		General		Federal		Lottery		Special		Other		ĭ	Total Requested
Total Requested (One-Time+On-Going) by Fund Class		25,000,000											25,000,000

Expenditure Summary:

The number of forensic and civil commitments continues to grow and exceed the number of licensed beds at the facility requiring the hospital to divert patients to external treatment facilities. These diversions are costly and exceed the state funded allocations for the costs. From 2015 to 2018 the cost of these diversions has increased from \$24,064,005 in FY2015 to \$45,044,899 in FY2018, an increase of 87.2%. The facility utilizes contract staff to ensure that they are able to meet regulatory staffing requirements. Over the years and due to a myriad of issues the utilization of contract nurses has continued to increase.

The cost to the facility for the contract nurses exceeds the amounts available from vacant staffing positions. The average cost for contract nursing is \$17 million per year while annual value of vacant positions totals approximately \$4 million

Anticipated benefits to the program or the effects if improvement is not funded:

If the improvement is not funded the facility will not be able to provide inpatient psychiatric services for individuals committed to the hospital or provide staffing adequately enough to meet regulatory requirements resulting in substandard services, fines and/or closure of those facilities.

Anticipated cost savings to budget if improvement is approved:

There are no projected costs savings however the improvement will allow the facility to meet its state mandated mission to provide services for the citizens of West Virginia.

#### Expenditure Summary:

4,660 or 665.71 per month, and the Office is on track to reach 7,989 by the end of December which will result in a 16% increase over CY2017. The increase in opioid and other illicit drug overdoses across the state is a predictor that the caseloads for nside the borders of the State of West Virginia. OCME's caseload has increased significantly since 2015. The caseload in CY2015 was 4,216; CY2016 was 5,559; and CY2017 was 6,895. Between January 1 - July 31, 2018, OCME's caseload was The Office of Chief Medical Examiner (OCME) is mandated by WV Code, Chapter 61, Article 12 to perform postmortem examinations and medicolegal death investigations in order to establish the cause and manner of death for those that occur JCME will continue to surge which will result in increased needs and expenditures. Sufficient funding is needed to maintain OCME operations for BFY2019, specifically in the areas of critically needed staff, county medical examiner services, and transportation of decedents to and from OCME. In conjunction with caseload increase for CY2018, it is OCME county medical examiner services and body transportation expenditures have continued to surge over the last four years, from \$1,031,578 in BFY2015 to \$1,599,518 in BFY2018. Based on the projected caseload increase for CY2018, it is servicipated that OCME BFY2019 county medical examiner and body transportation expenditures will also increase by at least 16% over BFY2018; from \$761,561 to \$883,411 for county medical examiner services and \$837,957 to \$972,030 for body ransports for a total increase of \$255,923.

operational 24/7/365 and manned by medicolegal investigators. The estimated personal services and current expense cost related to hiring these four new employees is \$138,168 for BFY2019 (November - June 2018) and \$233,705 for BFY2020 and ongoing fiscal years. The above request is adjusted by funding currently available from 0407-91800 (\$27,273) that will need moved to 0407-04500 due to the movement of vacant position, as well as funding currently available from 0407-91800 (\$27,273) that will need moved to 0407-04500 due to the movement of vacant position, as well as funding currently available from 0407-91800 Medicolegal Investigator positions, both which are critical to OCME operations. OCME is in the process of preparing to post and hire one new Morgue Technician and three Medicolegal Investigator positions, both which are critical to OCME operations. OCME is in the process of preparing to post and hire one new Morgue Technician and three Medicolegal Investigators that were not originally budgeted for BFY2019. It is anticipated that these four critical positions will be filled with an effective date of around November 1, 2018. The Morgue Technician position is responsible for providing any and all support needed by forensic pathologists in the performance of assigned to a particular case until the autopsy is completed. In addition to manning autopsy stations, OCME morgue technicians are assigned toxicology, evidence processing, and photography duties. The Medicolegal Investigator position is responsible for the receipt, review, triage and case assignment for all deaths reported in West Virginia. As part of the Forensic Investigations Unit (FIU), this position is the direct point of contact between FIU and entities outside of OCME for the reporting of deaths and management of death scene responses. This Medicolegal Investigator position is also the liaison between the death scene and the forensic pathologist assigned with the on-call duties at the time of the report. The FIU is autopsies. There are three autopsy stations available for use within the autopsy suite, allowing for three autopsies to be conducted simultaneously. Each station requires a forensic pathologist and two dedicated morgue technicians that remain OCME personal services are expected to increase as well due to the additional caseload increases. Even though OCME has staffing shortages across the office, the additional employees most needed right now are Morgue Technician and \$29,263) due to vacant position being utilized.

OCME is requesting Supplemental funding for BFY2019 in the amount of \$337,555 to cover county medical examiner and body transportation expenditures (\$25,923) and personal services and related current expense costs (\$81,632) that are above and beyond BFY2019 budgeted and appropriated amounts.

Anticipated benefits to the program or the effects if improvement is not funded

lotal Requested (One-Time+On-Going) by Fund Class		269,202											269,202

#### Expenditure Summary:

Senate Bill 386, passed April 6, 2017, created the West Virginia Medical Cannabis Act and places the Medical Cannabis and implementing and administering the Medical Cannabis Program to regulate growers, processors, laboratories, and dispensaries; and to register physicians prescribing nedical cannabis and patients with qualifying medical conditions.

