West Virginia Medical Professionals Health Program (WVMPHP)

In response to legislation signed into law on March 18, 2007, which authorized the WV Board of Medicine and the WV Board of Osteopathy to designate “programs in which physicians, podiatrists and physician assistants may be monitored while they pursue treatment and recovery for alcohol abuse, chemical dependency or major mental illness; enrolling on a voluntary basis without being subject to disciplinary action if the person complies with the goals and restrictions of the program,” the West Virginia Board of Osteopathy has designated the WVMPHP to fulfill this function. The legislation allows for confidential participation without the full knowledge of either board if treatment is related to self-administration of alcohol and other drugs and there is no evidence of patient harm. Physicians under investigation of either board may also be enrolled in the program while the appropriate board continues to investigate and/or take disciplinary action against the physician. When any physician enters the program, staff will check for any known board action against him or her. The mission of the program is “To protect healthcare consumers through seeking the early identification and rehabilitation of physicians, surgeons, and other healthcare professionals with potentially impairing health concerns including abuse of mood-altering drugs including alcohol, mental illness or physical illness affecting competency so that physicians, surgeons, and other healthcare professionals so afflicted may be treated, monitored and returned to the safe practice of their profession to the benefit of the healthcare profession and the patients we serve.”

Joseph Selby, M.D. is chair of the WVMPHP Board and P. Bradley Hall, M.D. is the medical director. You may contact the organization located in Charleston at 304-414-0400 or you may contact Dr. Hall at 304-677-9283. The e-mail address is pbh2006@hughes.net.

Drug Enforcement Administration—Schedule II Substances

Per information obtained from the DEA website: “A prescription for a controlled substance must be issued for a legitimate medical purpose by a practitioner acting in the usual course of professional practice. The practitioner is responsible for the proper prescribing and dispensing of controlled substances. Schedule II controlled substances require a written prescription which must be signed by the practitioner. An oral order is only permitted in an emergency situation. The refilling of a prescription for a Schedule II controlled substance is prohibited.”

Effective December 19, 2007, an individual practitioner may issue multiple prescriptions authorizing the patient to receive a total of up to a 90-day supply of a Schedule II controlled substance provided certain conditions are met, one of which allows the physician to indicate the earliest date on which a pharmacy may fill each prescription.

“In order to expedite the filling of a prescription, a prescriber may transmit a Schedule II prescription to the pharmacy by facsimile, but the original Schedule II prescription must be presented to the pharmacist for review prior to the actual dispensing of the controlled substance.”

An emergency prescription for a Schedule II Controlled Substance can be called in by the prescriber, but only for the amount needed during the emergency period. The prescriber must provide a written and signed prescription to the pharmacist within 7 days.

No controlled substance in Schedules III or IV may be dispensed without a written or oral prescription. These may not be filled or refilled more than 6 months after the date thereof or be refilled more than 5 times after the date of the prescription unless renewed by the practitioner.

For more information, please go to www.dea.gov.

Medicare & Medicaid E-Prescribing

E-prescribing is optional for physicians and pharmacies, but Medicare will require drug plans participating in the new prescription benefit to support electronic prescribing. The Centers for Medicare & Medicaid Services has released its final rule on e-prescribing, adopting uniform standards for medication history, formulary and benefits, and fill status notification for the Medicare Part D electronic prescribing drug program. The final rule also adopts the National Provider Identifier (NPI) as the standard for identifying health care providers for use in e-prescribing transactions. **These regulations go into effect on June 6, 2008.** WV Board of Pharmacy proposed emergency rules for the implementation of e-prescribing on January 4, 2008. You may also view www.cms.hhs.gov for further information.

A rule has been proposed jointly by the Boards of Medicine, Osteopathy and Pharmacy that becomes effective July 1, 2008. This pertains to a pharmacist’s scope of practice pursuant to collaborative pharmacy practice agreements, and the selection of up to 5 pilot project sites in the community based pharmacy setting for collaborative pharmacy practice. Criteria needed for a pilot project site are a) designated patient care area for private conversation; b) ability to perform appropriate lab testing and take vital signs; c) capability of keeping comprehensive patient records in a HIPAA compliant manner; d) equipment must be maintained in an OSHA compliant and CLIA waived manner with appropriate records kept; and e) a maximum of one not for profit rural health care clinic may be given preference. West Virginia Board of Osteopathy is Moving

After 23 years of service to the WV Board of Osteopathy, Mrs. Cheryl Schreiber, Executive Secretary will be retiring this fall. Mrs. Schreiber has devoted much of her time, knowledge and expertise to keeping the public aware of the osteopathic profession and we thank her for that. Cheryl was recently presented with the George S. Palmer, MD Award for Excellence by the Administrators in Medicine organization. We wish her the best as she continues in her work as a CPA. A search is currently being conducted to find a replacement for this position, with over 60 candidates applying.

