December 11, 2009

The Committee's Chairman, Dr. H. Richard Marshall, Jr., determined this meeting was properly noticed with the Secretary of State's office and a sufficient number of members were in attendance to constitute a quorum. The quorum was determined by the presence of Drs. Marshall, Gilbert, William Marshall, Nelson, Patnoe, Thorne, and Weaver. Therefore, the meeting of the West Virginia Board of Dental Examiners Subcommittee on Anesthesia was called to order.

The first order of business was the meeting notice to the Secretary of State's Office which was distributed for information purposes only.

The next order of business were the evaluations and inspection for 2010. The committee members divided the evaluations and inspections, with the final list to be provided to them by Board staff.

The next order of business was the approval of the minutes of the June, 2008 meeting. Upon motion by Dr. William R. Marshall, and properly seconded by Dr. Lewis D. Gilbert, and unanimously passed, the minutes were approved.

The next order of business was the roster of Committee Members which was distributed for information purposes only.

The next order of business were the permit holders records which were distributed for information purposes only.

The next order of business was a list of Oral Surgeon permit holders which were distributed for information purposes only.

The next order of business were the applications and evaluations forms which were distributed for information purposes only.

The next order of business was the Class 2 audit form which was distributed for information purposes only.

The next order of business was the chart auditing form which was distributed for information purposes only.

The Committee requested the Chairman present the following recommendations to the Board:

That permit holders be required to report who their monitors are, how they became monitors and any monitor staff changes as they occur. Also, if a monitor has become qualified by PALS or ACLS, they will be required to maintain that certification.

That life threatening or irreversible injuries be required to be reported to the Board by all dentists within five days.

Regardless of who is administering the anesthetic medication, the dentist must have the level of permit as the anesthesia technique being provided. A CRNA can only practice the level of sedation to the level of the dentists permit.

Facilities must be inspected and approved to the level of a class 4 permit when sedations are being done by an MD or D.O. (A non-dentist physician). The permit must be displayed in the dental office.

If a dentist utilizes a West Virginia licensed Dentist Anesthesiologist to provide sedation/anesthesia in his/her office the office would have to be inspected to the level permit held at that time by the anesthesiologist, and is only approved when the dental anesthesiologist is present. The dentist would not have to have a like permit, but would be required to have the proper number of qualified monitors present as required by the Anesthesia Law.

Again, the Committee recommends the Board require registration of nitrous oxide machines used by dentists in their practice asking for the make and model number of every nitrous oxide machine on their license renewal application. This would help to identify the presence of a scavenger system and also help to know if they could be using nitrous in conjunction with oral sedatives without a permit when this question comes up during pharmacy reviews.

Members serving on the anesthesia committee will be able to apply up to five hours of continuing education credits for serving on the anesthesia committee to the C. E. requirements currently in place to maintain licensure.

The meeting was adjourned with the next meeting to take place on the morning of March 18, 2010, at the Waterfront Place Hotel, Morgantown, West Virginia.

Dr. Don Skaff has relayed to the Committee that he is willing to come back on the Committee. Drs. Bryan Weaver and Timothy Thorne will stay on for another term. Dr. Lewis Gilbert will let us know by July and the office staff will check with Dr. William Marshall if he will stay for another term.

The next order of business was an updated list of the evaluations and inspections due for 2010.

The next order of business were the permit holders records which were distributed for information purposes only.

The next order of business was a list of Oral Surgeon permit holders which were distributed for information purposes only.

The next order of business was a list of General Dentist permit holders which were distributed for information purposes only.

The next order of business was a list of Pediatric Dentist permit holders which were distributed for information purposes only.

The next order of business was a list of Periodontist permit holders which were distributed for information purposes only.

The next order of business were the evaluation and renewal forms which were distributed for information purposes only.

The next order of business was the Class 2 audit form which was distributed for information purposes only.

The next order of business was the chart auditing form which was distributed for information purposes only.

Dr. Lewis D. Gilbert discussed duties of anesthesia committee members when conducting exams and inspections or delivering subpoenas for records, i.e. use of digital cameras.

The Committee requested the Chairman to again present the following recommendations to the Board:

That permit holders be required to report who their monitors are, how they became monitors and any monitor staff changes as they occur. That anesthesia monitors be registered and required to renew on an annual basis. If a monitor has become qualified by PALS or ACLS, they will be required to maintain that certification every two years. Monitors certified by other courses, be required to retake those courses every five years.

That life threatening or irreversible injuries be required to be reported to the Board by all dentists within five days.

Regardless of who is administering the anesthetic medication, the dentist must have the level of permit as the anesthesia technique being provided. A CRNA can only practice the level of sedation to the level of the dentists permit.

Facilities must be inspected and approved to the level of a class 4 permit when sedations are being done by an MD or D.O. (A non-dentist physician). The permit must be displayed in the dental office.

If a dentist utilizes a West Virginia licensed Dentist Anesthesiologist to provide sedation/anesthesia in his/her office the office would have to be inspected to the level permit held at that time by the anesthesiologist, and is only approved when the dental anesthesiologist is present. The dentist would not have to have a like permit, but would be required to have the proper number of qualified monitors present as required by the Anesthesia Law.

Again, the Committee recommends the Board require registration of nitrous oxide machines used by dentists in their practice asking for the make and model number of every nitrous oxide machine on their license renewal application. This would help to identify the presence of a scavenger system and also help to know if they could be using nitrous in conjunction with oral sedatives without a permit when this question comes up during pharmacy reviews.

Members serving on the anesthesia committee will be able to apply up to five hours of continuing education credits for serving on the anesthesia committee to the C. E. requirements currently in place to maintain licensure.

The meeting was adjourned with the next meeting to be determined.