BPH is requesting General Revenue funding in the amount of \$269,202 to operate the Medical Cannabis Program during BFY2019. Requested funding will cover salary (\$71,468) of the existing Office Director; related fringes and personnel costs (\$5,462); contractual costs for maintaining the Medical Cannabis website, public awareness campaign, and Phase 2 of the "Seed to Sale" marijuana tracking system (\$149,700); office supplies (\$200); and other current expenses including internal computer services, office space rental, janitorial service, telecommunications service, and copier rental (\$17,296). It is anticipated that there will be only a few months remaining in BFY2019 when the Legislature could approve these funds; therefore, the Department is requesting language to be added to the budget bill stating that the medical cannabis general revenue appropriation be transferred to fund 5420 (Medical Cannabis Fund) for expenditure.

Anticipated benefits to the program or the effects if improvement is not funded:

Proper operation of the Medical Cannabis Program for BFY2019 to carryout the requirements in WV Code.

Anticipated cost savings to budget if improvement is approved:

There are no anticipated costs savings. Senate Bill 386 passed with no funds for implementation or operation of the Medical Cannabis Program. No fiscal note was requested for the legislation creating the program, consequently, DHHR did not have the opportunity to project costs to manage and operate the Program.

Total Requested (One-Time+On-Going) by Fund Class		1,000,000											1,000,000

#### Expenditure Summary:

The Primary Care Support Program was established under WV Code, Chapter 16, Article 2H to provide technical and organizational assistance to community-based primary care services throughout West Virginia. BFY2019 general revenue funding (appropriation 72700) in the amount of \$2,750,000 was appropriated by the Legislature for distribution to primary care centers that also operate as free clinics. These funds are distributed in the form of subrecipient grants to offset the costs of free clinics providing uncompensated health care services and intended to support primary care for the uninsured. With changes to the Affordable Care Act over the past year and the expectation that additional modifications are still to come, the Bureau for Public Health (BPH) anticipates an increase in West Virginia citizens seeking free primary care clinic services during BFY2019 and onging fiscal years. Due to implementation of federal health reform initiatives, the total number of patients reported by the Health Right Free Clinics dropped steadily during calendar years 2012 - 2014; however, patient data from calendar years 2015 and 2016 show a sharp increase in total patients. In calendar year 2011, the total patients reported among the eight (8) Health Right entities was 54,488 which dropped to 42,759 total patients among six (6) entities by the end of 2015 (two free clinics closed due to budget cuts and underutilization). The latest data (calendar year 2017) shows that total patients among the 6 remaining entities have increased to 55,314. BPH is requesting Supplemental funding for BFY2019 and ongoing fiscal years in the amount of \$1,000,000 to offset the cost of additional uninsured patients seeking free primary care clinic services.

# Anticipated benefits to the program or the effects if improvement is not funded:

Supplemental funding is needed to ensure free primary care clinic services are available when needed by uninsured West Virginia citizens. Primary care service emphasizes first contact patient care and ongoing responsibility for patients in health many care clinics include, but are not limited to, primary medical care, dental care, mental health, substance abuse, hearing screening, physical therapy, occupational therapy, pharmacy services, diagnostic laboratory, and x-ray procedures.

Anticipated cost savings to budget if improvement is approved:

There are no anticipated cost savings.

#### Expenditure Summary:

The Health Statistics Center (HSC) began a multi-year project in July 2017 to implement an electronic vital records system (EVRS). This multi-year project is being funded under the HSC's Special Revenue Vital Statistics fund (5144). A contract was awarded to a Vendor to assist HSC in developing a Request for Proposal (RFP) to procure the EVRS solution; and the RFP is currently in the process to be published for bids. It is anticipated that after a Vendor is chosen to develop and implement the EVRS, the contract will span over eight fiscal years (BFY2019 to BFY2026). The total cost of the project is projected to be around \$7.8 million with the majority of expenses being in the first three years which is anticipated to cover the development and implementation phases. It is estimated that Year 1 expenses will be approximately \$2.4 million; Year 2 at \$2. million; and Year 3 at \$1.2 million.

1,500,000

1,500,000

HSC is requesting a BFY2019 through BFY2021 Current Expense Spending Authority increase for 5144 in the amount of \$1.5 million each year to ensure sufficient funds are available to support the EVRS project through the development and implementation phases. It is unknown at this time if additional Spending Authority increases will be needed to fund Year 4 through Year 8 EVRS expenses.

# Anticipated benefits to the program or the effects if improvement is not funded:

As of July 2018, West Virginia is one of only four states that has not implemented an electronic death registration system. The first EVRS component to be implemented will be the death registration module. Further, the EVRS will relate the registration, storage, and issuance of all vital records. This will improve timeliness of filing that will in turn improve efficiency and data quality. The EVRS will include birth, death, fetal death, induced termination of pregnancy, marriage, divorce, and point of sale records. HSC's current systems are obsolete, expensive to maintain, and not integrated. Updating and modernizing vital records registration is a key focus for HSC as the information obtained from the medical side of vital records is widely used in the evaluation of health indicators for West Virginia.

## Anticipated cost savings to budget if improvement is approved:

There will not be a direct cost saving the development and implementation phases of the EVRS project. However, there will be an increase in revenue afterwards. The EVRS will decrease the time it takes for HSC to notify the Social Security Administration (SSA) of deaths for people receiving benefits. HSC's contract with SSA includes tiered pricing that awards the State increased payments for faster notifications.

Total Requested (One-Time+On-Going) by Fund													1

#### Expenditure Summary:

The approved BFY2019 Spending Authority for the Special Revenue Laboratory Services Fund (5163) used to fully cover Newborn Screening Program expenditures is \$1,811,487 of which \$862,657 is allocated for Personal Services (00100); \$18,114 appropriation in recent fiscal years due to Laboratory Services Fund shortages results in a need for additional \$19,078; BFY2019 Unclassified and Current Expense projections (\$1,293,485) which include providing West Virginia University \$100,000 to read additional costs of genetic services. Spending Authority increases for 5163-00100 (\$19,078) and 5163-13000 (\$344,655) for a total of \$363,733 are needed for BFY2019 and ongoing fiscal years to cover expenses and ensure the Newborn for Unclassified Expenses (19900) and \$930,716 for Current Expenses (13000). The Bureau for Public Health (BPH) anticipates that Newborn Screening expenditures will exceed its approved BFY2019 Spending Authority by \$363,733, projected personal services of current (\$787,114); transfer of two Newborn Metabolic Screening (Unit 3015) Program FTEs (\$94,621) that have been funded under the Office of Maternal, Child and Family Health's (OMCFH) 57500 general revenue Screening Program can continue operating effectively.