The Board office will also be moving to Charleston, WV. At this time, a location has not been found; but, more information will be sent to you as it becomes available.

Legislative Changes to be Made

Senate Bill 526 was passed by the WV Legislature. This bill revises requirements for post-doctoral training as a requirement for licensure and provides for educational permits for post-doctoral clinical training. The changes have been made to our law and an emergency legislative rule with further details and explanations will be introduced in the near future.

Under the new law an applicant for licensure must complete a minimum of one year of postdoctoral, clinical training in a program approved by the AOA, **OR**, a minimum of one year of postdoctoral, clinical training in a program approved by the ACGME and forty hours of CME in OMM and OMT in courses approved, and classified as Category 1A, by the AOA.

The original educational permit issued may be valid for a period of fifteen months and subsequent educational permits issued to the same person may be valid for not more than twelve months. Watch for information on the new rules.

National Plan and Provider Enumeration System (NPPES)

The Administrative Simplification provisions of HIPAA mandated the adoption of standard unique identifiers for health care providers and health plans - a NPI number. All health care providers are eligible for NPIs and may apply for them. Because medical students, interns, residents and fellows are health care providers, they are eligible for NPIs. If interns or residents prescribe medications for patients whose prescriptions are filled by pharmacies, refer patients to other health care providers, or order tests for patients from other health care providers, they will need to be identified as prescribers or providers, and it may be necessary for them to have NPIs so the pharmacies and providers may be reimbursed by health plans. A health care provider should deactivate its NPI in certain situations, such as retirement or death of an individual, disbandment of an organization, or fraudulent use of the NPI. To deactivate an NPI, you must complete a CMS-10114 and mail it to the NPI Enumerator. For more information, please go to www.nppes.cms.hhs.gov.

Prescription Drug Abuse is on the Rise in WV

- In 2006, drug overdoses were the leading cause of death for adults under the age of 45. These rates were the highest in the country.
 - In 2005, approximately 250,000 West Virginians were using some sort of prescription drugs for non-medical reasons.
- These facts are from the WV Prescription (Rx) Drug Abuse Quitline (1-866-WV QUITT) This organization received a grant to provide service, outreach and research on prescription drug abuse in WV. Check out their website at www.wvrxabuse.org.

AOA Code of Ethics

The American Osteopathic Association has established a Code of Ethics to guide its member physicians in their professional lives. This code addresses the osteopathic physicians' ethical and professional responsibilities to patients, society, the AOA, to others involved in healthcare and to self. At the Board meeting held on February 5, 2009, it was passed to remind physicians that they should review this Code of Ethics, as the Board has adopted it as guidance for professional conduct.

You may view the Code of Ethics at www.do-online.org; in the gray area, click on AOA; and then click on Code of Ethics.

Board License Disciplinary Actions

Bits and Pieces of Relative Information

- Requesting a license verification for any reason requires a \$25.00 fee per request.
- If you are having a third party do any type of credentialing or correspondence for you, please make sure that they are aware that there are two distinct licensing boards in West Virginia and give them our correct address.
- The AOA does not automatically send each board a copy of your Individual Activity Report. It is your responsibility to keep track of your CME hours for the license renewal.
- Please answer all questions regarding membership, work/home address and phone number on renewal forms.
- The Board of Osteopathy now accepts major credit cards.

New Medicare Enrollment Rules

Starting April 1, the time frame under which physicians can bill retroactively for services after enrollment or reenrollment in Medicare has been shortened from 27 months to only 30 days.

Also under the new regulations doctors who fail to update their addresses with Medicare within 30 days of moving may face a penalty of being unable to bill the Medicare program for up to two years.

Licensees are solely responsible for keeping the Board aware of your current address and acquiring and submitting renewal application forms. The Board mails forms to your last known address.

It is imperative that you keep your address current.

Retention of Medical Records

According to WV Board of Osteopathy Rules §24-6-5.19, "The physician shall maintain a medical record for each patient which is adequate to enable the physician to provide proper diagnosis and treatment. The physician must maintain a patient's medical record for a minimum period of three (3) years from the date of the last patient encounter and in a manner which permits the former patient or a successor licensee access to them."

When a physician is relocating, retiring, or in the event of death, your patients should be notified as to how and when they may come and get their medical records. This can be done by placing an ad in the local newspaper, placing a notice at the office or sending a letter.

Physician Assistants

For PAs with Prescriptive Writing Privileges, 4 medicines were added to the drug formulary in November 2008. Under Dermatological Disorders, "Topical Immunomodulatory, Hair Growth Retardant, Immune Response Modifier, and Depigmenting Agents" have been added. You must send a request to the Board office if you would like to have these approved, and then you will need to redo your script pad.
