these are the ones that are pending. I won't belabor it but so that you can see we do have them categorized and identified as to the areas which they will be deployed. So those are our federal applications. The ones that have already been awarded federally are \$75

million dollars in USDA ReConnect, Community Connect, Distance Learning and Telemedicine, CAFII, and ARC grants. So, we have those already awarded and in various stages of deployment. I wanted to give you this slide to show you typically what...and some of our awards that I just highlighted, those USDA ReConnect awards...just to give you an idea of for instance the first one, USDA ReConnect for \$14 million dollars, it's 205 square miles, 2,500 locations, when you do the math its roughly \$5,600 dollars per location so keep those numbers in your mind as you move forward. One of our most expensive deployments is the AEP Logan Mingo project which hits you about \$6,600 but that gives you an idea of the scope of the issue in West Virginia. We've leveraged over \$100 million dollars in various matching achieved through local state partnerships and then...the RDOF awards, the various programs that we have in place in West Virginia.

So first, the Rural Digital Opportunity Fund and we've listed...there's roughly \$348 million dollars...you'll maybe notice that we're about \$13 million dollars short on the actual award which is the Starlink amount. We really don't anticipate that that'll be approved by the FCC for second round funding but if it is it'll go up by \$13 million dollars...and then you see the awardees, the private sector/local match as we deploy our programs will be roughly \$300 million, the Capitol Projects Fund allocated from the federal government is roughly \$136 million, USDA/ARC another 120, and then the State ARPA funds that you allocated in the last special session 90, and then the State General Revenue Funds, over a billion dollars that you have allocated to fix the broadband issue in West Virginia...so, you're to be commended for that commitment.

We have four programs in place to address the issues that confront West Virginia.

The LEAD program, that line extension program that we've talked about and I've

elaborated on in the past. The Major Broadband Strategies Program, the GigReady, and then the Wireless Internet Service. We've already opened up application portals for two of these and in particular...or I guess just one, right Kelly? That we've received applications for. By the way let me introduce Kelly Workman, if you haven't had an opportunity to meet her and work with her, she's amazing... I call her the First Lady of Broadband...and I'll talk about those LEAD applications that we've already received. So, these are the project launch dates, the target area maps, the webinar, we're conducting webinars on each program on a monthly basis, and they've been incredibly well attended, over a hundred participants in each one of the webinars. Our target areas...what you'll see when you go to the map, if you go to our portal broadbandwv.com you'll see these maps and now we have them categorized as targeted areas, which are absolutely the unserved unfunded areas in West Virginia. So, if you don't have 25/3 service in our state, you're in the targeted area, and that's the area that we're focused the money to deploy...and as you read about digital equity, all those other components that are factored in nationally for deployment of broadband, their overwhelming focus is to hit the ones, go to the areas that do not have it, and we said that very on...the legislature gave us that direction very early on and we've adhered to that.

Again, I don't want to...I know you have a busy agenda and it's December so...but this is the website where our providers can come in and apply for the grants. Just to give you an idea of how the portal looks and so forth and I'll just flip through some of these...these application performance portals. We use ZoomGrants, third party application, it's an incredible tool to help us stay on track in terms of where the money is

deployed, the status that it's in, and so forth...and then the estimated time frames for these rounds of deploying.

So, what we have in place now through the Capital Projects Fund that came from the federal government is...we've put them in these categories, \$25 million in LEAD, 40 in GigReady, 40 in Major Broadband, and 0 in Wireless because it does not qualify under federal guidelines for terrestrial gig service...but we've got a solution for that. The state legislature approved an additional 10 to the LEAD, 40 to the Gig, 40 to the Major, and then \$10 million for the wireless internet. We have not deployed that piece yet, the wireless internet...but it's something we want to explore to get to those areas that would otherwise take a very long time to get to. So, when you total it all up that's what it looks like.

I know this is an eye chart, but you'll have this in front of you, but I wanted to put this before you today to know that there is a scoring metrics in place. So, when we get these applications, they are scored by an independent third party that we've contracted with, Tilson, world renowned or at least nationally renowned for their expertise in broadband deployment and they score these projects based on these factors in the various categories. So, we had some questions recently by individual legislators about we want to see the metrics. This has been...and our scoring metrics has been...in all of our webinars. It's published data, it's on our website, but I just wanted you to see that we have it here available. The evaluation criteria, just to give you an overview of it is based on a technical criteria readiness to proceed which.... because we don't want to fund a program that somebody says in four years, we'll be ready to go...we score it and give it a score if you're ready earlier. Permitting, that includes things like permitting rights of

ways, easements, the things that you in the legislature have put in place to make it easier for people to expand broadband. Those dig once policies and things that have...and then also we really want to only fund gigabit service. Financial resilience, in other words when someone proposes a project, are they within the guidelines of you know roughly \$5,000 dollars, a home pass, a connection, those type things...we don't want to be...someone to be an outlier that's going to be \$20,000 dollars to get to this home, that kind of thing. So, those criteria factor into the decision metrics...and then the impact, we need to make sure we comport with digital literacy, geographic distribution, regional distribution, strategic partnerships, and relationship to the state plans that you've put forth. We have a very strong tool in place for monitoring and oversight, such that we want to make sure that when we, you know, provide funding to someone to enable internet that they actually got it and we can validate it with online tools that ensure that that speed was delivered.

Very excited about this slide, it's the first round of our LEAD application and as you saw earlier, we have roughly \$40 million dollars in that program and we have at this point over...and I'll get to all these...we have six applicants, so six different entities have already applied after the first two weeks. Has it been two weeks yet? Yeah, two weeks...I missed a week with COVID. We have fifteen different projects that effect thirteen different counties. Total addresses passed over 36,000...which is a good point, let me just focus in on that...a lot of you have been concerned about the fact that there's no competition in some of these areas for the providers, you know the best way to improve service is to give you a couple different options of a provider right? So, these...a lot of these homes in order to extend these networks, now these all have not been approved and evaluated and gone through the scoring metrics but just to give you an idea of the applications. Go

through certain areas that currently have service in order to get to an area that doesn't

have service. So, necessarily you create another level of competition, which is a great

thing. I think it's something that you have said to us in the past, you really want to see

more options. So, new miles of plant and equipment almost 1,700 and so addresses

passed per mile 16.6, and you can see the total projects submitted were \$96 million. The

providers have committed to supplying \$40 million dollars of private capital...and then

\$56 million dollars, almost \$57 million dollars of assistance either through state, federal,

other avenues. Now, I'm not saying all these will be approved, in fact I've looked at some

of them, I'm not sure you know that they would comply but that gives you an idea of the

interest in the program and the success of it. All these different counties are represented,

these thirteen different counties were affected and...questions and answers. I know you

are very busy but thank you and I will...I'm happy to answer any questions Mr. Chairman,

Mr. President."

Speaker Hanshaw: "Yes sir and we thank you."

Secretary Carmichael: "Yeah."

Speaker Hanshaw: "Delegate Summers."

Delegate Summers: "Thank you, Mr. Chairman. I have one question, when we

talked about the LEAD projects before you told me that individuals would go on and apply

so that then whatever companies were in their area would know that they wanted it. So,

you're talking about six applicants, I'm confused though, those are companies."

Secretary Carmichael: "Yeah."

Delegate Summers: "How are the people going to alert them to say, I need

service--"

Secretary Carmichael: "Through the speed—"

Delegate Summers: "My neighbor."

Secretary Carmichael: "Yeah."

Delegate Summers: "Remember?"

Secretary Carmichael: "Through the speed test. We have all the data now and

for...and by the way we promoted the online, you may have even gotten one, the speed

test data where you got a text message saying go online and check your speeds and so

forth but that's the best method for citizens to provide input is to show us whether or not

they have service. So, in terms if they want to connect with their local government

authorities or entities or so forth, they can do that but in terms of...we don't want

individuals...we don't think it's effective or efficient for individuals to apply for these funds

to extend the networks. I mean you know individuals aren't going to build the network, but

they need to make aware the providers in the area that can provide those services."

Delegate Summers: "So through the broadband.wv.gov--"

Secretary Carmichael: "Yes."

Delegate Summers: "--they'll do the speed test. Okay."

Secretary Carmichael: "The speed tests are there, and I would encourage you to

promote that locally within your...you know...social media groups and political

connections."

Delegate Summers: "Thank you."

Secretary Carmichael: "Yeah."

Speaker Hanshaw: "Delegate Boggs."

Delegate Boggs: "Thank you Mr. Speaker. Mr. Secretary, thank you for being

here. In the matrix that you discussed; you may have mentioned it but are there any

factors in there that factor into counties that are economically distressed?"

Secretary Carmichael: "Yes, the digital equity component of it is...that is an

incredible focus...is in fact every project that we approve, or the consultant approves will

have a metrics right beside it that shows per capita income of the census block for the

approval of that projects, it's an incredibly important component--"

Delegate Boggs: "Yeah I know that there's multiple ones in southern West

Virginia, I think we have eleven in central West Virginia and it's something I would hope

that would factor into it—"

Secretary Carmichael: "Absolutely."

Delegate Boggs: "—and also regarding the...I've had a lot of telephone calls

recently ever since the legislature...we put the other hundred million in...in special

session...wanting to know how they let people know that they're interested but a lot of

these people can't take the speed test because they don't have internet service so—"

Secretary Carmichael: "It's true."

Delegate Boggs: "So what do you—"

Secretary Carmichael: "There's a—"

Delegate Boggs: "---who do they call? What do they do?"

Secretary Carmichael: "--phone number, yeah."

Kelly Workman: "There's a phone number on broadband.wv.gov, I don't remember it right away, but you can pull that up, we can show it to you, and we can share it with you."

Secretary Carmichael: "Just so that everyone can hear on the streaming, if you go to the website or just call information for Broadband Council in West Virginia there's a phone number there that you can report your...and we try to return every one of those calls, we've gotten lots of calls saying exactly what you've said, is that I can't take a speed test you know because—"

Delegate Boggs: "Yeah I mean I've had probably twenty-five in the last week."

Secretary Carmichael: "Yeah."

Delegate Boggs: "I'm just beyond...you know we've talked years ago about people that are just outside of certain limits and they can't seem to get anyone to respond to help them hook up, but you know most of that service was substandard anyway—"

Secretary Carmichael: "Yeah."

Delegate Boggs: "---and if we're going to do at least at a minimum...but we've got to have a way to make sure that the folks that don't have it---"

Secretary Carmichael: "Yeah."

Delegate Boggs: "---aren't looking at one another saying well how can I take a speed test when I don't have any---"

Secretary Carmichael: "Right."

Delegate Boggs: "---don't have a car."

Secretary Carmichael: "Totally get...don't have a car...so we know the homes in

West Virginia, when you look at our map, we know who has broadband, who does not,

and all the money that we're spending is going to those who do not have it. We have...in

fact, some of the real interest is from Braxton County, I mean we've got a lot of activity

with people wanting to expand in Braxton County and it is just like you say, it's the ones

that do not have it that have contacted our office and we're designing programs for them."

Delegate Boggs: "Well if you would, one more thing Mr. Speaker, you mentioned

about the wireless, the component is not going to be eligible, but you know you may shift

some money over to that. If that's the case, is that wireless contemplated to be through

Starlink, through—"

Secretary Carmichael: "No."

Delegate Boggs: "---through cellular data networks or..."

Secretary Carmichael: "It's contemplated to be through a fixed wireless network

that would be...the devices will be on towers, not in satellite form. So, the towers that you

have in this state, that are state assets in many cases, the siren towers and so forth can

be deployed with fixed wireless devices that will reach a seven-mile radius with at least

25/3 service."

Delegate Boggs: "Well back twenty years ago, I know we did a thing with Gilmer

and Braxton County and we actually had a little thing inserted into the code where we

could utilize state towers if they would handle that. Of course, we didn't have any funding,

we were just trying to go from scratch, but we did deploy a little but not nearly enough...but

is it safe to assume that on some of those towers and in some of this wireless...because

number one question is are we going to be able to get broadband? The second question

is, what about cellular? What about cell phone service? Is there a chance that that might

go hand in hand with this on some of these towers or is that a separate component?"

Secretary Carmichael: "It's totally separate component."

Delegate Boggs: "Okay."

Secretary Carmichael: "Yeah, totally separate component but there are many

providers now that are utilizing the state assets as you explained. Like HardyNet is one

that positions wireless components on a lot of the siren towers there and was able to

reach a nice area with it but we're...you have allocated \$10 million dollars for that project

and we're going to analyze and make sure that we can get those areas as efficiently as

quickly as possible."

Delegate Boggs: "But the main thing is to go on that website or---"

Secretary Carmichael: "Call."

Delegate Boggs: "---I will go in that website, get them the number, let them call."

Secretary Carmichael: "Yes, yes for those who have no other mechanism to

reach us."

Delegate Boggs: "Okay, all right thank you very much."

Secretary Carmichael: "Yeah."

Delegate Boggs: "Thank you, Mr. Speaker."

Speaker Hanshaw: "Senator Plymale."

Senator Plymale: "Thank you. I guess there's a little bit of an issue that I have

that the federal government has decided that 25/3 is good service and that's not even

service in most cases."

Secretary Carmichael: "Yeah."

Senator Plymale: "When you have children trying to you know, do homework or

any types of connection to the internet, 25/3 isn't even, you know, enough to do this....and

through their guidelines they've really made it tough to really deploy this into some of the

rural areas."

Secretary Carmichael: "No question."

Senator Plymale: "Now there are some things that you can do because there's

some...in the treasury outline there are some extra steps that you could take to justify

that you could get it into areas. How well are you working with the...to explain that to

groups and ..(inaudible)..."

Secretary Carmichael: "Yeah it's a great question and I'll readily confess that our

initial emphasis has been on getting broadband to those who do not have 25/3. Once we

see the application Senator, I think we'll be able to reach out a little further into that realm

that you're speaking of because you're absolutely right. The guidelines as they came

down from the treasury said you must not go to those who have broadband, go to those

who do not have it...but there are---"

Senator Plymale: "Well I mean there's also one other thing that's—"

Secretary Carmichael: "Yeah."

Senator Plymale: "---we have to use the federal maps—"

Secretary Carmichael: "Yes."

Senator Plymale: "---not the maps that maps that we have made that are more

accurate."

Secretary Carmichael: "And we have more accurate maps."

Senator Plymale: "Yes."

Secretary Carmichael: "You guys have put a lot of money into the Broadband

Council that enabled them to build great maps. So, you're right in the fact that the FCC

tells us that somebody has broadband, we don't take their word for it. You know, we make

sure that they do have broadband, but I think the essence of your question is there are

other factors besides 25/3 that can enable us to spend federal money into those areas

and we will absolutely look at those."

Senator Plymale: "And I think that we've got to focus on that to be able to try to

serve West Virginians."

Secretary Carmichael: "Yeah."

Senator Plymale: "The other thing that I have is in the last action item that you

have down here is a West Virginia policy concerning bridge attachments."

Secretary Carmichael: "Yeah"

Senator Plymale: "The concern...you know, first off the Department of Highways used to tell us they couldn't...it would hurt the instructural tegrity of the bridge...before, correct?"

Secretary Carmichael: "Yes."

Senator Plymale: "Okay, so now that's not an issue, we knew that wasn't an issue, but I'm really concerned with the policy that if we allow to put a conduit along this that it's open access, it should be available for everybody."

Secretary Carmichael: "Totally agree."

Senator Plymale: "In true confession, as we're doing the Thundercloud Project, that's exactly what we're going to do, so it's going to be available to anybody that they want to do that. I tried to follow the link and I can't get to it...that they tell you here...have you all reviewed those extensively to see?"

Secretary Carmichael: "Yeah Kelly you may want to help me with this because I know that we...I assigned someone to go through the process to see what is involved with attachment to highways, state and federal highways, and the Department of Highways controls that process. So, I would, you know there's not a lot we can do about that in our department but---"

Senator Plymale: "Mr. Speaker, Mr. President, this is an area I think we really need to focus on because I think that this is really important as we start trying to deploy broadband. First off, we said that the highways have no value and now if we stop at the bridge, you know how to tough it is to get through West Virginia if you don't cross a few bridges, so, I think this is a vitally important area that we really need to focus on."