363,733

363,733

A \$363,733 Laboratory Services Fund Spending Authority increase will result in \$2,175,220 being available for Newborn Screening expenditures during BFY2019 and ongoing fiscal years. BFY2018 Laboratory Services Fund revenue was \$2,190,329, and it is anticipated that Newborn Screening will receive approximately \$2,461,375 (estimated 19,691 live births x \$125) during BFY2019. A Legislative rule change request is in process that will allow the Burreau to "bill the birthing facility or individual attending the birth for services provided for each newborn screen consistent with prevailing health insurance reimbursement rates for newborn screening to cover the administrative, laboratory, and follow-up costs associated with the performance of screening tests required" under the rule which will result in the newborn screening billable rate increasing by \$9.64 per screening test to \$134.64 during BFY2019. The newborn screening hillable rate increasing by 10.00 performance of screening tests required."

# Anticipated benefits to the program or the effects if improvement is not funded:

The Office of Laboratory Services, Newborn Screening Program (NBS) is responsible for testing specimens for the detection of phenylketonuria, galactosemia, hypothyroidism, and certain other diseases. If a Spending Authority increase is not approved, there will be a shortage of funds to cover personal services costs and current expenses through BFY2019 which could result in the Program not having adequate staff to perform required testing and funds necessary to order and pay vendors for newborn screening test kits and supplies.

Anticipated cost savings to budget if improvement is approved:

No anticipated cost savings.

Expenditure Summary:

Total Requested (One-Time+On-Going) by Fund

The WV Department of Health and Human Resources (DHHR) serves as the lead agency responsible for implementing Part C of the Individuals with Disabilities Education Act (IDEA). The BFY2019 Spending Authority for the Office of Maternal, Child and Farmiy Health (OMCFH) Birth to Three (BTT) Program is \$28,925,003. It is projected that BFY2019 current expenses will exceed the Unclassified and Current Expense appropriations total of \$28,277,548 for Special Revenue Fund 5214 by \$922,186. Further, it is estimated that projected BFY2019 personal services costs (\$570,913) will be \$76,632 less than the Personal Services appropriation of \$647,545. OMCFH is requesting that \$76,632 of BFY2019 Spending Authority for 5214-00100 be moved to 5214-13000 and also requests a Spending Authority increase for 5214-13000 in the amount of \$885,554 to ensure current expenses are funded through BFY2019.

Anticipated benefits to the program or the effects if improvement is not funded:

If a Spending Authority increase is not approved, BTT will have a shortage of funds to cover current expenses for all of BFY2019.

Anticipated cost savings to budget if improvement is approved:

No anticipated cost savings.

#### Expenditure Summary:

The agency avoided layoffs only because of several retirements and resignations, but was not able to replace those departed employees, resulting in reduction of services. Due to an improvement to the FY 2018 budget, the agency plans to retain a solid retainments and other staff of investigates. Socountains, and other staff to allow for hining and retention.

Furthermore, the agencyâ, ¿, so office equipment (including network server, desktop computers, courtroom and office furniture, and state-issued vehicles) is antiquated and failing, because past budget reductions have prevented the agency from making timely or adequate replacements.

Anticipated benefits to the program or the effects if improvement is not funded:

No new cost savings.

Anticipated cost savings to budget if improvement is approved:

Restoration of previous staffing and investment in training new and existing staff should result in increased services (case investigation and educational outreach). The agency hopes to gradually restore its capacity to handle cases in numbers similar to cases handled in years prior to budget cuts, thus increasing the recovery of Federal funds paid to the agency on a per-case basis.

Expenditure Summary:

The Department is charged with meeting the socially necessary needs of the citizens of the State through such programs as Adult Protective Services, Child Protective Services, Foster Care, Emergency Shelter, and Adoption. The cost for these vital services continues to rise as numbers of children in care increases, largely due to the on-going epidemic of addiction to opiates and other debilitating drugs throughout the state. Social Services Expenditure increases from SFY2017 to SFY2018 by \$50M.

Anticipated benefits to the program or the effects if improvement is not funded:

Increased funding will allow the Department to fulfill its mission to the people of the State by keeping the State's most vital resource for the future, its children, in safe and protective living environments where they can grow to become productive citizens of the State. Without this funding, vital services that are mandated by federal and state law will have to be eliminated or reduced.

Anticipated cost savings to budget if improvement is approved:

No cost savings are anticipated.

Expenditure Summary.

The Investigations and Fraud Management Unit is experiencing recruitment issues, including the inability to attract applicants from within the DHHR and the inability to attract qualified candidates from the private sector, which have resulted in less tenured staff, increased costs associated with recruitment and training of new staff, and reduced productivity. Increasing caseloads, intricacy of investigations, and multiple state benefit investigations demand the retention of experienced staff to maintain program integrity. Bringing pay structures to competitive rates is critical to successful recruitment and retention of employees in these classifications.

Anticipated benefits to the program or the effects if improvement is not funded:

Competitive salaries will allow for recruitment and retention of key staff which would allow for timely completion of investigations to ensure proper use of funds.

