Note 1: The most recent estimate for all uninsured children statewide from the US Census Current Population Survey is 3%. It should be noted that even this three percent extrapolation to the county level could vary significantly from county to county depending on the availability of employee sponsored insurance. However, it remains our best gross estimate of the remaining uninsured children.

Note 2: It has been estimated that 7 of 10 uninsured children qualify or may have qualified for CHIP or Medicaid in the past, WVCHIP uses the 3% uninsured estimate as a target number for outreach.