Secretary Carmichael: "We would love your help on that with the Department of

Highways, so yeah."

Senator Plymale: "Well I'd make a motion that at some appropriate time that we,

you know, as the Joint Committee on Government and Finance say that this is vital to the

citizens of West Virginia and that we have this policy reviewed here."

Speaker Hanshaw: "As an agenda item?"

Senator Plymale: "As a motion at some time, yes."

Speaker Hanshaw: "Okay, let's take that for consideration as an action item for

our next meeting. Is there objection to adding that as a discussion item for our next

meeting? Okay if not, we'll have that as one of our discussion items next month."

Senator Plymale: "Okay."

Speaker Hanshaw: "President Blair."

President Blair: "...(inaudible)... reason I'm sitting there smiling and everything

because you sort of got a head start, you warmed him up for the questions I'm going to

ask him."

Senator Plymale: "...(inaudible)..."

President Blair: "Yeah, that's right. First of all, there's nothing wrong with 25 down

if that provider provides 25 down, that is acceptable, that's not a problem. The problem is

somebody providing 25/3, most of the time you're not getting 25/3 and we all know that,

and we all know who the provider is for that. So...now I feel a little better because of that

one but I wanted to ask you a question to start with and that is that you've been here for

eight months and doing this, and you've been in the legislature...what things have you

identified that you want to come back to the legislature this year and say hey we need to

do this, we need to do that, that way the providers can do a better job, be more cost

effective at getting it done, getting it throughout West Virginia. I know one of them that

you and I have talked about is this pole certifications but anything else that you identified

because that leads into where the Senator was coming from on this, and we need that

information soon. We're a month away from getting at it and..."

Secretary Carmichael: "Yeah, it's a great question and I think over the past

several years the legislature has positioned yourself in the state of West Virginia to be

able to...if there were money available...to deploy broadband and make it easier for

providers to deploy the asset and I think you've done a great job, I mean I think....I was

a part of it at the time....the legislature's done a really great job of knocking down those

hurdles and I know President Blair you've been involved with that as well. So, now it's

about money and it's you know it's...we just need the money to deploy the assets and get

it going. I can't think of...you know maybe I'll think of something later but at this

moment...we may run into something...at this moment it's about funding."

President Blair: "She may be carrying something up for you."

Secretary Carmichael: "Yeah, maybe so...oh no here's the phone number to call

if you can't get broadband."

President Blair: "Oh."

Secretary Carmichael: "Call 304-356-0138. Yeah, 304-356-0138. Ask for Ryan

Weld."

President Blair: "Yeah, all right one last thing from me and that is, how's it working

out for the employees, the technicians to be able to do it? I know there's a shortage and

that's in your wheelhouse also."

Secretary Carmichael: "Yeah, that's an incredible...all the providers have

recognized that there is a great need for these technicians and many of them have been

recruiting employees and preparing for these grants to be able to deploy the assets.

There's supply chain issues, there's employee issues, but I will say, and I hope people

hearing this on the stream can...if you're interested in going to work deploying broadband

technology you can make good money, have a great long-term career, there

is...opportunity abounds in this industry."

President Blair: "So, next month when we get started and it'll be the beginning of

the session, can you come back with information on supply chain problems so that

we're...we got to be able to communicate this to the public also but we...there's supply

chain issues, the help, all that. It wouldn't even hurt to have one or two of them in here,

but you can compile of that information and put that in front of us as well."

Secretary Carmichael: "Yes and the next time I appear before you we'll be able

to point to people that have received internet that didn't' have it previously based on your

allocation of funding. So, that'll make difference in people's lives."

President Blair: "All right, thank you."

Secretary Carmichael: "Yeah."

Speaker Hanshaw: "Senator Trump."

Senator Trump: "You're just ... (inaudible)... the bids on that, I think we're past a

year now since those RDOF auctions were held. Is the clock running on the providers

who won the bids now?"

Secretary Carmichael: "No, not entirely. Seven different providers...and I should

have gone over this, it's a great question...seven different providers won awards in West

Virginia and each one of those processes you have to go through a round two certification

from the FCC to...they check your technology, your financials, all that and do sort of a

double check, a more in-depth analysis. Only two in West Virginia have received their

money...first year's allocation...Citynet and Prodigy, which would account for, of the \$360

million dollars, \$60 million dollars...roughly \$60 million dollars. So, their clock is running,

the others are not because they have not received the money."

Senator Trump: "Thank you."

Secretary Carmichael: "As well as, Capital Projects Fund, that was allocated

during the first round of, you know, stimulus money, we have not received. The state has

not received that money and we were the very first state to put our application in for the

funding. So...Merry Christmas everyone."

Speaker Hanshaw: "Merry Christmas to you."

Secretary Carmichael: "Yeah!"

Speaker Hanshaw: "Thank you, Mr. Secretary."

Secretary Carmichael: "Thank you."

Speaker Hanshaw: "Let's have the lottery report."

Director Myers: "Good evening, Mr. Speaker, Mr. President, members of the

committee. We submitted the October financial report in your packets, but I did have a

few things as far as reporting on sales for this year that I wanted to go over with you

quickly. Our instant sales, year to date, for the fiscal year are at \$69,243,000 dollars, that

is a 10.05 increase above last year. Our draw games, which is Powerball Mega Millions,

Daily 3, Daily 4, those games are at \$30,580,000 and are 21.76% above last year. So,

total traditional lottery, which are the things that we do and have control over here in

Charleston are \$99,823,000 which is 13.39% above the previous year. In racetrack video

lottery we're at \$197,010,000 which is 22.82% above the previous year. It's not quite back

to pandemic levels but...or pre-pandemic levels but certainly an improvement over the

year before. Limited video lottery is at \$198.916 million, which is 8.61% above the

previous year. Just a note there, we've had fifteen of the top twenty-five months in sales

since June of 2020 and that's our records going back to 2008. So that piece has done

very well over the last two years. In sports wagering, inside the casinos \$724,442 dollars

that's down almost 3%. The sports wagering online, on the phone, is at \$1.3 million and

that's 48.6% above the previous year...and then iGaming is at \$4,245,000 which is 325%

above last year but that was started...didn't start until July of last year as well, so..."

Speaker Hanshaw: "Scoot a little closer to the microphone ... (inaudible)... who

are listening to our live streaming are having a little difficulty."

Director Myers: "My apologies."

Speaker Hanshaw: "Thank you."

Director Myers: "And to wrap it up, the total sales for lottery, year to date are at \$520,688,000 which is 16.41% above the previous year. So, having a pretty good year so far."

Speaker Hanshaw: "Okay questions for Mr. Myers about the lottery report? Okay if not, thank you very much."

Director Myers: "Merry Christmas."

Speaker Hanshaw: "Let's have the General Revenue Fund report. Mr. Muchow, good evening."

Secretary Muchow: "Good evening, I'm Mark Muchow with Department of Revenue. I believe everyone should have November numbers before them, it may look a little different than you've seen in the past, it looks like this. It's coming, it's coming right now...give the folks a minute here to get that...and this is basically a one-page summary of activity for the General Revenue Fund and the State Road Fund, both for November and also year to date and the columns start with the November estimate. In November, the estimate for general revenue was \$347.5 million, we collected a whole lot more than that, we collected \$435.6 million overall, that was \$88 million above estimate, and compared to last year's November collections and last year was a reasonable November, we were up 27.2%, so good momentum, strong growth overall in collections. Year to date, the estimate through five months is \$1.74 billion, we collected a little over \$2 billion, that's \$269.4 million above estimate, it's 3.8% above last year but you recall last year we got a \$200 million dollar jumpstart last year. When you take that into account we're actually on an adjusted basis, 15.8% ahead of last year, so this is a really strong revenue growth

scenario that we have for this year. The highlight on the numbers, both for the month and for the year is the severance tax, we had estimated through November that severance tax collections would grow by close to 100%. Well instead of 100% for general revenue we got 250 plus percent, so producing some pretty good numbers...and for severance tax the estimate in November was 32.9, we collected nearly \$75.4 million, that is \$42.5 million above estimate. Last year we only collected \$21 million for November, so 258.5% growth. Year to date \$105.2 million, we've collected \$191.6 million, that's \$86.4 million above estimate, and \$137.4 million dollars above last year. The rate we're going, sometime in January we'll hit the total amount that we hit for all of last fiscal year and counting, so those numbers are strong. Not only are the severance tax numbers strong, the income tax numbers are very strong. The personal income tax in November, \$169.8 million, the estimate was 149.1, that was \$20.7 million above estimate, 13.3% ahead of last year. Withholding tax collections on wage and salaries have consistently been about 10% above last year since the beginning of the fiscal year. Year to date on personal income tax, the estimate was \$764.3 million, we've collected \$854.9 million, that's \$90.6 million above estimate, technically seven and a half percent below last year but when we adjust it for the \$144 million dollars that we collected at the beginning of last year, year to date we're running 9.6% ahead of last year. Corporate income tax, same situation, corporate income tax we collected \$6.8 million in the month of November compared to \$2.1 million last year that was up 218%. Year to date we're running forty-three and a half million dollars above estimate, technically 21% below last year but when I remove the \$56 million dollars that we got at the beginning of last year, that was deferred, corporate income tax collections are up pretty close to 50% year to date through five months. The

sales tax, that's the final of the four big performers, sales tax in November we collected \$149.2 million, the estimate was 130.7, that's eighteen and a half million above estimate, and a very impressive 11.7% ahead of last year. Year to date is \$633.3 million, is \$45.3 million above estimate and 7.1% ahead of last year, so again very strong overall numbers.

State Road Fund, that's at the bottom of the page, shows the major components there. In the month of November, if you take away the federal reimbursements, the estimate was \$81.94 million, we collected \$72 million, that was \$9.9 million below estimate but still 5.3% ahead of last year. Year to date on the state components, we collected \$377.9 million, and the estimate was \$389.9 million, so running pretty close to \$12 million below estimate, compared to last year we're down 8% but if we take away...last year we got \$50 million dollars in Cares Funds it's sitting in there, in the miscellaneous line.... you take away those Cares Funds, we're running about 4.8% ahead of last year on the Road Fund. Motor Fuel Excise taxes are in a state of recovery, even though we were a little bit below estimate in November, we were still 6.2% ahead of last year, and year to date on Motor Fuel Tax we're running \$2.4 million above estimate, and 7.2% ahead of last year. The recovery continues, people are actually beginning to travel the roads a bit more, you can see that in the morning on the morning commute. Registration fees haven't done quite as well, they're \$5.9 million below estimate in November, year to date running \$13.8 million below estimate, about 5.6% below last year, so those are a little weak but the Motor Vehicle Sales Tax continues to be pretty strong, we collected \$24 million in November, the estimate was 19.7, that's 4.3 above estimate, about 21% ahead of last year. Year to date, 3.8% growth above last year and about \$20.4 million ahead of estimate. You'll also notice at the bottom of the page that the federal

reimbursements have been pretty strong this year relative to last year. I never look at the estimate on federal reimbursements, the highway folks tend to inflate those numbers in the hopes that the additional federal money will come and sometimes it does come but look at the growth rate, growth numbers, this year through five months, we have \$213.9 million in federal reimbursements, last year through five months \$147.3 million, so that's 45% increase, so nice movement on the upside on the federal reimbursements. There's a set limit as to how much you can get reimbursed, to keep in mind, but certainly on a cash flow basis the federal reimbursements are way up this year. Any questions?"

Speaker Hanshaw: "Questions of Mr. Muchow? Okay if not, Mark we thank you."

Secretary Muchow: "Merry Christmas."

Speaker Hanshaw: "Oh, Senator Plymale sorry."

Senator Plymale: "Mark, could you just briefly give me an...with the coal severance I see some things changing on that but right now when the severance money comes in there's a portion that goes back to the county, correct?"

Secretary Muchow: "Yes, there's a portion of coal severance that goes back to county on a quarterly basis."

Senator Plymale: "So, it's on quarterly and what's the percentage usually per?"

Secretary Muchow: "It's two separate pots of money, one is actually a tax rate itself of 0.35% tax rate that's been in place since the early 1970's and that generates...oh I don't have the exact number in front of me but..."

Senator Plymale: "Well now I'd like to just, I'd like to understand that a little bit

better because—"

Secretary Muchow: "It's 0.35% of the gross receipts attributable to the production

of coal, so it's influenced by the number of tons, but it's also influenced by the price. I

could tell you that number of tons last year we hit a low, last year was a bad year for

energy...I think according to John Deskins maybe since 1918, that's how low it got but

down around sixty-five, sixty-eight million tons. This year we're back up to somewhere

around an 80-million-ton neighborhood. Most of the growth in the...on the production side

at least until recent months was steam coal because of the higher prices for natural gas

but that's only part of the equation, the other part of the equation is pricing and in the

last...and we're talking only in the last three-four months maximum, the price of coal has

significantly shot up...I'm talking mainly metallurgical coal and where we might have seen

overall average price of maybe around \$60 a ton of steam and everything thrown together.

At the beginning of this fiscal year, we're now seeing an average price that's around \$90

a ton, so that's a big change in a very short period of time—"

Senator Plymale: "Well I have some more specific questions; I'll call you and ask

you about them because I wanted to understand that as we start looking at some

opportunities."

Secretary Muchow: "Okay."

Senator Plymale: "Okay."

Secretary Muchow: "Thank you. Merry Christmas."

Speaker Hanshaw: "Thank you, Mark. All right, let's have the Workforce West Virginia Unemployment Compensation Report."

Director Green: "Good evening, my name's Jeff Green, I'm Deputy Executive Director for Workforce West Virginia. The unemployment trust fund balance as of this morning sits at \$314.8 million, our activity over the course of November we paid out roughly 7,500 claims, which is a reduction from what we had in October, it's been the lowest number of claims we've had this year...at about one million less in total payments from October to November."

Speaker Hanshaw: "Thank you, questions of Mr. Green? Okay if not, Mr. Green we thank you for not only today's report but the informative report from yesterday."

Director Green: "Thank you."

Speaker Hanshaw: "Secretary Scott. Welcome to the Joint Committee."

Secretary Scott: "Good evening, it's a pleasure to be with you this evening. Thank you for having us and I'm Mark Scott, most of you I know but for you who do not know me, I'm the new Secretary of Administration and looking forward to working with all of you to make the Department of Administration as effective and efficient as possible.

So, before you I believe in your packets you have the reports from BRIM, PEIA, and Real Estate Division and just to point out a couple of highlights as far as PEIA is concerned...year to date financial statements for September 30th are before you, the statements indicate that PEIA is currently ahead of plan by about \$13 million dollars. It's due to lower than forecasted medical claims, the statement would indicate that the RHBT is currently behind plan about \$35 million dollars, and this is mostly due to lower than expected investment results. The 2022 year end reserve for the State Fund, Non-State

Fund, and the RHBT is projected to be balances of \$141 million, \$33 million, and \$68

million respectively. These reserve levels represent 22%, 22%, and 37% of the respective

fund's expenses. The required reserve for the State Fund is 14%...and also under the

Real Estate Division, you can see that we're still working on contract renewals for new

leases, straight renewals, and renewals with increases. You all know there's been a push

to make sure that we get rents up where necessary, try to get them more market line with

market rates where we can increase our revenues that are coming in from rental income.

So, any questions?"

Speaker Hanshaw: "We'll start with the PEIA report, questions from any member

about the PEIA report? Okay if not, the BRIM report? And lastly, the Real Estate Division

report? Mr. Secretary, we thank you very much."

Secretary Scott: "All right, thank you all. Have a Merry Christmas."

Speaker Hanshaw: "Deputy Secretary Samples, DHHR."