Anticipated cost savings to budget if improvement is approved:

Expenditure Summary:

To increase timber volume and revenues from State Forests which includes increasing manpower to oversee and close-out logging jobs across the state

Anticipated benefits to the program or the effects if improvement is not funded:

To hire five (5) additional state foresters to fulfill the obligations and responsibilities of the Division of Forestry. Two (2) timber markers are needed on state forests to achieve the revenue benchmark projections. Three (3) service foresters will be utilized for fire suppression and prevention as well as inspecting logging jobs to comply with statutory requirements.

Anticipated cost savings to budget if improvement is approved:

To offset the loss of Severance tax revenue in 2020.

Expenditure Summary:

One-time funding request for installation of new boiler. Three of the four existing boilers in the agency's main office building are inoperable. The units were originally programmed to activate in sequence to provide additional heat during periods of original poilers. Continued operation of the sole remaining boiler during recent winters has resulted in frequent system failures and extended periods of loss of heat.

Anticipated benefits to the program or the effects if improvement is not funded:

Cycling of operation between two boilers would prolong the service lives of both units and would prevent staff down-time as a result of facility closure due to loss of heat.

Anticipated cost savings to budget if improvement is approved:

Agency operations would continue without interruption, no staff time would be lost and repair/maintenance costs would be reduced.

Total for SBDC PLC

Hire 4 additional business coaches in the Small Business Development Center to assist entrepreneurs with business start-up and to assist existing businesses with growth and expansion. Areas of business coach expertise include strategic planning, capital acquisition, financial management, marketing, human resources, and operations. This level of staffing would restore SBDC services to pre-2015 levels, when 4 business coach positions were forfeited due to budget cuts. The 4 new positions would be assigned to the high growth areas of the state where services for small businesses are in highest demand and to specialized areas such as cyber security.

Anticipated benefits to the program or the effects if improvement is not funded:

No direct cost savings, but added staff would more than pay for themselves in business startup and growth. An independent economic impact analysis in 2017 indicates that SBDC clients grow faster (SBDC clients sales increased 35.3% compared to 0.3% decrease for WV businesses in general).

Anticipated cost savings to budget if improvement is approved:

An independent economic impact analysis of the WV SBDC program in 2017 concludes that SBDC services generate \$2.96 in tax revenue in one year for every \$1 spent on the program. In addition, every \$1 expended on the WV SBDC leverages approximately \$17 in new capital raised from external sources that are invested in new or expanding businesses.

#### Expenditure Summary:

the money will move in the form of cash. The Tax Department does move cash currency, but with initial estimates in the \$4-\$6 million range, the security related to moving money of that magnitude cannot be understated. We have approached several Tax has serious concerns as it relates to the safety and security of our staff involved in the collection of funds attributable to the sale of medicinal marijuana. At this time funds cannot be transmitted through the traditional banking system, meaning that private sector companies about providing secure transport services, but as movement of this money is still considered illegal by the federal government, traditional companies and banking institutions are unwilling to risk being associated with these funds, but the key missing elements are sufficient funding for the personnel and equipment required, along with a financial institution in which to deposit the funds. Both will be required for funds the funds are sufficient funding for the personnel and equipment required, along with a financial institution in which to deposit the funds. Both will be required for

Anticipated benefits to the program or the effects if improvement is not funded:

There are no cost savings to be achieved in funding this initiative, however, Tax will be unable to safely and securely handle cash deposits from the producer community. This group is the only level taxes are imposed upon for the sale of medicinal marijuana in West Virginia as currently configured. We do not have the resources needed to implement a program of this size without additional budgetary support.

Anticipated cost savings to budget if improvement is approved:

Tax does not have the personnel, resources or equipment to facilitate the collection of large sums of cash. The estimated revenue collection amounts of \$4-\$6 million annually is 4 to 6 times the annual amount of cash we currently handle in any given fiscal year. This level of cash handling requires special personnel, equipment and security precautions during transfer. We have determined that a direct pickup from the vendors in this case is less risky, less expensive and less prone to errors or mistakes by staff. Additional information can be provided in private.

#### Expenditure Summary:

current salary for a pay grade is subtracted from the new market-based pay grade and then divided to phase it in over three years. 60% of the difference would be applied in the first year, 20% the second year, and finally, 20% in the third year. This phase in would be contingent upon funding in each successive year at which time the salaries for certain titles would be adjusted for the current market conditions. While this would not affect every title at the Department it would account for nearly 200 Current employees of the Department who are below the new starting salary would have their pay raised to this new minimum amount as well. We are requesting a three-year phase in of the new salary grades which would be 60%/20%/20%. The of our employees. The only titles impacted for the Tax Department would be those titles that are unique to the Tax Department and not utilized by other agencies. Generally speaking they all have Tax in the title; Tax and Revenue Auditor 1, Tax Analyst 2, Tax Regional Manager, etc.

We are finding that even with newly increased salaries at the Department we are still not viable competition for new college students or seasoned professionals. This is a major factor in our 25% vacancy rate and is indicated as a major reason by candidates that we are positions three to five times before we can garner even marginal candidates. Tax fully understands and acknowledges that we will never be able to compete for top tier accounting firm or research think tank talent. That is actually not our target audience and while they are great acquisitions for those entities, they do not generally flourish in state government, at least not in their early years. Tax is interested in individuals who know the culture, challenges, and history of our state. Having a working knowledge of the social norms and history is critical in the work we do and who we are. Tax is highly interested in recent college graduates who have a strong desire for public service. While the benefits of public services are often altrusitic in nature, individuals must be able to support themselves and their families while paying of the student loan debt acquired in pursuit of their higher education.

