CALENDAR YEAR 2015

West Virginia Medicaid Mountain Health Trust Program: HB 4217 Report

ANNUAL REPORT 2015

OVERVIEW

The Mountain Health Trust (MHT) Program is the West Virginia Medicaid managed care program, administered by the Bureau for Medical Services. The program is designed to improve access to high-quality care at a reduced cost by having more coordinated medical care. In Calendar Year (CY) 2015, the Mountain Health Trust program served more than 360,000 Medicaid members by contracting with four managed care organizations to help manage members' health care needs. By assisting members in establishing a relationship with a primary care provider (PCP), the program is designed to help foster a medical home setting for West Virginia Medicaid recipients. This annual report is in response to House Bill 4217, with data points addressed in the order presented within the bill.

NAME AND GEOGRAPHIC SERVICE AREA OF EACH MCO

In CY 2015, West Virginia contracted with four managed care organizations. These organizations were:

- CoventryCares of West Virginia
- The Health Plan
- UniCare
- West Virginia Family Health

By the end of 2015, all MCOs were operational in each of West Virginia's 55 counties. Cabell and Wayne counties were occupied by Coventry and the Physician Assured Access System (PAAS) program for most of 2015, with the other programs entering that market in the latter half of the year.

MANAGED CARE ORGANIZATION PROVIDER NETWORKS

Each managed care organization (MCO) has a defined network of providers that is monitored by the Bureau for Medical Services (BMS) to ensure that MHT beneficiaries have adequate access to PCPs and specialists. These networks are evaluated on an annual basis, however, monitoring throughout the contracting period is conducted via weekly and monthly reporting to ensure continued compliance. MCOs contract with over 200 provider types. A total provider count for each MCO is provided below.

Enrolled Providers	
Coventry	17,623
Health Plan	10,398
UniCare	16,203
WV Family Health	21,483

A complete listing of each provider type can be found in Appendix A. Please note that some providers cover multiple specialties and may be reflected more than one time in the count.

MANAGED CARE ENROLLMENT

As of December 31, 2015, there were 367,658 members enrolled in the Mountain Health Trust program. The average monthly enrollment during CY 2015 was approximately 260,000 covered lives. In September 2015, members of the Medicaid Expansion program were carved into Mountain Health Trust, increasing the monthly enrollment by approximately 160,000 members by year's end.

SELF –SELECTION VS. AUTO ASSIGNMENT

Members of the WV Mountain Health Trust Program have the option of choosing the Managed Care Organization that best meets their needs. If a member does not select an MCO, via the State's enrollment broker, the member is auto-assigned to an MCO. Business rules are in place so that an individual who does not select an MCO and has a family member already in an MCO, will be assigned to the same MCO. In addition, if an individual loses coverage, but reestablishes their Medicaid eligibility within a year, they will be assigned to their previous MCO. The State is working very closely with its new enrollment broker, MAXIMUS, effective June 2015, to reduce the auto-assignment rate and encourage members to make informed decisions about their health care, through increased outreach and education around the State.

PLAN QUALITY RATING

For more information regarding plan performance, please reference Appendix B. Health plans are scored on a scale of 1-5, with 5 being high performance, the summary on the following page is taken from the NCQA Health Insurance Plan Ratings for 2015-2016. Please note that WV FH did not have sufficient data for this process.

ANNUAL REPORT 2015

Rating	Plan Name	States	Type	NCQA Accreditation	Consumer Satisfaction	Prevention	Treatment
3.5	Coventry Health Care of West Virginia	WV	HMO	Yes	3.5	2.5	2.5
3.5	Health Plan of the Upper Ohio Valley	WV	HMO	Yes	3.5	3.0	2.5

MEDICAL LOSS RATIO AND ADMINISTRATIVE COSTS

The Medical Loss Ratio (MLR) is the percent of premium an insurer spends on claims and expenses that improve health care quality. Provided below are the percentages of premium spent on medical costs, as well as the administrative costs of each MCO, defined as the general administrative expenses and claim adjustment expenses. No refunds were received by the State during this time period; this provision was added to the SFY16 contract.

	MLR	Administrative Costs
CoventryCares	86.5%	\$18,341,790
The Health Plan	99.3%	\$8,393,704
UniCare	91.8%	\$33,476,972
WV Family Health	93.3%	\$8,041,392

The composite MLR across all plans was 91.4%.

FEE-FOR-SERVICE MEDICAID

Appendix E contains several copies of Legislative Oversight Commission of Health and Human Resources Accountability reports, as well as the Department's State Fiscal Year 2017 Medicaid budget presentation, which highlights the costs of the Medicaid program over the past several years at a line-item level. It must be noted that managed care costs have increased in recent years due to the inclusion of additional benefits and populations being carved in to the managed care program, however, at a savings when compared to those services continuing to be provided in a fee-for-service environment.