Secretary Samples: "Mr. Speaker, Mr. President, you have the Medicaid and

CHIP reports in your packet. We just received a new updated on Medicaid enrollment,

we're up to 618,000 West Virginians on the Medicaid program. I know we're short on time,

I will just leave it at that unless there are additional questions sir."

Speaker Hanshaw: "Questions for Mr. Samples? On either the Medicaid report or

CHIP? Okay Jeremiah, thank you."

Secretary Samples: "Thank you, sir."

Speaker Hanshaw: "Okay, let's move to the Investment Management Board. Mr. Slaughter, good evening."

Director Slaughter: "Good evening, ladies and gentlemen. I'm Craig Slaughter, Executive Director of the West Virginia Investment Management Board. Fiscal year to date, you should have October 31st numbers in your packet. You have September? I asked her to send them, I am sorry. Well, you're...I'm going to take you a month forward then...October was a good month, so we're up 2.1%..."

Speaker Hanshaw: "Chair's advised that we do have the October numbers in the report."

Director Slaughter: "Oh, you have both in there right?"

Speaker Hanshaw: "Yes sir."

Director Slaughter: "Okay. Okay that explains it, good. All right so October, we're up 2.1%, October was a great month. You can see from the numbers, September was not a great month so...and then as it turns out this month, this past month November, wasn't a particular a good month for the markets either. So, it seems like it's just flip flopping one month to the next, up and down, and so forth. So, through November you can fully expect that we're probably only about even for the fiscal year, so that's five months in. So, now on the good side...on the positive side of it are ten years we're up 10.5 and over twenty years we're up 8.5% on an annualized basis. I'm more than happy to go into more detail or talk about the markets if anybody has any questions."

Speaker Hanshaw: "Thank you, Mr. Slaughter. Questions of Mr. Slaughter about the IMB report? Okay if not, Craig thank you very much."

Director Slaughter: "Thank you, gentlemen."

Speaker Hanshaw: "Commissioner McVey."

Commissioner McVey: "Thank you, Mr. Speaker, Mr. President, members of the committee. I can tell you the same thing I told you last month. In your packets you have our reports, we have adequate reserves to take care of projected claims according to our actuaries...and at that I'll ask if there any questions you may have?"

Speaker Hanshaw: "Very good, questions from any member about the Workers Compensation Report?"

Commissioner McVey: "Were you not going to make the motion? Do you remember?"

President Blair: "No, I don't remember."

Commissioner McVey: "About having us come maybe a little more infrequently here."

President Blair: "Actually, Delegate Summers was talking about that and I wasn't going to make that today."

Commissioner McVey: "Okay."

President Blair: "We're going to...since we're moving into the January interims, when we get through this session, we're going to revamp how we do some of the things in this committee."

Commissioner McVey: "I was going to tell you, I was going to come to the meeting anyway because it's so interesting."

President Blair: "You learn all about broadband here and that's the plan."

Commissioner McVey: "Actually, I hope we do get some broadband, I do have relatives that don't have access in other parts of the state, so I love it."

President Blair: "Yeah."

Commissioner McVey: "I love it. Any...okay any other questions? Thank you."

Speaker Hanshaw: "Thank you very much."

Commissioner McVey: "And please, have a Merry Christmas, Happy Holidays, and look forward to seeing all of you in January."

Speaker Hanshaw: "Chair is advised that the Board of Treasury Report is available for all members in your packets for consideration at the appropriate time. That concludes the quarterly and regular report. Let's move into other business. We do have Pharmacy Benefit Manager Presentation today. Who's going to be offering that presentation?"

Lynne Fruth: "Senator Blair, I'm...this is my technical staff...okay...Speaker Hanshaw and members of this committee, I am pleased to be here to present and...information around PBMs and offer some perspective on what may benefit the PEIA plan and as I said I thank Senator Blair for the invitation. I have spoken to several other senators and other legislators about this and as the President of Fruth, a West Virginia company, I am here strictly on behalf of doing what I think is in the best interest of West Virginia.

So, the one thing that we know is that the net costs of prescriptions, the medication, the cost has actually decreased the last two years in a row, but the pharmacy spend in insurance plans continues to increase and the practices that the PBMs are doing are a main driver of this. Now, in addition to that, the insurance plans often see the pharmacy benefit as a profit center, which is why they work so hard to keep a hold of that as part of the entire book of insurance. So, what I've put together here are ways that the PBMs, traditional PBMs, drive profitability for themselves and often to the detriment of PEIA and other insured. They will manipulate the formulary to dispense higher cost drugs to try to get increased rebates, but your cost also goes up significantly. They will force mail order or try to compel mail order by offering a zero co-pay to the patient but often a higher cost to the plan than if it had been filled at a regular pharmacy. They often use a subcontractor and add in another layer of markups which can add cost. They can engage in claw backs from the pharmacy, often after the plan year, that may or may not be passed on to that insured's plan. They manipulate formulary to force people to dispense higher cost drugs because that is to their benefit.

What I'm showing you here is that CVS Caremark, Cigna, and UnitedHealth actually control almost 80% of the PBM market. Now, if you say what's the problem with that...well these three are traditional PBMs which means each of them controls almost a third of the national book of business and this lack of competition has led to benefit designs being created that are favorable to the PBMs and often at the detrimental expense of the employers and providers. There's also a lack of understanding about what PBMs do within healthcare system and so it's resulted in a very unregulated industry. States have started to pass legislation directed at reigning in unfair PBM practices and as

I shared with Senator Blair, the House Bill 2263 in the state of West Virginia is considered to be, on a national scale, the most comprehensive and beneficial piece of legislation to date and on many national committees that we're involved in, they are actually following what is West Virginia's doing and looking to replicate that. So, PBMs have come under scrutiny.

So, I want to talk about a few things that actually show what's happened. Well, in Ohio Medicaid, your auditor at the time, Dave Yost uncovered that CVS Caremark had overcharged the state by \$224 million, which is almost a quarter of a billion dollars...and they were able to recover that money. Later, he identified that Centene, another subcontractor on the PBM side, had marked up those services an additional \$88 million and they also paid back the state of Ohio. In the Delaware system, the auditor of Delaware did a three year look back at the public employee plan and estimated that the state of Delaware had been overcharged \$24 million dollars. I want to make sure you're seeing what I'm seeing...good! So, this is the pharmacy benefit manager's report out of the state of Ohio and I just pulled from his entire report I pulled one page to say, they were overcharged by \$224 million by Caremark. They initiated the legal action against Centene and recovered \$88 million. They recommended that you should have a pass-through model for a PBM, meaning a fully transparent PBM, and they recommended better internal controls over monitoring the drug rebates. They also talked about other areas that needed to be studied because of abuse, potentially filling and refilling multiple prescriptions that are not used through mail order. The fact that CVS Caremark is the only pharmacy that has a PBM and a retail pharmacy and therefore puts itself into a conflict of interest...and that withholding of rebates has been identified as a potential of fraud...and he said a rebate audit should shed light on this very complex and secretive process and I have access to all these full reports that we can share with you. The Delaware auditor, just by chance, happened to be registered pharmacist and she undertook looking at their public employees plan and likewise I've...you know.... narrowed this down to a couple pages. What she found was that the Delaware drug costs, the increase of their drug costs was triple that of national overall drug inflation, and that Delawareans could have saved \$24 million dollars in prescription drug costs. She further went on to say that their overall drug spend was nearly triple of the inflation, that the...this is really significant...the PBM charged the state employee program more than 50 different administrative services and clinical programs ranging from a few cents to hundreds of dollars, and those fees accounted for 13% of the total pharmacy cost. Meaning that there was an additional \$21 added to every claim over that three-year period. So, that \$4 drug was paid \$4 plus 21 when you average out those fees. Their fees increased from 2018 to 2020 over three-year period, they increased from \$610,000 dollars to \$1.8 million dollars in two years, for basically the same volume of service and the same volume of claims.

So, you know one of the things that we hold up and we talk in West Virginia, Ohio, or any place is show us what works. Well, West Virginia Medicaid is the sparkling example of what works, there's proof in the results. West Virginia Medicaid moved from a Managed Medicaid Plan with a traditional PBM that was designed to save the state money and when they did that they moved to a straight NADAC which is National Average Drug Acquisition Cost, plus a \$10.49 dispense fee. A retroactive audit after the first year showed that West Virginia Medicaid saved \$54 million dollars. I will tell you this, that we were involved in some of those discussions when Vicki Cunningham was at Medicaid as

to the appropriate dispensing fee and at Fruth Pharmacy, our dispensing fee when we take all the factors in and divide it out by the number of prescriptions we fill, our dispensing fee, the cost for the pharmacist, the cost for the transmitting the claim, the label, the vial, so on, is generally speaking between \$10 and \$12, so we find that to be a fair assessment of the cost of that professional service. I will also tell you that once we started into use of the NADAC as a measurement, I asked Andy Becker who's here with me today, a registered pharmacist who will be available for questions, to do a data analysis and tell me how close is NADAC to what Fruth Pharmacy is actually paying and Andy tells me that we are consistently within eighty basis points. We either buy at eighty cents better or eighty cents worse. So, NADAC is a very true and accurate cost of the cost of the drug, and it is the best cost that is out there at this point in time.

Spread pricing is not a factor in PEIA but you need to understand what happens and I'm going to quickly move to here. A PBM will say to an insured, we are going to guarantee you you're going to get a 50% discount and you say wow 50%. So, you're going to get AWP which is Average Wholesale Price minus 50%, what a deal. Well, the problem is that AWP is a made-up number by the PBMs and the fact of the matter is right now Fruth Pharmacy and most of your independent pharmacies, probably a lot of your chains, are consistently being reimbursed AWP minus 90, so if that AWP cost is \$100, they're discounting it 50 and your plan's only paying 50 for it, the pharmacy's getting 10 and the PBM is keeping the rest.

So, let's talk about the real story behind rebates, rebates are received on brand named drugs and because PBMs traditionally do not act as a fiduciary, they will....they are incentivized to use...it's almost like a commission salesman, they are incentivized to

put more expensive drugs on the formulary for the purpose of getting the rebates and studies have shown that traditional PBMs typically do not pass all the rebates back to the plan's sponsor. They frequently will require patients to change drugs to be required to take a more expensive drug, which is more expensive to the plan and more expensive on the copay for the patient for the purpose of getting up to that rebate guarantee. In large part, the plan's sponsor has no knowledge about the PBM and what it negotiates with the manufacturers, or if there is any spread or the difference between the rebates. PBMs also charge an aggregation fee. Now you say well that aggregation fee can go from seventy basis points to a few percent but what's that on \$200 million dollar spend, it's a lot of money, it's another way of profit taking. PBMs claim that they pass all rebates on in some models, and I believe PEIA is a model where they are saying they're passing the rebates on. I don't know that for sure but what PBMs are doing it's all becomes in the semantics. PBMs are now beginning to negotiate with manufacturers to change what the rebate structure is. So, traditionally what we've seen in rebates is on a brand drug has been in a 45, 40-50% range when you, you know, average it all out. So, if you have a \$200 drug, the manufacturer says there's \$100 available to you in cash back rebate, whatever you want to call it, the PBMs are now starting to say oh no we don't want \$100 rebate, we'll take a \$50 rebate, and we want the rest of that money to come to us in a data fee or a service fee or other fees. Those other discounts may not ever make it back to the plan because if the language in the contract says all rebates, well we're not calling this a rebate anymore. Our plan that we just entered in to with a transparent PBM, we required it to say any and all discounts provided by the drug manufacturer have to be a straight pass through. So, because more plans are looking at this transparency, there's an interesting

concept that's starting to develop with the three big PBMs. They've all started negotiating different, service fees, data fees, etc. and this design just adds another layer of secrecy between the PBM and the plan sponsor and then the plans have no way to go back and audit to ensure that they actually are getting the full rebate.

As a matter of fact, Caremark, Cigna Express Scripts, and United Healthcare Optum, have all recently started a subsidiary company, two of which are based off-shore. Caremark has started a company named Zinc, Express Scripts has started a company named Ascent, which is located in Switzerland, and United Health Optum has started a company named Emisar, which is located in Ireland, and the purpose of all three of these companies is to negotiate with drug manufacturers for rebates and service fees. So, what we anticipate happening is that this becomes another middleman. So, Zinc negotiates on behalf of Caremark and they take that 500 available rebate and they put 200 rebate bucket and 100 in this bucket, and 100 in that bucket, and 100 in that bucket, and those buckets never make their way back to PEIA or the plan. So, if the PBMs have nothing to hide, why are they creating these offshore businesses to obscure the process and access of transparency. This additional layer will enable those PBMs to literally hand you a report that shows 100% of the rebate's been passed on because it's been stopped in that previous, some of that's been syphoned off in the previous step. Now, interestingly the First Court of Appeals said the health benefit provider, in this case, PEIA or whatever your plan is, often have no idea that a PBM may not be working in its best interest. This lack of awarement, awareness is a result of the fact that there is little transparency in a PBMs dealing with the manufacturers and the pharmacy.

So, the real issue becomes what are we paying over here, what is PEIA paying, and then folks what are the pharmacies receiving? Because anything that's in the middle is money that I feel is available for the state. So, what does PEIA need? We need real transparency, we need zero spread pricing, and I don't believe there's spread pricing in there now which tells me that if there is profit taking, it's in the form of service fees and other things, and withholding rebates. You need 100% pass through, you need 100% of all discounts from the drug manufacturer, clarity in your contracts, a clear and concise administration fee so that you know exactly what the processing is going to cost you. What a drug utilization is going to cost you, what a prior auth is going to cost you, and then you need to eliminate the conflicts of interest and pharmacy network's formularies, rebates, and other available discounts. No one can manage what they don't understand.

So, when you look at a PBM what do you look for? It's all about cost containment. It's really about providing the service at the best cost. You want to choose the best cost for PEIA not the PBM. You want an accountability on every prescription dollar which would be claim level detail for every prescription filled for the purpose of being able to do internal audits. You want AWP rebate guarantees and those things do not tell you what the true cost of the plan is. The only way to know what the true cost of a plan is, is to be evaluated on the basis of what is the per person per month charge, net of any rebates, and with all the service fees in there. What is that charge and if you can reduce that charge, you're saving money. The size of the discount doesn't matter, it's the overall spend per person per month that shows the true cost.

A true transparent PBM...and there are some out there...will charge the plan sponsor exactly what the pharmacy got paid. If Fruth Pharmacy got paid \$22.15, PEIA

gets a bill for \$22.15 and whatever the cost to process that claim. A real transparent PBM will agree to sign a fiduciary statement and also to act as a fiduciary for the plan. Meaning that they have a responsibility to do what is in the best interest of the plan. They will have no financial interest in any pharmacy, retail specialty, or mail order. That way they have no conflict of interest to direct something to themselves. They will manage your plan design and other programs for a defined fee, they will pass on all revenue, they will disclose any and all fees, and they will make all transactions readily available and auditable...and like I said, from my perspective it's all about reducing PEIA's spend because after all its West Virginia's money.

I have another, if you can pass me one of those, this wasn't the most updated so I'm going to pull something up, there's just one thing that I want to cover. There was a study that just came out this week and it was of such significance that I thought it needed to be included. December 2nd, from Business Wire, which is a Berkshire Hathaway Company, that despite decreases in the PBM retention of rebates, so in other words in spite of the fact that they're retaining less of the rebates, from 2017 to 2019 PBM gross profit from retained administration fees paid by manufacturers increased 51%. That's what I'm talking about, we've shifted the rebate to fees. From \$3.8 billion to \$5.7 billion, the gross profit from PBM mail order and specialty pharmacies increased more than 13% from \$8.9 billion to \$10.1 billion, and PBM gross profit from other sources...meaning spread pricing, pharmacy fees, claw backs, fees collected from payers, non-administrative fees...increased 26% from \$8.5 billion in 2017 to \$10.7 billion in 2019. Now, the group doing this study says although these other sources constitute nearly 40%

of a PBM's gross profit, analysis of the publicly available financial information sheds little light on how much profit is derived from these components. So, you're back in the dark.