# Anticipated benefits to the program or the effects if improvement is not funded:

and strongly feel that this modification program will allow us to recruit and retain individuals who are highly qualified and can bring a wealth of experience, energy, and expertise to the Department to help us continue to improve all aspects While there is not cost savings to be had in direct costs the ability to fill a job the first time it is posted will lead to less down time with work not being competed by staff who choose to leave for a variety of reasons. Recruitment and retention of highly qualified professionals is difficult in todays marketplace, regardless of the industry. We have the added challenge of being unable to attract candidates based upon a salary figure alone. Tax has made may changes like flexible working schedules, upon the salary figure alone, and allowing some staff to work from home but these benefits only apply to individuals who already work here. They are hard to use as selling points with a salary that is 25% to 40% below the of our administration and collection programs. The more efficient and accurate we can be, the more Tax dollars we can collect on time and with a reduce effort than having to utilize collection and enforcement actions to do so.

## Anticipated cost savings to budget if improvement is approved:

Tax continues to struggle, in spite of significant work in the area of staffing. The major issues facing us at this time is a lack of qualified applicants for specialized Tax Department titles. Recent positions have been posted multiple times will little interest. Candidates who apply, but then retuse to interview, tell us that salary is the major factor in their decision not to interview with us. All surrounding states have higher starting salaries for nearly every tax specific title within their classified service.

Expenditure Summary:

The current year supplemental request is sought in order to utilize federal grant dollars to enhance the implementation and planning for several of the federal market reforms and consumer protections under Part A of Title XXVII of the Public Health Service Act

Anticipated benefits to the program or the effects if improvement is not funded:

This funding will allow the Offices of the Insurance Commissioner to utilize federal grant dollars to enhance the implementation and planning for several of the Federal market reforms and consumer protections under Part A of Title XXVII of the Public Health Service Act, Failure to appropriate funds for these activities may result in unnecessary expenditure of state dollars.

Anticipated cost savings to budget if improvement is approved:

This funding will allow the Offices of the Insurance Commissioner to utilize federal grant dollars to enhance the implementation and planning for several of the federal market reforms and consumer protections under Part A of Title XXVII of the Public Health Service Act. The State Flexibility to Stabilize the Market Grant will provide the opportunity to ensure state laws, regulations, and procedures are in line with federal requirements, and enhance the ability to effectively regulate the respective health insurance markets through innovative measures that support the pre-selected market reforms and consumer protections under Part A of Title XXVII of the Public Health Service Act.

Expenditure Summary.

worked. All 3 heating boilers have to be in operation to heat the building. Because of the lack of heat, in the dorm rooms where the inmates are housed, the temperatures in the winter gets down to the locate all of the inmates to other There are several roof leaks from the metal roof that is leaking inside the building, causing pooling of water down the pre-cast walls, windows, carpet, etc. Because of the above stated issues, the Division has had to relocate all of the inmates to other facilities because the building has Stachybotrys, black mold, throughout the entire building. With the way the building was constructed, it is going to be hard to get all of the Stachybotrys out of the building. Since the immates have been relocated to different facilities, the facilities the majority of the building is empty, there have been several other major issues movement has caused a major condensation issue. Above the security ceilings and the bottom of the metal roof, there is very minimal insulation and no air movement. The air is stagnate. This in turn causes a lot of condensation to form, which in turn has caused the security ceiling to be damaged; the fire protection spray on the bottom of the metal roof to fall; and black mold to grow. Above the security ceilings, the duct work for the HVAC system is not insulated which causes a lot of security cannot be a lot higher. The controls to the HVAC system has never worked and has had to be taken out of the system once the building opened for occupancy. The HVAC system has had to be manually operated shortly after the facility moved into the new building. Initially the wrong type of roof was installed and oulding. The facility has 3 heating boilers the building. The 3 boilers that were originally designed and installed at the facility are only half the size of what they should be for the size of the building. Therefore, the boilers are always over has minimal insulation as well. There was only half the correct amount of underroof supports installed for the geographical area the facility is located. During the winter months, the temperatures have fallen to 37 degrees Fahrenheit inside the INFO: The main building was constructed in 1997-98. There were a lot of flaws and issues in the design which has caused major issues since the facility first moved into their new buildings. The lack of proper ventilation and air found. The cost to remediate the mold from the building and then fix all the issues will exceed or equal to or exceed the cost of what a new building will cost. Anticipated benefits to the program or the effects if improvement is not funded:

Currently staff and inmates have been moved to other facilities throughout the state. Once this is corrected we will no longer have to house the inmates have been moved to other facilities throughout the state. Once this is corrected we will no longer have to house the inmates have been moved and lodging for the Anthony staff who are also being moved to

Currently staff and over 200 inmates have been moved to other facilities throughout the state. Once this is corrected we will no longer have to house the inmates in other locations and pay travel and lodging for the Anthony staff who are also being moved to assist the facilities impacted by the influx of inmates

Anticipated cost savings to budget if improvement is approved:

assist the facilities impacted by the influx of inmates.

Expenditure Summary:

The existing fire suppression sprinkler system at Denmar was installed in the early 1970s. The system is almost 50 years old. The system is in bad condition and does not meet the existing NFPA code standards. The existing system is installed with the old pipe system which is not allowed in todays code. Both BRIM and the State Fire Marshal's office has written the facility up each year in the yearly inspection report. The building is a two section and is five and six stories high. Due to the system is not allowed on the meet code, a new system must be installed. The entire existing system has to be removed and a new system will have to be installed. The fire suppression sprinkler system is a life safety system.

Anticipated benefits to the program or the effects if improvement is not funded:

Facility would not be closed down by Fire Marshall and this would increase staff and inmate safety.

Anticipated cost savings to budget if improvement is approved:

BRIM and Fire Marshall have written facility up. We could face fines or facility closure if not addressed

Expenditure Summary:

There is a need for a locking system and security upgrade at the VDJC. This is the last facility to be converted from a staff secure building to a hardware secure building. Currently the building is staff secure and there is no locking system in place.

This would allow for the building to be made secure with the proper doors, locks, and security system throughout the facility.

Anticipated benefits to the program or the effects if improvement is not funded:

Safety for staff, residents, and the community.

Anticipated cost savings to budget if improvement is approved:

Expenditure Summary:

Due to the increased immate population, the addition of a full Medical unit, the acquisition of a fully-functioning, off-site Holding Center and increased staffing, PBCC is requesting to increase to the operating budget per projections. To date Parkersburg Correctional Center has increased immate population by 150% with an additional increase in planning. Utilities, supply purchases, contracts such as Aramark, etc have been affected and will continue to increase with additional increase of population. A fully-equipped, fully-staffed Medical unit, including dentistry, has been added to the PBCC Operation. Recently acquired all operating control of the off-site Wood County Holding Center and responsibility of all staff to accommodate for safe oversight of the additional immate/holding population.

Anticipated benefits to the program or the effects if improvement is not funded:

Being able to operate the facility with the additional staff and inmates

Expenditure Summary:

In November of 2016, the two elevators where taken out of service due to malfunctioning equipment. Finally, after the repairs had been bid out several different times, the repairs between the two elevators. During the full load test, both elevators failed to hold the load. One elevator was built in the 1930s and the second elevator was building in the 1950s. All equipment is original. The two elevators are not repairable due to their age. The facility must have the elevators, especially if there is a staff member or an incarcerated inmate that gets hurt on one of the upper floors and has to be taken to the hospital, there is currently no easy way to transport to the main floor to exit the building. The facility must have the funding to totally replace both elevators with new

Expenditure Summary:

At Beckley Correctional Center, there is a main building #2, and building #2, that houses inmates. Building #1 is old and is in bad condition. Building #1 has the administration offices, central control, kitchen, main dining hall, and houses brings #2 and #3 are falling apart. The two (2) buildings are in major need of being renovated, but the cost to renovate would exceed the cost of purchasing modular buildings are not safe. There is no inter connecting fire alarm system that calls out and there is no fire connecting fire alarm system that adequate amount of space. The two (2) buildings are not safe. There is no inter connecting fire alarm system that calls out and there is no fire suppression sprinkler system in either buildings #2 and #3 which are both state code requirements. Materials can be replaced at a cost, but fire annot be replaced. The DOC is requesting the additional funding to order new modular buildings that will house the inmates and meet all state code requirements. Alarm that is a cost, but fire annot be replaced. The requested cost also includes site preparation, utility relocation, etc.

Anticipated benefits to the program or the effects if improvement is not funded:

Provide a safe housing area for the residents/inmates

Anticipated cost savings to budget if improvement is approved:

Expenditure Summary:

There was a waste water treatment plant upgrade in 2011. During construction, an auger monster and a 4,000 gallon grease trap interceptor was installed. The auger monster does not have a sewage grinder and only keeps large items from entering the waste water treatment plant. Whenever grease mixes with the other solvent and debris, it causes everything to harden and becomes difficult to be processed by the waste water treatment plant there must be a sewage grinder installed inside a manhole to ensure all material is broken up enough to be processed at the waste water treatment plant there must be a sewage grinder installed inside a manhole to ensure all material is broken up enough to be processed at the waste water treatment plant. Only the three bowl sink and the commercial dishwasher can be plumbed to the new 4,000 gallon grease trap interceptor that needs installed outside the kitchen. Until the grinder and grease trap interceptor at timely manner it backs up the sewer lines.

Anticipated benefits to the program or the effects if improvement is not funded:

Grease and trash are the two major factors that create problems at the waste water treatment facility. Anticipated cost savings to budget if improvement is approved:

If we have the grinder installed we wont have to continue replacing the expensive equipment in the waste water treatment plant, and the grease interceptor being installed will keep the facility from having to keep paying for the continuous pumping.

Expenditure Summary:

At the facility, there is a small sewage grinder installed at the end of the line prior to flowing into the PSD's line. The issue is that objects put into the line continually stop up the line prior to the existing grinder. When this happens, the facility has to turn the water service to the facility off because the waste water lines will quickly backflow into the building. The facility must have a grinder and an auger installed as soon as the waste water sewer lines exits the building. This will immediately grind up anything that is put into the system and will stop the lines from being stopped up.

Anticipated benefits to the program or the effects if improvement is not funded:

No more plumbing and sewage issues.

Anticipated cost savings to budget if improvement is approved:

Expenditure Summary:

The facility was constructed in the early 1990s. Overtime, the exterior security doors and frames to several of the buildings have rusted and sections have broken off. The other issue is that the security locks have aged and are no longer functioning correctly and must be replaced. The facility is a maximum security prison and with the existing conditions of the doors, door frames, and locks, it has created a major security issue for both the staff, inmates, and visitors. If the previously stated issues are not corrected it puts everyone at the facility in danger. Materials can be replaced at a cost, but life cannot be replaced. The facility is requesting this funding to make the facility after.

Anticipated benefits to the program or the effects if improvement is not funded:

Public safety and staff safety.

Anticipated cost savings to budget if improvement is approved:

Expenditure Summary:

At Salem Correctional Center, there are currently 64 inmates housed in the Stanard Building. There are a number of safety issues with the building. The facility is going to renovate Building 'B'. In addition is completed, the facility will also be able to increase their inmate population by 52 with the additional space in Building will be relocated to Building 'B'. In addition, the facility will also be able to increase their inmate population by 52 with the additional space in Building 'B'. The facility will also move the education department to the Johnstown School building. In the building, the existing HVAC units are all single units per each room. The units were undersized and have quit working. The units have been repaired a number of times, and can no longer be repaired. With the building not having HVAC units that works, the building is cold during the winter months and hot during the summer months. There must be a central air HVAC system installed.