Now, this is our recommendation, PEIA a pathway to a better plan...and I apologize because there was an updated one and I will provide that to you. Not to enter another three-year contract with a traditional PBM where every year you come back and they say we need more money, it's cost more than we thought, and oh by the way these are the same guys who are involved in the fraud or this or that, that's the first one. Execute an RFP that will allow transparent PBM to compete for the contract based on your current spend is...let's just say it's \$100 per person per month, if a transparent PBM comes in and says we guarantee it'll be \$90 per person per month, that's the person that ought to get the contract. You take the rebates and all this stuff out of it and bottom line is, how much money do we have to take out of our checkbook to pay you. Number three focus on lowering the net per person per month, and not focusing on rebates. Then utilize these savings from the pharmacy spend to support other areas in PEIA. I added two things after I met...we actually had a meeting with Jason Haught from PEIA, I felt that I wanted him to be educated from our perspective...you need to require that PBM to sign a fiduciary agreement and you also need to encourage PEIA to engage in a cost comparison utilizing a fully transparent PBM. Now, in the spirit of transparency I want to say we did meet with Mr. Haught from the PEIA, we have prior to this never had the opportunity to meet with anyone from PEIA, although we have, you know, asked on multiple occasions. I believe that following our conversation that there is an opportunity at this point in time with new administration and consideration of a different way to look at things, that there is a great opportunity that you finally have somebody who says yes, we will think about another

model that might be better. So, I thank Mr. Haught for meeting with us and you know spending two hours being educated in much, you know, more detail than this relative to the PBMs...and then finally I will provide you with any and all articles, reports, auditor's reports, that have been named in this. You know I'll provide your staff, Senator Blair, with any references that we've used in this plan. So, I guess at that point in time, I said does anybody have any questions?"

Speaker Hanshaw: "Yes, thank you very much. Questions of Miss Fruth? President Blair."

President Blair: "First of all, thank you for being here and...look, the information you presented...and you've presented basically to this committee without a PowerPoint...it made sense, hard to digest. I give you a lot of credit, you must have put a lot of time to be able to do this because I'm listening to it a second time and maybe you guys....and one of the ways you can tell that you don't get a lot of guestions...they didn't get anything out of it, or they got everything out of it. In between, you can get some questions on it, nobody is asking questions at this point in time, but they probably will. I found this very very informative and what makes me even happier, you had the wisdom and the foresight to go to PEIA, have a conversation with them, get involved and thank you for being a West Virginian and be looking out for things like that. That's what we're trying to do and I got it today, you made it digestible for somebody that's not in the industry, and that's one of the hardest things that we have to deal with with PEIA. We don't understand all that...or I don't understand I'm not going to say we...and it's hard to digest everything that comes out of there but yet we keep fanning money at them. So, thank you and if anybody...I got it all, I don't have a question—"

Lynne Fruth: "So Senator Blair, if I could...I think that one of the problems that we've had with PEIA is that we've been stuck in a model of doing the same thing and believing that there were no other options, and so you keep doing what you've always done, and you keep getting what you've always got and then you wake up one day and say this is really not working. So, I applaud the fact that PEIA is in a transition of leadership and like I said Mr. Haught was very open. You know, he basically said you're going to have to prove this to me, and I said we would welcome the chance to try to get somebody to prove that to you but I do think that there's an opportunity for the state to save money and it would be...in my opinion...it would be incredibly reckless of the state to continue to do what they know has not really worked for PEIA when a better opportunity might exist, where you could save \$10 million dollars, \$20 million dollars, more than that...and as I said to Jason, if you validate nothing more than you have the best deal, then now you all can sleep at night knowing we took it to market, we saw what the market would bear, and there's not a better deal, but from my perspective I totally believe that there is."

Speaker Hanshaw: "Senator Tarr, then Senator Trump."

Senator Tarr: "Thank you, Mr. Chairman. Lynne thank you for being here today, I appreciate this. I got a couple questions, one is that you know, you started off talking about Medicaid and getting rid of the PBM and saving \$58 million dollars a year. In investigating this are you aware of any states that in their public employee plan, they do not use a PBM? I mean why are we paying a PBM in the first place I guess is the question I have?"

Lynne Fruth: "Okay so, the reason that you're using a PBM is because we've all been told this is such a big plan you have to have one of the big three. You've got to have

ESI, you got to have Caremark, no one else can handle it. That's what your representatives from Express Scripts and Optum and all these places are telling you and if you hear it long enough you start to believe it, but the fact that West Virginia Medicaid could leave this and essentially go to a PBM. They've essentially gone to a processor...and Andy and I were talking about it on the way up here...they have a processor and that processor charges them a fee for doing this, but that processor is not working to enrich themself at every step. So, you're just paying for a service and I would

Andy Becker: "I'm not aware of any states doing that off the top of my head but I'll research that and find out for you."

say...and I'm going to defer, Andy do you, are you aware of any other states that have

Senator Tarr: "Okay, thank you...so and then the transparency part I had a question about as well."

Lynne Fruth: "Yes."

utilized..."

Senator Tarr: "So, we've had problems with employers in West Virginia. Being an employer you're probably aware of this, also have had history with transparency with insurance plans in general."

Lynne Fruth: "Huh! I'm sorry. Yeah."

Senator Tarr: "So...I'll take that as you agree. I know recently the feds have given some transparency, or not transparency, they've given states the ability to go in and do some regulation on ERISA plans."

Lynne Fruth: "Well there have been, there have been two significant cases

federally that have started this ball rolling in terms of being able to...for states to do the

kind of regulation that West Virginia's done. One, was the Arkansas case of Rutledge v.

PCMA where it went all the way to Supreme Court and Supreme Court basically said

ERISA is ERISA but it doesn't have...it cannot dictate payments and that sort of thing so

it can only control certain aspects. If you want more detail on that then I'm going to have

to Andy come up and kind of fill you in specifically."

Senator Tarr: "Well, let me go ahead and get to the question, we'll see if that's

what I'm...in my experience as an employer, and insuring employees, and having a plan

before going to self-insured was that I'm seeing double digit increases in a plan--"

Lynne Fruth: "Right."

Senator Tarr: "—and I'm hearing from your presentation that a large part of that

may be from the pharmacy spend, it sounds like. However, when I would go back and

question those rates, there was nothing legally that would permit to see the spend for our

company."

Lynne Fruth: "That's correct."

Senator Tarr: "So ... so the only way for me to see the spend was to ditch the

company, go to self-insured so I could see what we actually go spend but even then, I

really still can't see the pharmacy spend."

Lynne Fruth: "On self-insured I would, I would hope—"

Senator Tarr: "Take that, partially self-insured—"

43

Lynne Fruth: "Okay—"

Senator Tarr: "—let's put it that way."

Lynne Fruth: "--partially self-insured, you were probably still with a traditional

PBM...with a transparent PBM, which is what Fruth Pharmacy has moved to this year,

away from being fully funded for the first time in the history of our company because I so

firmly believe that commercial insurances are telling me this is how much...this is how

much you spent but then they're going over here and paying the people this much

because we see it on our side. We see examples all the time where a drug will get billed

at an exorbitant amount and Mr. Walker can speak to a particular drug that we researched

to find out...I think it'd be appropriate for you to share that right now."

Senator Tarr: "Well I guess my question is is that is there...are there agreements

between the plan and the PBM that crank up the price of the plan?"

Lynne Fruth: "Oh I—"

Senator Tarr: "You see what I'm saying since you can't—"

Lynne Fruth: "—are you asking me my opinion?"

Senator Tarr: "—well I'm asking if you know? Not necessarily the opinion, I guess

in your investigation, I see—"

Lynne Fruth: "In my investigation—

Senator Tarr: "--Mr. Walker looking over there ... (inaudible)...--"

Lynne Fruth: "—and I will say that...that Mr. Becker and I actually met with

Highmark and had a lengthy discussion about the need for a transparent PBM with the

President, and all the leadership there, and at the end I said, I understand that this is a

source of revenue and that's why you're not going to want to change it."

Senator Tarr: "So I guess the answer's yes."

Lynne Fruth: "So I guess the answer to that is yes, but with a transparent model

you should be able to see, and I would hope that the state would be in a position that says

this prescription got filled or this medical service got performed, what...I don't want to

know we got charged, I want to know what we paid. I can charge you guys \$10,000 dollars

for a prescription but if I only get paid a hundred, that's all I'm getting paid, and all that

rest of that money is going someplace else. So, there is definitely evidence that in

commercial insurances, Aetna has been brought to case for charging \$30,000 dollars for

an operation to the plan sponsor when it was found out that only \$4,000 dollars was

remitted to the hospital. So, that is a practice that I think happens all the time and that's

part of the problem with health insurance and I don't know that we can solve that problem

today but I think that the place to start is if there's money to be saved on the pharmacy

side, that can be your first best pass, and now that Mr. Haught is willing to look at that

and have a true transparent kind of auditor come in and say this is what...based on what

you've dispensed, based on what you've actually spent...this is what we think your rate

should be. Then you're going to have a comparison between what you're actually paying

and what is probably the true cost and I think there will be a difference."

Senator Tarr: "Thank you and thank you Mr. Chairman."

Speaker Hanshaw: "Senator Trump."

45

Senator Trump: "No Mr. Speaker, she answered my questions asked by the Finance Chair."

Lynne Fruth: "Alrighty."

Speaker Hanshaw: "Very well. Questions from any other members? Okay if not, we thank you very much."

Lynne Fruth: "Thank you."

Speaker Hanshaw: "Do we have any other business from any other member to come before the committee today? If not, question before the committee is President Blair's motion that the committee adjourn. Those in favor will please say aye, any opposed will please say no, the ayes have it we are adjourned."

MEMORANDUM

To: Honorable Chairmen and Members of the Joint Committee on

Government and Finance

From: William Spencer, CPA

Director Budget Division Legislative Auditor's Office

Date: December 17, 2021

Re: Review of West Virginia Lottery Financial Information

As of November 30, 2021

We performed an analysis of the Statement of Revenues, Expenses and Changes in Fund Net Position for November 30, 2021, from monthly unaudited financial reports furnished to our office by the West Virginia Lottery Commission. The results are as follows:

Lottery Revenues:

Gross lottery revenues are receipts from on-line games, instant games, table games and video lottery. These gross receipts totaled 529.4 million for July - November of fiscal year 2021-2022. Table games accounted for \$15.5 million of this total. Historic Resort Hotel video lottery accounted for \$3.8 million of total gross receipts. Gross lottery revenue has increased by 17.4% when compared with July - November of fiscal year 2020-2021. This number does not include commission and prize deductions. Gross profit (gross revenues minus commissions and prize costs) for July - November was \$235.4 million; for July - November of last fiscal year it was \$199.4 million. Expressed as a percentage, gross profit is 18% higher for fiscal year 2022 than for

fiscal year 2021.

Operating Transfers to the State of West Virginia:

A total of \$222,871,000.00 has been accrued to the state of West Virginia for fiscal year 2021-2022. This is on an accrual basis and may not correspond to the actual cash transfers made during the same time period. Amount owed to the different accounts according to the Lottery Act are calculated monthly and accrued to the state; actual cash transfers are often made based upon actual cash flow needs of the day-to-day operation of the lottery.

A schedule of cash transfers follows:

State Lottery Fund

Bureau of Senior Services	\$59,003,000.00
Community and Technical College	\$2,497,000.00
Department of Education	\$13,524,000.00

MEMORANDUM

TO: Joint Committee on Government and Finance

FROM: John A. Myers, Director

RE: Monthly Report on Lottery Operations

Month Ending November 30, 2021

DATE: December 16, 2021

This report of the Lottery operations is provided pursuant to the State Lottery Act.

Financial statements of the Lottery for the month ending November 30, 2021 are attached. Lottery revenue, which includes on-line, instant, video lottery sales, table games, and historic resort, sports wagering, and interactive gaming was \$101,472,496 for the month of November.

Transfers of lottery revenue totaling \$42,890,143 made for the month of November to the designated state agencies per Senate Bill 160, Veterans Instant Ticket Fund, Racetrack Video Lottery Act (§29-22A-10), and the Racetrack Table Games Act(§29-22C-27). The amount transferred to each agency is shown in Note 12 on pages 20 and 21 of the attached financial statements.

The number of traditional and limited retailers active as of November 30, 2021 was 1,518 and 1,218 respectively.

A listing of the names and amounts of prize winners has been provided to the Clerk of the Senate, the Clerk of the House and Legislative Services.

If any member of the Committee has questions concerning the Lottery, please call me. Also if any members of the Legislature wish to visit the Lottery offices, I would be pleased to show them our facilities and discuss the Lottery with them.

NOTE 1 - LEGISLATIVE ENACTMENT

The West Virginia Lottery (Lottery) was established by the State Lottery Act (Act) passed April 13, 1985, which created a special fund in the State Treasury designated as the "State Lottery Fund." The purpose of the Act was to establish and implement a state-operated lottery under the supervision of a state lottery commission (Commission) and a director. The Commission consisting of seven members and the Director are appointed by the Governor. Under the Act, the Commission has certain powers and the duty to establish rules for conducting games, to select the type and number of gaming systems or games and to enter into contracts and agreements, and to do all acts necessary or incidental to the performance of its duties and exercise of its power and duty to operate the Lottery in a highly efficient manner. The Act provides that a minimum annual average of 45% of the gross amount received from each lottery shall be allocated for prizes and also provides for certain limitations on expenses necessary for operation and administration of the Lottery. To the extent available, remaining net profits are to be distributed to the State of West Virginia. As the State is able to impose its will over the Lottery, the Lottery is considered a component unit of the State and its financial statements are presented in the comprehensive annual financial report of the State as a blended proprietary fund component unit.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies of the Lottery is presented below.

BASIS OF PRESENTATION — The West Virginia Lottery is a component unit of the State of West Virginia, and is accounted for as a proprietary fund special purpose government engaged in business type activities. In accordance with Governmental Accounting Standards Board (GASB) Statement No. 34, "Basic Financial Statements and Management's Discussion and Analysis for State and Local Governments," and with accounting principles generally accepted in the United States of America, the financial statements are prepared on the accrual basis of accounting which requires recognition of revenue when earned and expenses when incurred. As permitted by Governmental Accounting Standards Board (GASB) Statement No. 20, "Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting," the Lottery has elected not to adopt Financial Accounting Standards Board (FASB) statements and interpretations issued after November 30, 1989 unless the GASB specifically adopts such FASB statements or interpretations.

The Lottery is included in the State's basic financial statements as a proprietary fund and business type activity using the accrual basis of accounting. Because of the Lottery's presentation in these financial statements as a special purpose government engaged in business type activities, there may be differences in presentation of amounts reported in these financial statements and the basic financial statements of the State as a result of major fund determination.

USE OF ESTIMATES – The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make certain estimates and develop assumptions that affect the amounts reported in the financial statements and related notes to financial statements. Actual results could differ from management's estimates.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

LOTTERY GAME OPERATIONS – The West Virginia Lottery derives its revenues from four basic types of lottery games: instant, on-line, video type games, and table games. The Lottery develops multiple game themes and prize structures to comply with its enabling legislation, including aggregate annual minimum prize provisions. All bonded retailers and agents comprised principally of grocery and convenience stores serve as the primary distribution channel for instant and on-line lottery sales to the general public.

The Lottery has contracted with a private vendor to manufacture, distribute, and provide data processing support for instant and on-line games. Under the terms of the agreements, the Lottery pays a percentage of gross revenues or gross profits for the processing and manufacture of the games.

Revenue from instant games is recognized when game tickets are sold to the retailers, and the related prize expense is recorded based on the specific game prize structure. Instant ticket sales and related prizes do not include the value of free plays issued for the purpose of increasing the odds of winning a prize.

Sales of on-line lottery tickets are made by licensed agents to the public with the use of computerized terminals. On-line games include POWERBALL®, a multi-state "jackpot" game; Mega Millions®, a multi-state "jackpot" game; Cash25 "lotto" game; Daily 3 and 4 "numbers" games; and Travel, a daily "keno" game. Revenue is recognized when the agent sells the tickets to the public. Prize expense is recognized on the basis of actual drawing results.

Commissions are paid to instant game retailers and on-line agents at the rate of seven percent of gross sales. A portion of the commission not to exceed one and one quarter percent of gross sales may be paid from unclaimed prize moneys. The amount paid from unclaimed prize moneys is credited against prize costs. In addition, retailers and agents are paid limited bonus incentives that include prize shares on winning tickets they sold and a ticket cashing bonus on winning tickets they cash. On a weekly basis, retailers and agents must remit amounts due to the Lottery. Retailers may not be able to order additional instant tickets if payment has not been made for the previous billing period, while an agent's on-line terminal may be rendered inactive if payment is not received each week. No one retailer or agent accounts for a significant amount of the Lottery's sales or accounts receivable. Historically credit losses have been nominal and no allowance for doubtful accounts receivable is considered necessary.

Video lottery is a self-activated video version of lottery games which is operated by an authorized licensee. The board-operated games allow a player to place bets for the chance to be awarded credits which can either be redeemed for cash or be replayed as additional bets. The coin operated games allow a player to use coins, currency, or tokens to place bets for the chance to receive coin or token awards which may be redeemed for cash or used for replay in the coin operated games. The video lottery games' prize structures are designed to award prizes, or credits, at a stipulated rate of total bets played, and prize expense is netted against total video credits played. The Lottery recognizes as video lottery revenue "gross terminal income" equivalent to all wagers, net of related prizes. Amounts required by statute to be paid to the private and local government entities are reported as commissions. WV Lottery statutes have established specific requirements for video lottery and imposed certain restrictions limiting the licensing for operation of video lottery games to horse and dog racetracks in West Virginia (subject to local county elections permitting the same), limited licensed retailer areas restricted for adult amusement, and licensed historic resort hotels as defined by WV Code.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

The legislation further stipulates the distribution of revenues from video lottery games, and requires any video lottery licensee to be responsible for acquiring the necessary equipment and bearing the risk associated with the costs of operating and marketing the games.

Table games are lotteries as each game involves consideration, the possibility of a prize, and their outcome is determined predominantly by chance, which the common law of West Virginia has long held are the three essential elements of a lottery. Table games are the exclusive intangible intellectual property of the state of West Virginia. Table games legislation has established specific requirements for table games and imposed certain restrictions limiting the licensing for operation of table games to horse and dog racetracks in West Virginia (subject to local county elections permitting the same), and licensed historic resort hotels as defined by WV Code. Each licensee as an agent of the Lottery Commission to operate West Virginia table games shall have written rules of play for each table game it operates which must be approved by the Commission. All wagers and pay-offs of winning wagers shall be made according to those rules of play. For the privilege of holding a table games license, there is levied a privilege tax of thirty-five percent of each licensee's adjusted gross receipts for the operation of West Virginia Lottery table games. Amounts required by statute to be paid to private and local government entities are reported as commissions. The legislation further stipulates the distribution of revenues from West Virginia table games, and requires any licensee to be responsible for acquiring the necessary equipment and bearing the risk associated with the costs of operating and marketing the games.

CASH AND CASH EQUIVALENTS – Cash and cash equivalents primarily consist of interest-earning deposits in an external investment pool maintained by the West Virginia Board of Treasury Investments (BTI). The BTI pool is a 2a-7 like pool carried at amortized cost which approximates fair value of the underlying securities.

INVENTORY — Inventory consists of instant game tickets available for sale to approved Lottery retailers and is carried at cost as determined by the specific identification method.

OTHER ASSETS — Other assets consist of deposits restricted for payment of certain Multi-State Lottery Association activities and prepaid expenses.

CAPITAL ASSETS – The Lottery has adopted a policy of capitalizing assets with individual amounts exceeding \$25,000. These assets include leasehold improvements and purchased equipment, comprised principally of technology property, office furnishings and equipment necessary to administer lottery games, are carried at cost. Depreciation is computed by the straight-line method using three to ten year lives.

ADVERTISING AND PROMOTIONS – The Lottery expenses the costs of advertising and promotions as they are incurred.

COMPENSATED ABSENCES – The Lottery has accrued \$835,830 and \$813,247 at June 30, 2021 and 2020, respectively, for estimated obligations that may arise in connection with compensated absences for vacation at the current rate of employee pay. Employees fully vest in all earned but unused vacation. To the extent that accumulated sick leave is expected to be converted to benefits on termination or retirement, the Lottery participates in another postemployment benefits plan.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

NET POSITION – Net position is presented as restricted, unrestricted and net investment in capital assets which represent the net book value of all property and equipment of the Lottery. When an expense is incurred for purposes for which both restricted and unrestricted net position are available, restricted resources are applied first.

OPERATING REVENUES AND EXPENSES — Operating revenues and expenses for proprietary funds such as the Lottery are revenues and expenses that result from providing services and producing and delivering goods and/or services. Operating revenues for the Lottery are derived from providing various types of lottery games. Operating expenses include commissions, prize costs, other direct costs of providing lottery games, and administrative expenses. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

NOTE 3 - CASH AND CASH EQUIVALENTS

At November 30, 2021 the carrying amounts of deposits (overdraft) with financial institutions were \$492 thousand with a bank balance (overdraft) of \$585 thousand. Of this balance \$250 thousand was covered by federal depository insurance with the remaining balance collateralized with securities held by the State of West Virginia's agent in the State's name.

A summary of the amount on deposit with the West Virginia Board of Treasury Investments (BTI) is as follows (in thousands):

	November 30, 2021		 June 30, 2021
Deposits with financial institutions	\$	492	\$ 461
Cash on hand at the Treasurer's Office		38,334	26,655
Investments with BTI reported as cash equivalents	120,336		 171,467
	\$	159,162	\$ 198,583

The deposits with the BTI are part of the State of West Virginia's consolidated investment cash liquidity pool. Investment income is pro-rated to the Lottery at rates specified by the BTI based on the balance of the deposits maintained in relation to the total deposits of all state agencies participating in the pool. Such funds are available to the Lottery with overnight notice.

NOTE 4 – CAPITAL ASSETS

A summary of capital asset activity for the month ended November 30, 2021 is as follows (in thousands):

Capital Assets:

-	Historical Cost			Historical Cost
	At June 30, 2021	Additions	Deletions	At November 30, 2021
Buildings	48,243	·	-	48,243

Equipment	10,999	-	-	10,999
	\$ 60,923	\$ -	\$ -	\$ 60,923
Accumulated	<u> </u>			B
Depreciation:				
	Historical Cost			Historical Cost
	At June 30, 2021	Additions	Deletions	At November 30, 2021
Buildings	\$ 10,165	\$ 514	\$ -	\$ 10,679
Equipment	8,338	177	-	8,515
	\$ 18,503	\$ 691	\$ -	\$ 19,194

NOTE 5 - PARTICIPATION IN THE MULTI-STATE LOTTERY

The Lottery is a member of the Multi-State Lottery (MUSL), which operates the semi-weekly POWERBALL® jackpot lotto game, the LOTTO AMERICA® game, and the MEGA MILLIONS® jackpot game on behalf of participating state lotteries. MUSL is currently comprised of 33 member state lotteries, including the District of Columbia and the United States Virgin Islands. MUSL is managed by a Board of Directors, which is comprised of the lottery directors or their designee from each of the party states. The Board of Directors' responsibilities to administer the Multi-State Lottery Powerball, Lotto America, and Mega Millions games are performed by advisory committees or panels staffed by officers and independent contractors appointed by the board. These officers and consultants serve at the pleasure of the board and the board prescribes their powers, duties and qualifications. The Executive Committee carries out the budgeting and financing of MUSL, while the board contracts the annual independent audit. A copy of the audit may be obtained by writing to the Multi-State Lottery Association, 1701-48th Street, Suite 210, West Des Moines, Iowa 50266-6723.

Each MUSL member sells game tickets through its agents and makes weekly wire transfers to the MUSL in an amount equivalent to the total prize pool less the amount of prizes won in each state. Lesser prizes are paid directly to the winners by each member lottery. The prize pool for POWERBALL®, LOTTO AMERICA®, and MEGA MILLIONS® is 50% of each drawing period's sales, with minimum jackpot levels. The Lottery's revenues and expenses from MUSL games participation for the month ended November 30, 2021 and fiscal year-to-date is as follows:

NOTE 5 - PARTICIPATION IN THE MULTI-STATE LOTTERY (continued)

Revenues	 Month	-	Y-T-D
Powerball	\$ 2,205,446	\$	13,498,654
Lotto America	335,355		1,863,631
Mega Millions	843,560		5,727,667
Total	\$ 3,384,361	\$	21,089,952
Expenses (Prizes)	 Month		Y-T-D
Powerball	\$ 1,107,134	\$	6,776,461
Lotta America	167,677		931,836
Mega Millions	 421,782		2,863,903
Total	\$ 1,696,593	\$	10,572,200

MUSL places a percentage of game sales from each game in separate prize reserve funds that serve as a contingency reserve to protect the respective MUSL Product Groups from unforeseen prize liabilities. These funds can only be used at the discretion of the respective MUSL Product Group. Once the prize reserve funds exceed the designated limit, the excess becomes part of that particular prize pool. Prize reserve fund monies are refundable to MUSL Product Group members if the MUSL disbands or, after one year, if a member leaves the MUSL. The applicable sales percentage contribution as well as the reserve fund limit for the MUSL games is as follows:

	PowerBall	Lotto America	Mega Millions
Required Contribution (% of sales)	2%	3%	1%
Reserve Fund Cap	\$125,000,000	\$9,000,000	\$45,000,000

At November 30, 2021, the Lotteries share of the prize reserve fund balances were as follows:

Game	Total Prize Reserve	Lottery Share
Powerball	\$ 116,571,666	\$ 1,384,413
Lotto America	4,781,006	361,433
Mega Millions	93,745,481	915,930
Total	\$ 215,098,153	\$ 2,661,776

Lottery prize reserves held by the MUSL are invested according to a Trust agreement the Lottery has with MUSL outlining investment policies. The policies restrict investments to direct obligations of the United States Government, perfected repurchase agreements, and obligations issued or guaranteed as to payment of

NOTE 5 - PARTICIPATION IN THE MULTI-STATE LOTTERY (continued)

principal and interest by agencies or instrumentalities of the United States Government, and mutual funds of approved investments. The average portfolio maturity is never more than one year, except that up to one third of the portfolio may have an average maturity of up to two years. The maximum maturity for any one security does not exceed five years.

The interest earned on prize reserve fund monies is used to pay MUSL operating expenses and any amounts over and above that are credited to an unreserved fund. The Lottery records this as interest when earned. This fund had a balance of \$19,282,318 at November 30, 2021, of which the Lottery's share was \$1,421,892.

NOTE 6 - RACETRACK VIDEO LOTTERY

The Racetrack Video Lottery legislation stipulates the distribution of racetrack video lottery revenues. This legislation has been amended since inception to restate revenue distribution based on revenue benchmarks and has been amended again by HB 101 as passed during the first extraordinary session of 2014. For a complete summary of the impacts of HB 101, see Note 11 titled "Summary Impact of Recent Legislation." Initially, four percent (4%) of gross terminal revenue is allocated for lottery administrative costs. Sixty-six percent (57%) of net terminal revenue (gross less 4%) is allocated in lieu of commissions to: the racetracks (46.5%); other private entities associated with the racing industry (8.7%); and the local county and municipal governments (2%). The remaining revenues (42.8%) of net terminal revenue is allocated for distribution to State as specified in the Racetrack Video Lottery Act or subsequent State budget, as described in the Note 11 titled "Nonoperating Distributions to the State of West Virginia."

The first benchmark occurs when the current year net terminal revenue meets the fiscal year 1999 net terminal revenue. The counties and incorporated municipalities split 50/50 the two percent (2%) net terminal revenue.

The second benchmark occurs when the current year gross terminal revenue meets the fiscal year 2001 gross terminal revenue. The four percent (4%) is no longer allocated for lottery administrative costs; instead the State receives this for distribution as specified by legislation or the State budget.

The final benchmark occurs when the current year net terminal revenue meets the fiscal year 2001 net terminal revenue. At this point a 10% surcharge is applied to net terminal revenue, with 58% of the surcharge allocated for distribution to the State as specified by legislation or the State budget, and 42% of the surcharge allocated to separate capital reinvestment funds for each licensed racetrack.

After deduction of the surcharge, 49% of net terminal revenue is allocated in lieu of commissions to: the racetracks (42%); other private entities associated with the racing industry (5%); and the local county and incorporated municipality governments (2%).

NOTE 6 - RACETRACK VIDEO LOTTERY (continued)

The remaining net terminal revenue (51%) is allocated for distribution to the State as specified in the Racetrack Video Lottery Act or subsequent State budget, as described in Note 11.

Amounts from the capital reinvestment fund may be distributed to each racetrack if qualifying expenditures are made within the statutory timeframe; otherwise, amounts accumulated in the fund revert to the state excess lottery revenue fund.

A summary of racetrack video lottery revenues for the month ended November 30, 2021 and fiscal year-to-date follows (in thousands):

	2022		2021		2022	2021		
Total credits played	\$	418,212	\$	307,471	\$ 2,279,883	\$	1,841,035	
Credits (prizes) won		(375,832)		(276,456)	(2,046,374)		(1,652,560)	
Promotional credits played		(5,878)		(4,524)	(33,921)		(26,848)	
Gross terminal income		36,502		26,491	199,588		161,627	
Administrative costs		(1,460)		(1,060)	(7,984)		(6,465)	
Net Terminal Income		35,042		25,431	191,604		155,162	
Less distribution to agents		(20,026)		(14,534)	(109,502)		(88,675)	
Racetrack video lottery revenues	\$	15,016	\$	10,897	\$ 82,102	\$	66,487	

A summary of video lottery revenues paid or accrued for certain state funds to conform to the legislation as follows (in thousands):

	Nove	Ye	ear-to-Date	
State Lottery Fund	\$	10,513	\$	57,481
State Excess Lottery Revenue Fund		4,503		24,621
Capital Reinvestment Fund		den		
Total nonoperating distributions	\$	15,016	\$	82,102

NOTE 7 - LIMITED VIDEO LOTTERY

Limited video lottery legislation passed in 2001 has established specific requirements imposing certain restrictions limiting the licensing for the operation of limited video lottery games to 9,000 terminals placed in licensed retailers. These licensed retailers must hold a qualifying permit for the sale and consumption on premises of alcohol or non-intoxicating beer. The Lottery has been charged with the administration, monitoring and regulation of these machines. The legislation further stipulates the distribution of revenues from the limited video lottery games, and requires any licensees to comply with all related rules and regulations of the Lottery in order to continue its retailer status. The Limited Video Lottery legislation

NOTE 7 - LIMITED VIDEO LOTTERY (continued)

stipulates that 2% of gross terminal income be deposited into the state lottery fund for administrative costs. Then, the state share percentage of gross profit is to be transferred to the State Excess Lottery Revenue Fund. Such percentage is between 30 and 50 percent and is subject to change on a quarterly basis. Two percent is distributed to counties and incorporated municipalities in the manner prescribed by the statute. The remaining amount of gross profit is paid to retailers and/or operators as prescribed in the Act, and is recorded as limited video lottery commissions in the financial statements. Municipal and county distributions are accounted for as nonoperating expenses.