Anticipated benefits to the program or the effects if improvement is not funded:

Add an additional 52 beds

Anticipated cost savings to budget if improvement is approved:

\*Please see attached Memo for more information

Anticipated benefits to the program or the effects if improvement is not funded:

DCR is obligated to pay jail per-diem rates as prisons have become overcrowded. These costs have continued to climb over the past few years, In an effort to avoid court of claims cases and delay normal daily operations, DCR is requesting this supplemental to operate within a normal range. DCR will also request an improvement for FY2020 to be proactive in the future. Several qualitative and quantitative measures have been put in place to reduce costs.

Total Requested (One-Time+On-Going) by Fund Class		421,214											421,214

Expenditure Summary:

Critical positions not funded for FY2019 half-year and required one-time vehicle purchase

Anticipated benefits to the program or the effects if improvement is not funded:

The SIRN provides interoperable wireless and broadband services across West Virginia. Consisting of over 100 sites and towers, the system is vulnerable to storm damage, lightning strikes, old age, and other factors causing the need for SIRN Fechnicians with trucks and pay to be essential. The SIRN technicians are required to perform maintenance and emergency repairs at towers across West Virginia. Many of the towers are on mountain tops, rugged terrain, remote, and especially difficult to access. For this reason, four wheel drive rugged trucks are required. The technicians are on call 24X7X365. The major factor necessitating purchase of the vehicles is a rapidly diminishing fleet due to mileage, safety, and practically.

In 2017, the SIRN functionality moved from DHHR to DHSEM; however, the full personnel allotment and funding for these positions were not transferred. Simply stated, due to the personnel shortfall generated by the lack of positions or continuing funding stream, places the program in a unique and untenable situation. As noted in the above comments, the system is essential to Public Safety, Emergency Response, and day-to-day state-wide operations. Without the personnel and funding, it is placing DHSEM on a precarious line as to functionality and non-functionality.

65,575 tal Requested

Expenditure Summary:

According to WV Code Section 29-6-4, the Parole Board is allowed an exempt position consisting of a principal assistant or deputy and would request this position to be filled to assist the Chairperson in the administration of the duties of the Parole

65,575

The Chairperson not only serves as leader of the Board but also doubles as an Executive Director of a state agency. The Chairpersons attention is unevenly divided between interpreting and advising board members on code responsibilities and legislative rules with regards to parole hearings and maintaining the fiscal and operational functions of an agency. Upon inspection of the 2016 West Virginia Blue Book, under State Boards and Commissions, there are at least 25 boards or commissions, there are full complement of executive staff members to fulfill their code specific mission. The purpose and mission of the Parole Board is osee that justice is served and public safety is maintained. This additional exemps position would be responsible for items such as: coordination of strain responsibilities, budget development and monitoring between the Parole Board and the Division of Corrections; designing and implementing agency goals to produce increased performance measures; collecting and computing performance data to measure outcomes; coordination and implementation of staff development to maintain workloads; overall supervision of the day-to-day functions of the agency.

The total for the employee improvement package will be approximately (\$35,000) plus associated employer benefit costs of approximately (\$13,000.)

Anticipated benefits to the program or the effects if improvement is not funded:

This would provide the Chairperson the opportunity to property lead the Board Members to achieve higher parole rates and for them to utilize the Executive Secretary in their original hired capacity

Expenditure Summary:

The Parole Board is requesting an additional 3 Office Assistant III to help with the increased workload of the office as a whole. The staff's work is driven by State Code mandates, which can be almost impossible sometimes due to the volume of hearings we have in a year. We continuously authorize overtime and compensatory time in order for the staff to meet their deadlines as outlined in state code. The Board is also responsible for the calculations of Parole Eligibility Dates, Parole Discharges and Revocation of Parole Hearings. These responsibilities are egregiously time consuming activities and can hinder the parole hearing preparation process. We are asking for the additional staff to handle these duties exclusively so the remainder of the staff can focus on hearing preparation

Anticipated benefits to the program or the effects if improvement is not funded:

Reduced overtime expense and proper staff time to review files and prepare for hearings.

Total Requested (One-Time+On-Going) by Fund		000 80											000

### Expenditure Summary:

With the passing of Senate Bill 371, and the increasing number of parole cases, the Parole Board Members are required to travel more to stay in compliance with WV State Code. The Parole Board is requesting an additional \$50,000 to cover the increased operating expenses associated with the Parole Board members travel, fuel, state vehicle lease/expenses, upgrades to fleet and Board's travel expense remover. In the last three fiscal years we have expended all monies allotted for other areas of operations to cover the additional increase. Please note that this amount has to be paid even hough it is not in our budget. The Parole Board is requesting \$15,000 increase for Attorney General fees. Due to the Parole Board having to be referred to the Attorney General's Office for representation in legal matters due to conflicts of interest within the Department of Military Affairs and Public Safety's attorney pool. We spent over \$36,000 in fees to the Attorney Generals Office last year.

The Parole Board's budget for BRIM is currently. Our bill has increased to \$20,125 from \$16,471 last fiscal year. We are respectfully requesting an increase of \$13,976 to cover this increased expense. Please note that this increased amount is being paid, even though it is not in our budget.

The Parole Board is responsible for any additional updates to the new Offender Information System (OIS) with Office of Technology. Therefore, there is a need for additional funding of \$10,000 to cover these expenses. Please note that this increased amount is being paid, even though it is not in our budget.