A summary of limited video lottery revenues for the month ended November 30, 2021 and fiscal year-to-date follows (in thousands):

	Current Month				Year-to-Date					
	2022		2021			2022	2021			
Total credits played	\$	507,825	\$	424,784	\$	2,625,046	\$	2,387,779		
Credits (prizes) won		(469,205)		(392,050)		(2,422,929)		(2,202,885)		
Gross terminal income	\$	38,620	\$	32,734	\$	202,117	\$	184,894		
Administrative costs		(772)		(655)		(4,042)		(3,698)		
Gross Profit		37,848	9 -	32,079		198,075		181,196		
Commissions		(18,924)		(16,040)		(99,037)		(90,598)		
Municipalities and Counties		(757)		(641)		(3,962)		(3,624)		
Limited video lottery revenues	\$	18,167	\$	15,398	\$	95,076	\$	86,974		

NOTE 8 – TABLE GAMES

Table Games legislation passed in 2007 per House Bill 2718. Table games include blackjack, roulette, craps, and various types of poker. Each racetrack licensee is subject to a privilege tax of thirty five percent (35%) of adjusted gross receipts which will be deposited weekly into the Racetrack Table Games Fund.

From the gross amounts deposited into the Racetrack Table Games Fund, the Commission, on a monthly basis shall:

Retain 3% of the adjusted gross receipts for administrative expenses of which at least \$100,000 and not more than \$500,000 annually will be transferred to the Compulsive Gambling Treatment Fund. Transfer two percent of the adjusted gross receipts from each licensed racetrack to the county commissions of the counties where racetracks with West Virginia Lottery table games are located. Transfer three percent of the adjusted gross receipts from each licensed racetrack to the governing bodies of municipalities within counties where racetracks with West Virginia Lottery table games are located as prescribed by statute. And transfer one-half of one percent of the adjusted gross receipts to the governing bodies of municipalities in which a racetrack table games licensee is located to be divided equally among the municipalities. The commission will distribute the remaining amounts, hereinafter referred to as the net amounts in the Racetrack Table Games Funds as follows:

NOTE 8 – TABLE GAMES (continued)

- 1) Transfer four percent into a special fund to be established by the Racing Commission to be used for payment into the pension plan for all employees of each licensed racing association;
- 2) Transfer ten percent, to be divided and paid in equal shares, to each county commission in the state where table games are not located;
- 3) Transfer ten percent, to be divided and paid in equal shares, to the governing bodies of each municipality in the state where table games are not located; and
- 4) Transfer seventy-six percent to the State Excess Lottery Revenue Fund.

The cash transferred to the State Excess Lottery Revenue Fund in the current month is included in Note 11-Nonoperating Distributions to the State of West Virginia. The table games adjusted gross receipts for the month and year ended November 30, 2021 were \$9,951,219 and \$44,208,610, respectively. The following table shows the month and year totals of the privilege tax and the accrued distributions (in thousands) to be transferred in the subsequent month:

	Current Month			Year-to-Date				
	2022		2021		2022			2021
Table Games Privilege Tax	\$	3,483	\$	1,976	\$	15,473	\$	9,915
Interest on Table Games Fund		•		-		1		2
Administrative costs		(299)		(169)		(1,326)		(850)
Total Available for Distribution		3,184		1,807	-	14,148		9,067
Less Distributions:								
Racetrack Purse Funds		224		127		995		637

Excess Lottery Fund	\$	1,708	\$	969	\$	7,592	\$	4,866

NOTE 9 – HISTORIC RESORT HOTEL

In 2009, the Legislature passed Senate Bill 575 which permits video lottery and table games at a licensed historic resort hotel which is defined as "a resort hotel registered with the United States Department of the Interior as a national historic landmark in its National Registry of Historic Places having not fewer than five hundred guest rooms under common ownership and having substantial recreational guest amenities in addition to the gaming facility."

Historic Resort Video Lottery

According to Senate Bill 575, thirty six percent (36%) of gross terminal income is allocated to Historic Resort Hotel Fund and seventeen percent (17%) of gross terminal income is allocated to the Human Resource Benefit Fund. The remaining forty-seven percent (47%) of gross terminal income is then subject to a ten percent (10%) surcharge which is allocated to separate capital reinvestment funds for each licensed historic resort hotel. The remaining forty-two and three-tenths percent (42.3%) of gross terminal income is retained by the historic resort hotel.

A summary of historic resort hotel video lottery revenues for the month ended November 30, 2021 and fiscal year-to-date follows (in thousands):

	2022	 2021		2022	_	2021
Total credits played	\$ 6,365	\$ 5,933	\$	37,052	\$	41,024
Credits (prizes) won Promotional credits played	(5,850) (74)	(5,424) (72)		(34 ,2 16) (391)		(38,167) (599)
Gross terminal income	441	437	-	2,445		2,258

Excess Lottery Fund	(4)	(3)		(22)		(20)
Administrative costs Hotel commissions	(24) (186)	(24) (185)		(132) (1,034)		(122) (955)
Net terminal income	206	 204		1,142		1,055
Historic Resort Hotel Fund	131	130		726		671
Human Resource Benefit Fund	75	74		416		384

NOTE 9 – HISTORIC RESORT HOTEL (continued)

Historic Resort Table Games

Each historic resort hotel licensee is subject to a privilege tax of thirty five percent (35%) of adjusted gross receipts, of which thirty percent (30%) is deposited directly into the Historic Resort Hotel Fund and five percent (5%) is deposited directly into the Human Resource Benefit Fund. The historic resort hotel table games adjusted gross receipts for the month and year ended November 30, 2021 were \$643,197 and \$3,766,732 respectively.

The following table shows the month and fiscal year -to- date totals of the privilege tax and the accrued distributions (in thousands) to be transferred in the subsequent month:

	2022	 2021	2022	2021
Table games privilege tax	\$ 225	\$ 157	\$ 1,318	\$ 1,033

Historic Resort Hotel Fund

Of the monies deposited into the Historic Resort Hotel Fund, fifteen percent (15%) is allocated for lottery administrative costs. The remaining Historic Resort Hotel Fund net income (gross deposits less 15%) is distributed as follows:

- 1) Eighty-six percent (86%) is paid to the State Excess Lottery Revenue Fund;
- 2) Four percent (4%) is paid to the county where the gaming facility is located;
- 3) Two and one-half percent (2.5%) is paid to the municipality where the gaming facility is located as prescribed by statute;
- 4) Two and one-half percent (2.5%) is divided and paid in equal shares to the remaining municipalities in the county where the gaming facility is located;
- 5) Two and one-half percent (2.5%) is divided and paid in equal shares, to each county commission in the state where the gaming facility is not located;
- 6) Two and one-half percent (2.5%) is divided and paid in equal shares, to each municipality in the state not already receiving a distribution as described in item five (5) or item six (6) above.

A summary of Historic Resort Hotel Fund revenues and related distributions is as follows (in thousands):

	Current Month			Year-to-Date

Total Distributions	\$	295	\$	1,687		

NOTE 10-SPORTS WAGERING

Sports Wagering legislation passed in 2018 per Senate Bill 415. Each racetrack and historic resort hotel licensee is subject to a privilege tax of ten percent (10%) of adjusted gross wagering receipts which will be deposited weekly into the Sports Wagering Fund.

From the privilege tax deposited into the Sports Wagering Fund, the Commission, on a monthly basis shall:

Retain 15% for administrative expenses of which any surplus in excess of \$250,000 shall be reported to the Joint Committee on Government and Finance and remitted to the State Treasurer.

After the reduction for administrative expenses, the net profit shall be deposited into the State Lottery Fund until a total of \$15 million is deposited. The remainder of net profit shall be deposited into the Public Employees Insurance Agency Financial Stability Fund.

The Sports Wagering adjusted gross wagering receipts for the month and year-to-date periods ended November 30, 2021 were \$6,843,302 and \$20,991,349, respectively. The following table shows the month and year-to-date totals of the privilege tax and the accrued distributions (in thousands) to be transferred in the subsequent month:

	Current Month			Year-to-Date			
		2022		2021	2022		2021

Administrative Costs		(102)		(69)	(315)		(247)
Total Available for Distribution		582		390	1,784		1,401

NOTE 11- INTERACTIVE WAGERING

Interactive Wagering legislation passed in 2019 per House Bill 2934. Each racetrack and historic resort hotel licensee is subject to a privilege tax of fifteen percent (15%) of adjusted gross interactive gaming receipts which will be deposited weekly into the Interactive Wagering Fund.

From the privilege tax deposited into the Interactive Wagering Fund, the Commission, on a monthly basis shall:

Retain 15% for administrative expenses of which any surplus in excess of \$250,000 shall be reported to the Joint Committee on Government and Finance and remitted to the State Treasurer.

In each fiscal year, the Lottery Commission shall deposit one-quarter of a percent of the net profit into each of the four special funds established by the Racing Commission, pursuant to §29-22A-10 and §29-22C-27 to be used for payment into the pension plan for the employees of the licensed racing associations in this state.

After the reduction for administrative expenses and the pension plans for the racing associations, the net profit shall be deposited into the State Lottery Fund.

The Interactive Wagering adjusted gross interactive gaming receipts for the month and year-to-date periods ended November 30, 2021 were \$6,503,040 and \$29,075,650 respectively. The following table shows the month and year-to-date totals of the privilege tax and the accrued distributions (in thousands) to be transferred in the subsequent month:

	Current Month			Year-to-Date				
	1	2022	_	2021		2022	_	2021

Lottery Fund		821		3,670
Total Distributions	\$	829	\$	3,707

NOTE 12- NONOPERATING DISTRIBUTIONS TO THE STATE OF WEST VIRGINIA

The Lottery periodically distributes surplus funds, exclusive of amounts incurred and derived from limited video lottery and a portion of racetrack video lottery funds, to the State of West Virginia in accordance with the legislation. For the year ending June 30, 2022 the State Legislature budgeted \$125,422,650 of estimated profits of the Lottery for distributions to designated special revenue accounts of the State of West Virginia. With regard to the State Lottery Fund, legislation stipulates that debt service payments be given a priority over all other transfers in instances where estimated profits are not sufficient to provide for payment of all appropriated distributions. Debt service payments of \$1,800,000, \$1,000,000, and \$500,000 per month for the first ten months of each fiscal year currently have such priority. Transfers made pursuant to the State Excess Lottery Revenue Fund have similar requirements; currently payments are \$6,539,201 per month for the first ten months of each fiscal year. In addition, Legislation provides that, if in any month, there is a shortage of funds in the State Excess Lottery Revenue Fund to make debt service payments, the necessary amount shall be transferred from the State Lottery Fund to cover such shortfall, after the State Lottery Fund debt service payments have been made. Repayments to the State Lottery Fund are required to be made in subsequent months as funds become available. For the month ended November 30, 2021 the Lottery has accrued additional distributions of \$139,716,809. The Lottery is a non-appropriated state agency and therefore does not have a legally adopted annual budget.

A summary of the cash distributions made to certain state agencies to conform to the legislation follows (in thousands):

NOTE 13 – LEASES

The Lottery leases, under a cancelable operating lease, its office and warehouse facilities. The Lottery also leases various office equipment under agreements considered to be cancellable operating leases. Rental expense for the fiscal year-to-date ended November 30, 2021 and November 30, 2020 approximated \$104,462 and \$79,903 respectively.

The Lottery leases office space under the terms of a non-cancellable operating lease to various tenants. Rental revenues for the fiscal year-to-date ended November 30, 2021 and November 30, 2020 approximated \$445,538 and \$450,171 respectively.

NOTE 14 – COMMITMENTS

For the years ended June 30, 2021 and 2020 the Lottery Commission has not designated any unexpended administrative funds for the acquisition of capital assets. As of June 30, 2021 and 2020, \$7,612,621 and \$8,073,287, respectively, are included in unrestricted net position and net investment in capital assets for this purpose.

NOTE 15 - RETIREMENT BENEFITS

All full-time Lottery employees are eligible to participate in the State of West Virginia Public Employees' Retirement System (PERS), a cost-sharing multiple-employer defined benefit public employee retirement system. The PERS is one of several plans administered by the West Virginia Consolidated Public Retirement (CPRB) under the direction of its Board of Trustees, which consists of the Governor, State Auditor, State Treasurer, Secretary of the Department of Administration, and nine members appointed by the Governor. CPRB prepares separately issued financial statements covering all retirement systems it administers, which can be obtained from Consolidated Public Retirement Board, 4101 MacCorkle Ave. S.E., Charleston, West Virginia 25304-1636.

Employees who retire at or after age sixty with five or more years of contributory service or who retire at or after age fifty-five and have completed twenty-five years of credited service with age and credited service equal to eighty or greater are eligible for retirement benefits as established by State statute. Retirement benefits are payable monthly for life, in the form of a straight-line annuity equal to two percent of the employee's average annual salary from the highest 36 consecutive months within the last 10 years of employment, multiplied by the number of years of the employee's credited service at the time of retirement.

Covered employees hired prior to July 1, 2015 are required to contribute 4.5% of their salary to the PERS. Covered employees hired on or after July 1, 2015 will contribute 6.0% of their salary to the PERS Tier II. The Lottery is required to contribute 13.5% of covered employees' salaries to the PERS. The required employee and employer contribution percentages have been established and changed from time to time by action of the State Legislature. The required contributions are not actuarially determined; however, actuarial valuations are performed to assist the Legislature in determining appropriate contributions. The Lottery and employee contributions, for the month ending November 30, 2021 and fiscal year-to-date are as follows (in thousands):

	November 30, 2021		Ye	ear-to-Date
Employee contributions	\$	29	\$	167
Lottery contributions	-	60		350
Total contributions	\$	89	\$	517

NOTE 16 - RISK MANAGEMENT

The Lottery is exposed to various risks of loss related to torts; theft of, or damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. The Lottery participates in several risk management programs administered by the State of West Virginia. Each of these risk pools has issued separate audited financial reports on their operations. Those reports include the required supplementary information concerning the reconciliation of claims liabilities by type of contract and ten-year claim development information. Complete financial statements of the individual insurance enterprise funds can be obtained directly from their respective administrative offices.

WORKERS' COMPENSATION INSURANCE

The Lottery carries workers compensation insurance coverage through a commercial insurance carrier. The commercial insurance carrier is paid a monthly rated premium to provide compensation for injuries sustained in the course of employment.

PUBLIC EMPLOYEES' INSURANCE AGENCY (PEIA)

The Lottery participates in the Public Employees' Insurance Agency which provides an employee benefit insurance program to employees. PEIA was established by the State of West Virginia for State agencies, institutions of higher education, Boards of Education and component units of the State. In addition, local governmental entities and certain charitable and public service organizations may request to be covered by PEIA. PEIA provides a base employee benefit insurance program which includes hospital, surgical, major medical, prescription drug and basic life and accidental death. Underwriting and rate setting policies are established by PEIA. The cost of all coverage as determined by PEIA shall be paid by the participants. Premiums are established by PEIA and are paid monthly, and are dependent upon, among other things, coverage required, number of dependents, state vs. non state employees and active employees vs. retired employees and level of compensation. Coverage under these programs is limited to \$1 million lifetime for health and \$10,000 of life insurance coverage.

The PEIA risk pool retains all risks for the health and prescription features of its indemnity plan. PEIA has fully transferred the risks of coverage to the Managed Care Organization (MCO) Plan to the plan provider, and has transferred the risks of the life insurance coverage to a third party insurer. PEIA presently charges equivalent premiums for participants in either the indemnity plan or the MCO Plan. Altogether, PEIA insures approximately 205,000 individuals, including participants and dependents.

BOARD OF RISK AND INSURANCE MANAGEMENT (BRIM)

The Lottery participates in the West Virginia Board of Risk and Insurance Management (BRIM), a common risk pool currently operating as a common risk management and insurance program for all State agencies, component units, and other local governmental agencies who wish to participate. The Lottery pays an annual premium to BRIM for its general insurance coverage. Fund underwriting and rate setting policies are established by BRIM. The cost of all coverage as determined by BRIM shall be paid by the participants. The BRIM risk pool retains the risk of the first \$1 million per property event and purchases excess insurance on losses above that level. Excess coverage, through an outside insurer under this program is limited to \$200 million per event, subject to limits on certain property. BRIM has \$1 million per occurrence coverage maximum on all third-party liability claims.

WEST VIRGINIA LEGISLATURE

Office of the Legislative Auditor

Budget Division Building 1, Room 314-West Wing 1900 Kanawha Blvd. East Charleston, WV 25305-0590

304-347-4870

Memorandum

To: Honorable Chairmen and Members of the Joint Committee on

Government and Finance

From: William Spencer, C.P.A., Director, Budget Division

Legislative Auditor's Office

Date: December 21, 2021

Re: Status of General Revenue Fund and State Road Fund as of

November 30, 2021 (FY 22)

We have read the cash flow of the West Virginia general revenue fund as of November 30, 2021 which is the fifth month of the fiscal year. The status of the fund collections for the month is as follows:

The net collections were 115% of the estimate for the fiscal year. Total collections were \$269.4 million above the estimate for the fiscal year.

Personal Income Tax collections were \$90.6 million above the estimate for the fiscal year.

Consumer sales and use tax collections were \$45.3 million above the estimate for the year.

Severance Tax was \$86.4 million above the estimate for the fiscal year.

Corporate Income and Business Franchise Tax collections were \$43.5 million above the estimate for the fiscal year.

State Road Fund

The state road fund collections were 97% of the estimate for the fiscal year. Total collections were \$12 million below the estimate for the fiscal year.

Rainy Day and Personal Income Tax Reserve

Revenue Shortfall Reserve **Fund A** (Rainy Day Fund) had a cash balance of \$463,162,483.82 as of November 30, 2021.

Balance July 1, 2021	\$441,663,052.88
*Loan-General Revenue Fund 7-1-21	(68,500,000.00)
Loan payback 9-17-21	68,500,000.00
Fiscal year 21 Surplus	15,401,416.45
6-24-21 Special Session appropriation	50,000,000.00
Earnings/(Loss)	(43,901,985.51)
Balance November 30, 2021	\$463,162,483.82

^{*\$68.5} million loan to state General Revenue Fund 7/1/2021 for beginning of the year cash flow, to be repaid within 90 days. Loan was repaid 9-17-21.

Revenue Shortfall Reserve **Fund B** (Tobacco Settlement Monies) had a cash balance of \$564,689,773.93 as of November 30, 2021.

Balance July 1, 2021	\$553,481,351.13
Earnings	11,208,422.80
Balance November 30, 2021	\$564,689,773.93

The **Personal Income Tax Reserve** Fund had a \$11,000,000.00 cash balance as of November 30, 2021.

Balance July 1, 2021	\$11,000,000.00
Balance November 30, 2021	\$11,000,000.00

Re: West Virginia Unemployment Compensation Trust Fund

We have reviewed the November 30, 2021 monthly report of the Unemployment Compensation Trust Fund we received from WorkForce West Virginia.

As of November 30, 2021 of fiscal year 2021-2022, the trust fund cash flow was as follows:

Trust Fund Beginning Cash Balance 7-1-2021	\$ 79,633,106.11
Receipts July 1,2021 thru June 30, 2022	\$ 795,102,309.19
Disbursements July 1, 2021 thru June 30, 2022	\$ 546,288,472.64
Balance November 30, 2021	\$ 328,446,942.66

ITEMS OF NOTE:

Regular benefits paid for July - November 2021 were \$ 52.6 million more than July - November 2020.

Federal emergency benefits totaled negative \$(5098) for July - November 2021. For July - November 2020, federal emergency benefits totaled negative \$(2645).

Total disbursements were \$351.5 million less in July - November 2021 than the preceding July - November 2020.

Receipts as of July - November 2021, were \$114 million less than in July - November 2020. Overall ending trust fund balance was \$308.6 million higher on November 30, 2021 than on November 30, 2020.

Seasonally adjusted unemployment rates for November 2021 were 4.0 percent for West Virginia and 4.2 percent nationally.

Since November 2020, employment has increased by 17,800. Employment increases included 5,300 in leisure and hospitality, 4,800 in trade, transportation and utilities, 2,000 in professional and business services, 1,800 in government, 1,700 in construction, 1,600 in manufacturing, 1,600 in mining and logging, and 600 in other services. Employment declines included 800 in educational and health services, 600 in financial activities and 200 in information.

State Unemployment Rate Drops to 4.0 Percent in November

West Virginia's seasonally adjusted unemployment rate dropped three-tenths of a percentage point to 4.0 percent in November 2021, becoming the lowest seasonally adjusted unemployment rate for the state on record. The number of unemployed state residents decreased by 2,800 to 34,400. Total employment grew by 1,700 over the month. The national unemployment rate declined four-tenths of a percentage point to 4.2 percent in November 2021, continuing the trend of the lowest seasonally adjusted unemployment rates for the nation since the onset of the pandemic.

Total nonfarm payroll employment increased 600 in November, the gain solely in the service-providing sector. Employment in the goods-producing sector was unchanged over the month.

Within the goods producing sector, declines of 200 in mining and logging and 200 in construction offset an increase of 400 in manufacturing. Within the service-providing sector, employment gains included 700 in trade, transportation, and utilities, 500 in professional and business services, 200 in leisure and hospitality, and 100 in other services. Employment declines included 400 in education and health services, 300 in government, and 200 in finance and insurance. Employment in information services was unchanged over the month.

Since November 2020, total nonfarm payroll employment has increased by 17,800. Employment gains included 5,300 in leisure and hospitality, 4,800 in trade, transportation, and utilities, 2,000 in professional and business services, 1,800 in government, 1,700 in construction, 1,600 in mining and logging, 1,600 in manufacturing, and 600 in other services. Employment declines over the year included 800 in education and health services, 600 in financial activities, and 200 in information.

West Virginia's not seasonally adjusted unemployment rate declined three-tenths of a percentage point to 2.6 percent, becoming the lowest not seasonally adjusted unemployment rate on record for the state.

BRIM January 2022 Interim Packet

West Virginia Board of Risk and Insurance Management UNAUDITED BALANCE SHEET AND INCOME STATEMENT For the Four Months Ending October 31, 2021

Talking Points for December 2021/January 2022

- 1. Premium Revenue thru October reflects the premiums earned for the first four months of the fiscal year. BRIM premiums increased slightly in FY'22 based on the actuarially projected estimates for claims costs for the current fiscal year.
- 2. Claims Expense reflects all claims payments made thru October plus reserve increases. Higher net claims payments thru October negatively impacted the results for the current fiscal year vs. last year.
- **3. Investment Income** for the current year reflects a net gain of \$1.3 million for the first four months primarily vs. \$6.0 million for same period last year that was driven by better equity returns.
- **4.** BRIM has no un-funded liability and continues to pursue pro-active loss control initiatives.

PEIA January 2022 Interim Packet

PEIA January Interim Talking Points

- > PEIA and RHBT year to date financial statements for October 31, 2021 are available for your review.
- > PEIA statements indicate PEIA is currently behind plan by \$10 million. This is due to higher than forecast medical claims.
- > RHBT statements indicate RHBT is currently behind plan by \$1 million. This is due to lower than forecast investment income.
- > The 2022 year-end reserve for the State Fund, non-State Fund and RHBT is projected to be \$141, \$33 and \$68 million respectively.
- > These reserve levels represent 22%, 22% and 37% of the respective funds' expenses. The required reserve for the State Fund is 14% of expenses.

⁽¹⁾ Unduplicated slots used refers to the total number of members who accessed services during the fiscal year.

⁽² and 3) Numbers determined medically eligible and ineligible reflect the activity for the month reported. Financial eligibility is not determined until after slot release.

⁽⁴⁾ Monthly managed enrollment is being reported in the month an applicant is determined medically eligible; however, the individual's placement date on the managed enrollment list will be based on the date the Medical Eligibility Contract Agent (MECA) determines medical eligibility.

⁽⁵⁾ Currently there is no way to track other reasons why someone may leave the MEL for reasons such as moved out of state, decided not to participate in program, etc.

⁽⁶⁾ Other reason for program discharge may include, but is not limited to, member is no longer financial or medically eligible, moved out of state, no longer wants the service, etc.

⁽⁷⁾ Longest number of days an applicant has been on the MEL.

Footnotes:

- 1) Statement is on cash basis.
- 2) Estimate of Incurred but Not Reported (IBNR) claims on October 31, 2021 is \$740,000. The October 31, 2020 estimate was \$4,170,000.
- 3) Administrative Accounts Payable balance on October 31, 2021 was \$248,785. The October 31, 2020 balance was \$284,620.

 4) 2022 and 2021 adjustments to fund balance represent timing issues between the payment of expense and the draw-down of federal revenues.
- 5) Revenues are primarily federal funds. WVCHIP's Federal Matching Assistance Percentage (FMAP) during SFY22 is 85.0%. FMAP during SFY21 was 98.3% through 09/30/20 and 85.00% starting
- 6) Other Collections are primarily provider refunds and subrogation (amounts received from other insurers responsible for bills WVCHIP paid primarily auto). 7) Physician & Surgical services include physicians, clinics, lab, Federally Qualified Health Centers (FQHC), and vaccine payments.
- 8) Other Services include home health, chiropractors, psychologists, podiatrists, and nurse practitioners.

 9) Eligibility costs outside the fund represent the costs allocated to the WVCHIP for eligibility and enrollment processing (RAPIDS/WVPATH). Operating fund costs represent those directly billed to WVCHIP.

The above map shows the most recent 2018 county level data provided by the U.S. Census Bureau Small Area Health Insurance Estimates (SAHIE) for children under 19 years. While the statewide average for children under 19 is now about 3.4%, the SAHIE data reflects more accurately the variation from county to county depending on the availability of employer-sponsored insurance and should be a more accurate way to target outreach than in previous years.

The report may not be sold or otherwise provided, in whole or in part, to any other person or entity without written permission from Verus Advisory, Inc., (hereinafter Verus) or as required by law or any regulatory authority. The information presented does not constitute a recommendation by Verus and cannot be used for advertising or sales promotion purposes. This does not constitute an offer or a solicitation of an offer to buy or sell securities, commodities or any other financial instruments or products.

The information presented has been prepared using data from third party sources that Verus believes to be reliable. While Verus exercised reasonable professional care in preparing the report, it cannot guarantee the accuracy of the information provided by third party sources. Therefore, Verus makes no representations or warranties as to the accuracy of the information presented. Verus takes no responsibility or liability (including damages) for any error, omission, or inaccuracy in the data supplied by any third party. Nothing contained herein is, or should be relied on as a promise, representation, or guarantee as to future performance or a particular outcome. Even with portfolio diversification, asset allocation, and a long-term approach, investing involves risk of loss that the investor should be prepared to bear.

The information presented may be deemed to contain forward-looking information. Examples of forward looking information include, but are not limited to, (a) projections of or statements regarding return on investment, future earnings, interest income, other income, growth prospects, capital structure and other financial terms, (b) statements of plans or objectives of management, (c) statements of future economic performance, and (d) statements of assumptions, such as economic conditions underlying other statements. Such forward-looking information can be identified by the use of forward looking terminology such as believes, expects, may, will, should, anticipates, or the negative of any of the foregoing or other variations thereon comparable terminology, or by discussion of strategy. No assurance can be given that the future results described by the forward-looking information will be achieved. Such statements are subject to risks, uncertainties, and other factors which could cause the actual results to differ materially from future results expressed or implied by such forward looking information. The findings, rankings, and opinions expressed herein are the intellectual property of Verus and are subject to change without notice. The information presented does not claim to be all-inclusive, nor does it contain all information that clients may desire for their purposes. The information presented should be read in conjunction with any other material provided by Verus, investment managers, and custodians.

Verus will make every reasonable effort to obtain and include accurate market values. However, if managers or custodians are unable to provide the reporting period's market values prior to the report issuance, Verus may use the last reported market value or make estimates based on the manager's stated or estimated returns and other information available at the time. These estimates may differ materially from the actual value. Hedge fund market values presented in this report are provided by the fund manager or custodian. Market values presented for private equity investments reflect the last reported NAV by the custodian or manager net of capital calls and distributions as of the end of the reporting period. These values are estimates and may differ materially from the investments actual value. Private equity managers report performance using an internal rate of return (IRR), which differs from the time-weighted rate of return (TWRR) calculation done by Verus. It is inappropriate to compare IRR and TWRR to each other. IRR figures reported in the illiquid alternative pages are provided by the respective managers, and Verus has not made any attempts to verify these returns. Until a partnership is liquidated (typically over 10-12 years), the IRR is only an interim estimated return. The actual IRR performance of any LP is not known until the final liquidation.

Verus receives universe data from InvMetrics, eVestment Alliance, and Morningstar. We believe this data to be robust and appropriate for peer comparison. Nevertheless, these universes may not be comprehensive of all peer investors/managers but rather of the investors/managers that comprise that database. The resulting universe composition is not static and will change over time. Returns are annualized when they cover more than one year. Investment managers may revise their data after report distribution. Verus will make the appropriate correction to the client account but may or may not disclose the change to the client based on the materiality of the change.

WEST VIRGINIA OFFICES OF THE INSURANCE COMMISSIONER

Allan L. McVey Insurance Commissioner

Status Report:

Workers' Compensation

Joint Committee on Government & Finance

December 2021

Table of Contents:

Old Fund Cash Statements	12
Coal Workers Pneumoconiosis Fund Cash Statement	13
Self-Insured Guaranty Fund Cash Statement	14
Self-Insured Security Fund Cash Statement	15
Uninsured Employers' Fund Cash Statement	16

Introduction

The passage of S.B. 1004 in January 2005 brought significant changes to workers' compensation insurance in West Virginia. The State-administered monopolistic system effectively ended when a new, legislatively-created domestic mutual insurance company, "BrickStreet", was formed to thereafter issue workers' compensation insurance. BrickStreet began writing new workers' compensation insurance policies in January 2006 (Brickstreet also retained the workers' compensation insurance premium and incurred liability starting in July 2005). The West Virginia workers' compensation insurance market was further privatized and opened to full competition beginning in July 2008.

When Brickstreet was formed to begin to privatize the workers' compensation insurance market in West Virginia, a large legacy liability existed stemming from the historical operation of the State-administered monopolistic fund. This legacy liability was retained by the State of West Virginia in what is known as the "Old Fund." The Old Fund consists of all historical claims with dates of injuries or last exposure through June 30, 2005. In addition to the following sections that specifically reference other "funds," the "private market," or the "self-insured" community (which began in July 2004), this report to the Joint Committee on Government & Finance concerns the workers' compensation legacy liability of the State of West Virginia, i.e., the Old Fund.

As of January 2008, there were 47,961 active Old Fund workers' compensation insurance claims. In December 2020, the number of active claims fell to less than 10,000 for the first time and, as of November 2021, there were 8,445 active claims. The first Workers' Compensation Status Report to the Joint Committee on Government and Finance was issued in June 2008. The following pages update the status of the various workers' compensation funds and the activities associated with the administration of the workers' compensation responsibilities transitioned to the Insurance Commissioner by the Legislature.

¹ As a result of their merger, Motorists Insurance Group and BrickStreet Mutual Insurance Co. are now the **Encova Mutual Insurance Group**.

Definitions:

Appeal (BOR): A formal procedure conducted by the Board of Review at which a decision of an administrative law judge (OOJ) having presided over a matter of workers' compensation (Old Fund or Privately Insured) is to be afforded additional consideration. An appeal may be filed by any aggrieved party, such as a claimant, employer, dependent of a claimant, private insurance carrier, etc.

Board of Review: (BOR) A three judge panel that serves as an intermediate appellate tribunal in workers' compensation litigation. Specifically, the Board of Review reviews all appeals taken from any final decision of the Office of Judges. The BOR may reverse, vacate, modify, or remand a decision of the Office of Judges. Any appeal taken from a Board of Review final order must be filed with the West Virginia Supreme Court of Appeals.