Anticipated benefits to the program or the effects if improvement is not funded:

If this money is received payments will not need to go to Court of Claims

Anticipated cost savings to budget if improvement is approved:

**CUEX - CURRENT EXPENSES** 

The Educational Broadcasting Authority is requesting a supplemental appropriation for \$9,503,173 to meet the new FCC Spectrum Reallocation as defined in the Middle Class Tax Relief and Job Creation Act of 2012, Title VI, Subtitle D - Spectrum Auction Authority. This process will require the EBA to replace all television systems at 8 facilities. The current equipment is not reusable. At the same time, a new television standard (ATSC 3.0 or Nextgen) has been established and will be faced with another replacement in 3 to 5 years. A portion of this will be reimbursed by the FCC. The reimbursement period is estimated to be six months to a year after submission of qualifying documents.

2,500,000 9,503,173

2,500,000 9,503,173 9,503,173 Total Requested

Anticipated benefits to the program or the effects if improvement is not funded:

The benefits would include meeting the FCC mandate for vacating existing channels, therefore, operating on a new assigned frequency. Replacement of 15 to 20 year old transmission equipment, improving reliability, availability of parts and service, operational standard broadcast transmission. Positioning the EBA for easy adoption of the new ATSC 3.0 operational standard broadcasting statement.

If the improvement is not funded, the EBA faces years of substandard broadcasting, if not termination of services.

Anticipated cost savings to budget if improvement is approved:

The cost savings would be estimated at \$9,503,173 due to duplication of efforts due to the impending ATSC 3.0 broadcast standard change

Total Requested (One-Time+On-Going) by Fund Class				800,000				470,000					1,270,000

Expenditure Summary:

All these projects are anticipated to begin in FY 2019 but will probably run into FY 2020.

Landscaping & Fencing - The landscaping improvement is to replace the trees and shrubs that were removed for the facade replacement project. The fencing is to protect the PSC facilities from destruction and drug related litter associated with the community's homeless population.

Security Upgrade - This improvement is for updating and improving the coverage area of our security cameras for the PSC campus

Carpet - This improvement is to replace the 16+ years old carpet in the PSC Headquarters building.

Roof Transportation Building - This improvement is to replace the roof on the PSC Transportation building. The building needed a new roof when purchased in 2002 but the funds were not available.

SRIS - Smart Roadside Inspection System compatible with our current SRIS at Winfield weigh station to be located at the Mineral Wells weigh station. To be funded with a cooperative agreement with the WV Division of Motor Vehicles in administration Commercial Vehicle Information (CVISN) grant.

Anticipated benefits to the program or the effects if improvement is not funded:

-andscaping & Fencing - This improvement is necessary to protect PSC customers and employees from numerous diseases rising from exposure to drug related litter, human waste, bed bugs, etc.

Security Upgrade - This improvement is necessary to protect PSC customers and employees from bodify harm, and vandalism of public and personal property.

Carpet - This improvement is necessary to protect the public and PSC employees from a tripping hazard.

Roof Transportation Building - This improvement's benefits are consistent with the potential cost savings- preventing: ceiling damage, mold and mildew issues, fire hazard from water damage, slip and fall hazard, higher utility bills and wasted energy, and compromised structural integrity

SRIS - This purchase will directly benefit the Commission and the residents of the State of West Virginia by enhancing the capabilities of the Commission to detect and remove unsafe vehicles, drivers and companies from West Virginia roadways.

Interest payments would be avoided. Moreover, more timely payment means attorneys would not factor their vouchers at a cost of 10% to 20%. The agency believes that overbilling is tied, in part, to covering this cost, although it cannot be quantified.

Private counsel billings averages \$2.2 million per month. The supplemental is necessary to continue paying private counsel and avoid paying interest on vouchers unpaid 90 days after receipt (see W.Va. code 29-21-13a(h)).

The benefit of this supplemental is to pay for constitutionally mandated indigent defense and avoid paying interest.

Anticipated benefits to the program or the effects if improvement is not funded:

The purpose of the Supplemental Request is to create a dedicated Special Revenue fund with sufficient SPENDING AUTHORITY ONLY to be utilized for future capital improvements and upgrades for WWDA facilities and equipment. A corresponding Improvement Request is being submitted for this fund as well, to establish it for FY 2020.

# Anticipated benefits to the program or the effects if improvement is not funded:

In order to effectively carry out the agency responsibilities mandated in Chapter 19 of WV Code, both facilities and equipment must be kept up-to-date for continued employee safety, national accreditation, and associated infrastructure is critical to stay abreast of forthcoming regulatory issues and possible threats to public health, investock health, and food safety. As new agricultural opportunities arise for the state, it is WVDA's goal to have facilities and resources that are in compliance with modern regulations to support those opportunities in a self-sufficient manner that does not rely on General Revenue appropriations.

## Anticipated cost savings to budget if improvement is approved:

By establishing a dedicated Special Revenue fund for improvements, WVDA will have a mechanism in place to plan for funding future facility upgrades and maintenance that is not dependent on General Revenue appropriations. This account will account will allow for those excess funds to be reinvested within the agency.

Expenditure Summary:

The purpose of this Supplemental Request is to secure ADDITIONAL SPENDING AUTHORITY ONLY was a new appropriation in the Appropriated Special and Federal Revenue Funds (1446 and 8736, respectively) to support federal funding provided for a critical land slip repair project at the agency-owned Food Distribution Program warehouse in Jackson County. A corresponding Improvement Request will also be submitted to establish this ongoing spending authority for FY 2020.

Anticipated benefits to the program or the effects if improvement is not funded:

Expenditures covered by federal funding to address land improvements cannot be made without additional spending authority and the accompanying appropriations being established under each fund.

Anticipated cost savings to budget if improvement is approved:

Additional spending authority will allow VVVDA to fully utilize newly-awarded federal funding for critical land repairs at agency-owned facilities, instead of relying on General Revenue resources. Should federal funding be insufficient the land repairs, instead of relying on Canary overage, which will require the addition of Appropriation 73000 to properly classify expenditures from that fund.