<u>Claim Reserve</u>: individual claim level cost estimate that is projected on the ultimate probable exposure; must be the best projection based on the facts and findings of the claim. This function is to capture the key components that impact the range of any impending cost in workers' compensation claims. No discounting is applied. The Indemnity Reserve is adjusted to cover the cost of loss or exposure both on a temporary and permanent basis. The reserve should also be adjusted to include the projected cost of any death and/or dependent benefits when appropriate. The Medical Reserve covers medical cost, hospital stays, specialized treatment, rehabilitation, durable medical equipment, and medications, etc. The Expense Reserve is placed for the cost of legal defense and investigations, etc. The reserves may be reduced based on the findings of early mortality factors.

Coal Workers' Pneumoconiosis Fund (CWP): State managed fund into which FBL premiums previously received are held, and out of which FBL benefits are paid. This fund was closed to future liabilities as of 12/31/2005. Because of the latency period between the date of last exposure and the onset of disease, new FBL claims will occur.

Fatal: claim under which the worker died as a result of injury or illness.

FBL: claim for Occupational Pneumoconiosis (Black Lung) benefits under Title IV of the federal Coal Mine Health and Safety Act of 1969, i.e. "Federal Black Lung", or FBL.

FBL Awarded Claim: an FBL claim that has been awarded but has not yet been accepted by the responsible operator/insurer

FBL Claim Notice: an FBL claim for which not initial decision has yet been made, but evidence in the claims indicates the potential for an award

<u>FBL Non-active Claim:</u> an FBL claim for which an award had been sought but was not afforded. Federal statues permit an appeal process which lasts for 1 year, so the claim would be reopened for consideration upon appeal. Denied FBL claims are closed administratively after 6 months, as the TPA's bill for claims management services monthly on an open claims basis.

FBL Paying Claim: an FBL claim for which an award has been made and the responsible operator/insurer has accepted liability. Payments are being made to the claimant or dependents.

<u>Indemnity</u>: statutory wage replacement benefits awarded as a result of a worker's occupational illness or injury.

<u>Med Only:</u> claim under which <u>only</u> the payment of medical benefits was sought or awarded, i.e. no payment of wage replacement benefits (indemnity) is being made.

Office of Judges: (OOJ) An office comprised of administrative law judges who are charged with resolving protests or appeals to workers' compensation claims management decisions. The Office of Judges conducts hearings, receives, and weighs evidence and arguments, and issues written decisions on protests or appeals from initial claim management decisions. Any final decision of the Office of Judges may be appealed to the workers' compensation Board of Review. The OOJ hears protests involving Old Fund claims as well as those arising from the private market (private carrier or privately insured.)

<u>Old Fund</u>: The residual assets and liabilities of the former Worker's Compensation Fund are now reported in a fund known as the Workers' Compensation Old Fund. Disbursements from the Old Fund are related to the liabilities and appropriate administrative expenses necessary for the administration of all claims, actual and incurred but not reported, for any claims with a date of injury on or before June 30, 2005.

<u>OP/OD</u>: claim of Occupational Pneumoconiosis or Occupational Disease. An OP claim could be considered the State level equivalent of an FBL claim; however, State OP claims provide for varying percentages of impairment where the FBL applicant must prove total impairment to be eligible. (State OP claims are awarded more frequently than FBL but afford lesser benefits.) An example of an OD claim would be occupational hearing loss.

<u>Protest (OOJ)</u>: An objection to a ruling of a workers' compensation claim administrator (Old Fund or Private Market) which prompts the initiation of the adjudication process at the Office of Judges.

<u>PPD</u>: (Permanent Partial Disability) paid to compensate an injured worker for permanent impairment that results from an occupational injury or disease. The American Medical Association defines permanent impairment as impairment that has become static or well stabilized with or without medical treatment and is not likely to remit despite medical treatment. It should be noted, some injuries that are total loss by severance have statutory impairment ratings that are defined per WV Code §23-4-6(f). Payment for PPD is based upon 4 weeks of compensation for each one percent of disability.

<u>PTD:</u> (Permanent Total Disability) A disability which renders a claimant unable to engage in gainful employment requiring skills or abilities which can be acquired, or which are comparable to those of any gainful employment in which the claimant previously engaged with some regularity. While the comparison of pre-injury income and post-disability income is not a factor to be considered in determining whether or not a claimant is permanently and totally disabled, the geographic availability of gainful employment should be considered. Specifically, the geographic availability of gainful employment within a 75-mile driving distance of the claimant's home, or within the distance from the claimant's home to his or her pre-injury employment, whichever is greater, is a factor to be considered in determining whether or not a claimant is PTD.

<u>Self-Insured:</u> an employer who has met certain specific guidelines, and who is then permitted to guarantee their own payment and handling of workers' compensation claims to their employees in accordance with WV statutes.

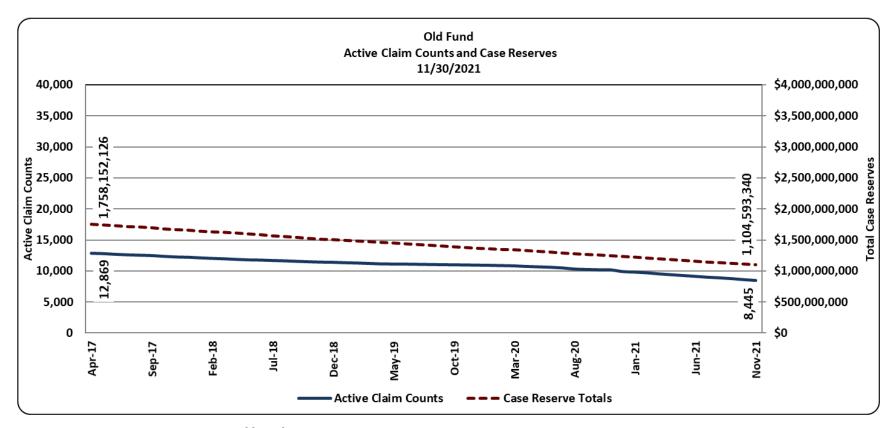

<u>Self-Insured Guaranty Fund:</u> State managed fund consisting of those funds transferred to it from the guaranty pool created pursuant to 85 CSR §19 (2004) and any future funds collected through continued administration of that exempt legislative rule as administered by the WVOIC and out of which workers' compensation benefits may be paid. Covers claims liabilities of bankrupt or defaulted self-insured employers with dates of injury or last exposure <u>after</u> 07/01/2004.

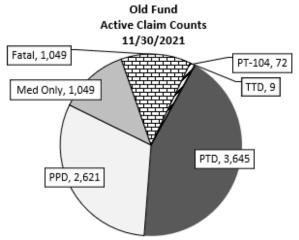

<u>Self-Insured Security Fund:</u> State managed fund consisting of those funds paid into it thru the WVOIC's administration of 85 CSR §19 (2004), and out of which workers' compensation benefits may be paid. Covers claims liabilities of bankrupt or defaulted self-insured employers with dates of injury or last exposure <u>before</u> 07/01/2004. This fund is limited to claimants of those self-insured employers who have defaulted on their claims obligations after 12/31/2005.

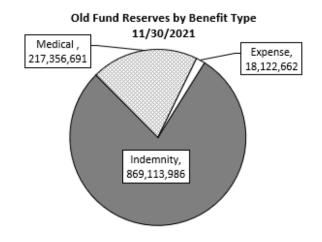

<u>TPD:</u> (Temporary Partial Disability) also referred to as TPR, is paid when an injured worker is released to return to work with restrictions or modifications that restrict, he/she from obtaining their pre-injury wages. The TPD benefit is paid at seventy percent of the difference between the average weekly wage earnings earned at the time of injury and the average weekly wage earnings earned at the new employment.

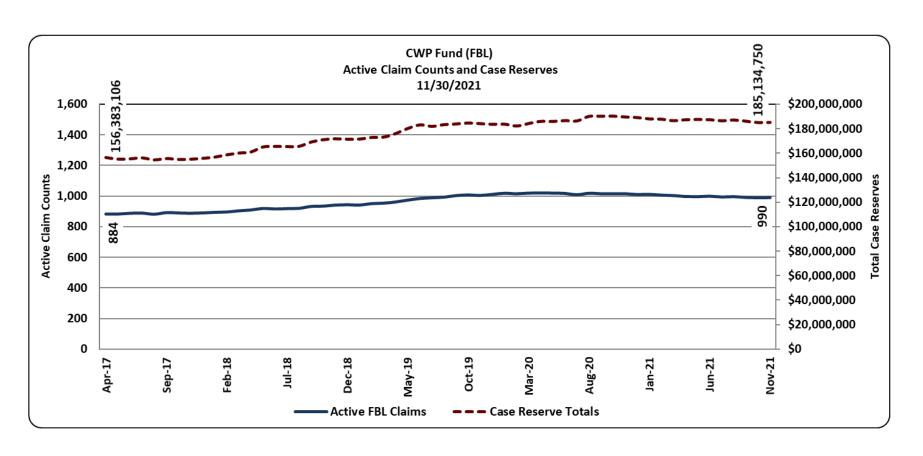

<u>TTD:</u> (Temporary Total Disability) an inability to return to substantial gainful employment requiring skills or activities comparable to those of one's previous gainful employment during the healing or recovery period after the injury. In order to receive TTD benefits, the injured worker must be certified disabled due to the compensable injury by his/her treating physician.

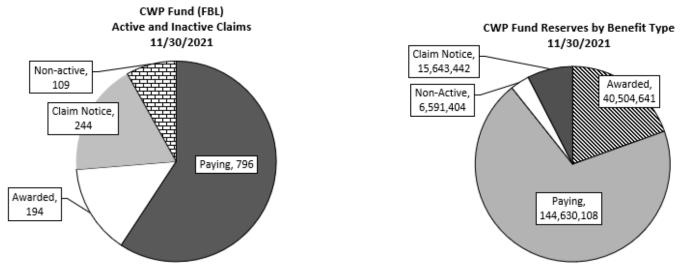

<u>Uninsured Fund:</u> State managed fund into which assessments to carriers or employers received are held, and out of which workers' compensation benefits may be paid to claimant employees of employers who were uninsured if the date of injury or date of last exposure is January 1, 2006 or later.

Note: The purpose of this report is to enhance the user's ability to monitor the cash activities of the Old Fund. The Old Fund assets consist of cash and investments with the WV Investment Board. Investment earnings are presented in the month in which the State Treasurer records the earnings in the statewide accounting system, wvOASIS. The liabilities of the Old Fund consist of the worker's compensation claims and related expenses for all claims, actual and incurred but not reported for claims with dates of injury on or before June 30, 2005. This report is intended to provide a summary of the cash based transactions related to the Fund's assets and liabilities and is not an accrual based presentation. The Old Fund Cash Statement is unaudited information.

Note: The Coal Worker's Pneumoconiosis Fund (CWP Fund) ceased operations December 31, 2005 and is in run-off status under the administrative oversight of the Insurance Commissioner. Established in 1973, the CWP Fund existed to provide insurance coverage to companies for liabilities incurred as a result of the Federal Coal Mine Health and Safety Act of 1969. Participation in the CWP Fund was voluntary for employers. The current revenues of the CWP Fund are limited to the earnings from invested assets. Assets of the CWP Fund are invested with the WV Investment Management Board. The investment earnings are presented in the month in which the State Treasurer records the earnings. The liabilities of the CWP Fund consist of the claims for coal miners who are totally disabled or beneficiaries of coal miners who have died as a result of coal worker's pneumoconiosis. To be eligible for benefits from the CWP Fund, the date of last exposure of the coal miner must be on or before December 31, 2005. The Coal Workers Cash Statement is unaudited information.

The Self-Insured Guaranty Risk Pool covers the claims liabilities of bankrupt or defaulted self-insured employers with dates of injury subsequent to July 1, 2004. The revenues of the Self-Insured Guaranty Fund are comprised of the guaranty risk pool assessments levied on all self-insured employers and the earnings on invested assets. The assets of the Self-insured Guaranty Risk Pool are invested with the WV Investment Management Board. Investment earnings are presented in the month in which the State Treasurer records the earnings in the statewide accounting system, wvOASIS. The Self Insured Guaranty Cash Statement is unaudited information.

The Self-Insured Security Risk Pool is liable for the worker's compensation claims of bankrupt or defaulted self-insured employers with dates of injury prior to July 1, 2004. However, the obligations of this Fund are limited to the exposures of self-insured employers who default subsequent to December 31, 2005. The assets of the Self-insured Security Risk Pool are invested with the WV Investment Management Board. Investment earnings are presented in the month in which the State Treasurer records the earnings in the statewide accounting system, wvOASIS. The Self Insured Security Cash Statement is unaudited information.

The Uninsured Employer's Fund (UEF) was established January 1, 2006 to provide worker's compensation benefits to injured workers of uninsured WV employers. The revenues of the UEF consist of fines levied on uninsured employers and the earnings on invested assets. The assets of the UEF are invested with the WV Investment Management Board. Investment earnings are presented in the month in which the State Treasurer records the earnings in the statewide accounting system, wvOASIS. The Insurance Commissioner has the right to levy assessments on employers in order to maintain the solvency of the Fund. The Commissioner may recover all payments made from this fund, including interest, from an uninsured employer who is found liable for benefits paid from the UEF. The Uninsured Cash Statement is unaudited information.

WEST VIRGINIA BOARD OF TREASURY INVESTMENTS THE ECONOMIC STATE NOVEMBER 2021

Omicron Fears Send Markets Skidding

Equity Markets

For the better part of the month, it seemed stocks would be adding to, or at least holding on to, the strong gains of October. Then news of the Omicron Covid-19 variant dropped just before the Thanksgiving holiday sending markets on a skid. Stocks remained choppy in the days that followed before closing November with a thud when Federal Reserve Chair Jay Powell suggested support for a quicker taper of the Fed's bond buying program. Ending bond purchases a few months earlier could mean that interest rate hikes begin sooner. It is also now clear that the Chairman and his colleagues are more concerned about the threat of inflation to the U.S. economy than was evident only a few months ago. News of the variant's arrival in the U.S. on December 1 resulted in material intra-day volatility, with the VIX (known as the fear index) rising throughout the month.

The S&P 500 returned -0.7% for the month but is still up over 23% year-to-date. Large cap stocks (-1.3%) weathered the storm much better than mid caps (-3.5%) and small caps (-4.2%), with large cap growth stocks (+0.6) managing to tread water. Similarly, across market caps, growth stocks (+0.3%) benefitted from exposure to fast growing technology names and lower bond yields, while value stocks (-3.5%) including airline, energy, and financial sectors stocks (i.e., the "re-opening" stocks) were throttled. International (-4.7%) and emerging markets (-4.1%) stocks were no haven as the global economic growth prospects hang in the balance.

Fixed Income Markets

Treasury yields fell and the yield curve flattened as market volatility increased. The 10-year yield dropped from a November high of 1.68% to close the month at 1.46%. Falling yields helped Treasury bonds (+0.8%) and long duration bonds (+2.7%), while the core Bloomberg U.S. Aggregate (+0.3%) clawed back some of its year-to-date losses. Meanwhile, investment grade credit (+0.1%) was flat and high yield (-1.0%) followed stocks lower. High yield year-to-date returns (+3.3%) remain strong relative to other bond market sectors. Meanwhile for obvious reasons inflation adjusted TIPS (+5.6%) remain a top performer in the liquid fixed income markets.

With U.S. stocks up over 20%, and only a few weeks remaining in the calendar year, the severity of the latest variant and the Fed's December meeting remain in focus. So far markets seem to have taken the early stages of the Fed's gradual "unwind" in stride. Of course, the prospect of rising interest rates sooner next year, once tapering is complete, could be a tougher pill to swallow. In any case, the last week has once again shown that in today's world even the best laid plans are only a breaking headline away from being upended.

It may not seem real to you yet either, but we have already turned the page to the final chapter of 2021. We wish you and your families a healthy and happy holiday season, and whether virtually or in-person, we look forward to seeing you in the days, weeks, and months ahead.
